The Idea of the Book in the Middle Ages Jesse Gellrich, 2019-03-15 This book assesses the relationship of literature to various other cultural forms in the Middle Ages. Jesse M. Gellrich uses the insights of such thinkers as Levi-Strauss, Foucault, Barthes, and Derrida to explore the continuity of medieval ideas about speaking, writing, and texts.

A Thesaurus of English Word Roots Horace Gerald Danner, 2014-03-27 Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odyacusia.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

Preface to Plato Eric A. Havelock, 2009-06-30 Plato's frontal attack on poetry has always been a problem for sympathetic students, who have often minimized or avoided it. Beginning with the premise that the attack must be taken seriously, Eric Havelock shows that Plato's hostility is explained by the continued domination of the poetic tradition in contemporary Greek thought. The reason for the dominance of this tradition was technological. In a nonliterate culture, stored experience necessary to cultural stability had to be preserved as poetry in order to be memorized. Plato attacks poets, particularly Homer, as the sole source of Greek moral and technical instruction. Mr. Havelock shows how the *Iliad* acted as an oral encyclopedia. Under the label of mimesis, Plato condemns the poetic process of emotional identification and the necessity of presenting content as a series of specific images in a continued narrative. The second part of the book discusses the Platonic Forms as an aspect of an increasingly rational culture. Literate Greece demanded, instead of poetic discourse, a vocabulary and a sentence structure both abstract and explicit in which experience could be described normatively and analytically: in short a language of ethics and science.

The Craft of Poetry Derek Attridge, Henry Staten, 2015-04-17 This book presents an innovative format for poetry criticism that its authors call dialogical poetics. This approach shows that readings of poems, which in academic literary criticism often look like a product of settled knowledge, are in reality a continual negotiation between readers. But Derek Attridge and Henry Staten agree to rein in their own interpretive ingenuity and minimally interpret poems – reading them with careful regard for what the poem can be shown to actually say, in detail and as a whole, from opening to closure. Based on a series of emails, the book explores a number of topics in the reading of poetry, including historical and intellectual context, modernist difficulty, the role of criticism, and translation. This highly readable book will appeal to anyone who enjoys poetry, offering an inspiring resource for students whilst also mounting a challenge to some of the approaches to poetry currently widespread in the academy.

The Joy Luck Club Amy Tan, 2006-09-21 "The Joy Luck Club is one of my favorite books. From the moment I first started reading it, I knew it was going to be incredible. For me, it was one of those once-in-a-lifetime reading experiences that you cherish forever. It inspired me as a writer and still remains hugely inspirational." –Kevin Kwan, author of *Crazy Rich Asians* Amy Tan's beloved, New York Times bestselling tale of mothers and daughters, now the focus of a new documentary *Amy Tan: Unintended Memoir* on Netflix Four mothers, four daughters, four families whose histories shift with the four winds depending on who's saying the stories. In 1949 four Chinese women, recent immigrants to San Francisco, begin meeting to eat dim sum, play mahjong, and talk. United in shared

unspeakable loss and hope, they call themselves the Joy Luck Club. Rather than sink into tragedy, they choose to gather to raise their spirits and money. To despair was to wish back for something already lost. Or to prolong what was already unbearable. Forty years later the stories and history continue. With wit and sensitivity, Amy Tan examines the sometimes painful, often tender, and always deep connection between mothers and daughters. As each woman reveals her secrets, trying to unravel the truth about her life, the strings become more tangled, more entwined. Mothers boast or despair over daughters, and daughters roll their eyes even as they feel the inextricable tightening of their matriarchal ties. Tan is an astute storyteller, enticing readers to immerse themselves into these lives of complexity and mystery.

Chromatic Cinema Richard Misek, 2010-04-26 Chromatic Cinema Color permeates film and its history, but study of its contribution to film has so far been fragmentary. Chromatic Cinema provides the first wide-ranging historical overview of screen color, exploring the changing uses and meanings of color in moving images, from hand painting in early skirt dance films to current trends in digital color manipulation. In this richly illustrated study, Richard Misek offers both a history and a theory of screen color. He argues that cinematic color emerged from, defined itself in response to, and has evolved in symbiosis with black and white. Exploring the technological, cultural, economic, and artistic factors that have defined this evolving symbiosis, Misek provides an in-depth yet accessible account of color's spread through, and ultimate effacement of, black-and-white cinema.

A History of Roman Literature Michael von Albrecht, 1997

Media Manifestos Régis Debray, 1996 In this volume Régis Debray sums up over a decade of his research and writing on the evolution of subjects of communication and the technologically transmitted interventions of the modern intelligentsia in France. Media Manifestos announces the battle-readiness of a new sub-discipline of the sciences humaines: mediology. Scion of that semiology of the sixties linked with the names of Roland Barthes and Umberto Eco and affiliated trans-Atlantically to the semiotics of C.S. Pierce and media analyses of Marshall McLuhan (media is message), mediology is in dialectical revolt against its parent thought-system. Determined not to lapse back into the uncritical empiricism and psychologism with which semiology broke, mediology is just as resolved to dispel the cult or illusion of the signifier as the be-all-and-end-all, slough off the scholasticism of the code, and recover the world in all its mediatized materiality. In this enterprise its ally is the work of French historians of mentalité, of the hard and evolutionary sciences, and of the technologies of transmission (from stylus and clay to quill and parchment to press and paper to mouse and screen). Written with Debray's customary brio, Media Manifestos is no mere contribution to the vogue of media studies. It remains steeped in the intellectual culture of Louis Althusser and Michel Foucault, indebted to the neolithic anthropology of Leroi-Gourhan and the study of science and technology of Serres and Latour, informed by the material histories of the Annales school, yet plugged into the audiovisual culture of today's videosphere (as against the printerly graphosphere of yesterday, and the scriptorial logosphere of the day before that). Debray's work turns a neologism (mediology) into a tool-kit with which to rethink the whole business of mediation from the city-state to the internet.

The Social Creation of Nature Lorne Leslie Neil Evernden, 1992-10 The book traces the evolution of the concept of nature over the past five centuries. In exploring the consequences of conventional understandings, it also seeks a way around the limitations of a socially created nature, in order to defend what is actually imperiled - wildness.

An Introduction to Applied Semiotics Louis Hébert, 2019-11-28 An Introduction to Applied Semiotics presents nineteen semiotics tools for text and image analysis. Covering a variety of different schools and approaches, together with the author's own original approach, this is a full and synthetic introduction to semiotics. This book presents general tools that can be used with any semiotic product. Drawing on the work of Fontanille, Genette, Greimas, Hébert, Jakobson, Peirce, Rastier and Zilberberg, the tools deal with the analysis of themes and action, true and false, positive and negative, rhythm narration and other elements. The application of each tool is illustrated with analyses of a wide range of texts and images, from well-known or distinctive literary texts, philosophical or religious texts or images, paintings, advertising and everyday signs and symbols. Each chapter has the same structure – summary, theory and application, making it ideal for course use. Covering both visual and textual objects, this is a key text for all courses in semiotics and textual analysis within linguistics, communication studies, literary theory, design, marketing and related areas.
