Drupal for Humanists Quinn Dombrowski,2016-11-02 Drupal is a free and open-source content management framework. It is, like many web platforms, the “backbone” behind a website, invisible to front-end users but critical to the foundation, organization, and presentation of content. As more scholars and students seek to make their research available online—using the power of the web to find newer and richer ways of presenting large data sets—they are increasingly reaching the limits of what “old” platforms can accomplish. Author Quinn Dombrowski has taught numerous courses in Drupal programming for scholars in the humanities; the techniques here have been field tested. The majority of this book is centered around the creation of an example website, based on a fully functional website that is driven by Drupal. Drupal for Humanists is the first book on Drupal to be crafted specifically for non-technical users. This manual does not assume any prior experience with PHP, FTP, databases, CMS, or even HTML. If these acronyms are unfamiliar, Drupal for Humanists is the place to start.

**Higher Education 4.0** Kevin Anthony Jones,Sharma Ravishankar,2021-04-15 This book chronicles a 10-year introduction of blended learning into the delivery at a leading technological university, with a longstanding tradition of technology-enabled teaching and learning, and state-of-the-art infrastructure. Hence, both teachers and students were familiar with the idea of online courses. Despite this, the longitudinal experiment did not proceed as expected. Though few technical problems, it required behavioural changes from teachers and learners, thus unearthing a host of socio-technical issues, challenges, and conundrums. With the undercurrent of design ideals such as “tech for good”, any industrial sector must examine whether digital

platforms are credible substitutes or at best complementary. In this era of Industry 4.0, higher education, like any other industry, should not be about the creative destruction of what we value in universities, but their digital transformation. The book concludes with an agenda for large, repeatable Randomised Controlled Trials (RCTs) to validate digital platforms that could fulfil the aspirations of the key stakeholder groups – students, faculty, and regulators as well as delving into the role of Massive Open Online Courses (MOOCs) as surrogates for “fees-free” higher education and whether the design of such a HiEd 4.0 platform is even a credible proposition. Specifically, the book examines the data-driven evidence within a design-based research methodology to present outcomes of two alternative instructional designs evaluated – traditional lecturing and blended learning. Based on the research findings and statistical analysis, it concludes that the inexorable shift to online delivery of education must be guided by informed educational management and innovation.
