**Liability for Antitrust Law Infringements & Protection of IP Rights in Distribution** Pranvera Këllezi,Bruce Kilpatrick,Pierre Kobel,2019-07-05 This book gathers international and national reports from across the globe on key questions in the field of antitrust and intellectual property. The first part discusses the allocation of liability for infringement of antitrust laws between corporations and individuals. The book explores the criminal or administrative sanctions available against corporations, companies or group of companies, and individuals, such as employees or directors. A detailed international report explores the major trends and challenges in this field and provides an excellent comparative study of this complex and challenging subject. The second part examines whether intellectual property rights are sufficiently protected to ensure a fair return on investments made by manufacturers and distributors. This question comes at a time where distribution is facing deep and radical changes with the Internet. To what extent this is an opportunity or a threat to the sustainability of distribution systems of differentiated and IP protected goods is the question. This book brings together the current legal responses across a number of European countries and elsewhere in the world, all summarised and elaborated in an international report. The book also includes the resolutions passed by the General Assembly of the International League of Competition Law (LIDC) following a debate on each of these topics, which include proposed solutions and recommendations. The LIDC is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

It also boasts a restructured format, dividing the book into two broad sections: the first focuses on ideas and principles, along with evidence on their applications in the health sector, whereas the second focuses on introducing core tools and techniques used in applied health economics research. Further updates to this edition include: two new chapters on applied econometrics; a new chapter on equity, focusing on equity in access to health care, paying particular attention to how access and need for health care are defined and measured in applied research; a new chapter on emerging issues for health systems that are emanating from a series of global transitions both within (e.g. demographic change, epidemiological change, the global resolution on universal health coverage) and without the health sector (e.g. economic transitions). Throughout the text, examples and illustrations are taken from a wide range of settings and world regions, providing a unique overview of the performance of different health systems.
