The Syntactic Structures of Korean Jong-Bok Kim, 2016-07-28 Jong-Bok Kim offers a remarkably broad yet in-depth overview of popular contemporary topics in Korean syntax and semantics.

Dotawo: a Journal of Nubian Studies Dotawo Journal, Angelika Jakobi, 2015-06 Dotawo: A Journal of Nubian Studies offers a multi-disciplinary, diachronic view of all aspects of Nubian civilization. It brings to Nubian studies a new approach to scholarly knowledge: an open-access collaboration with DigitalCommons@Fairfield, an institutional repository of Fairfield University in Connecticut, USA, and open-access publishing house punctum books. The first two volumes of Dotawo have their origins in a Nubian language panel organized by Angelika Jakobi within the Nilo-Saharan Linguistics Colloquium held at the University of Cologne, May 22 to 24, 2013. Since many invited participants from Sudan were unable to get visas due to the shutdown of the German Embassy in Khartoum at that time, the Fritz Thyssen Foundation funded the organization of a second venue of specialists on modern Nubian languages. This so-called Nubian Panel 2 was hosted by the Institute of African & Asian Studies at the University of Khartoum on September 18 and 19, 2013. This volume publishes the proceedings of that panel. Future volumes will address three more themes: 1) Nubian women; 2) Nubian place names; 3) and know-how and techniques in ancient Sudan. The calls for papers for the first two volumes may be found on the back of this volume. The third volume is already in preparation with the assistance of Marc Maillot of the Section française de la direction des Antiquités du Soudan, Department of Archeology. We welcome proposals for additional themed volumes, and invite individual submissions on any topic relevant to Nubian studies.

Language History and Linguistic Description in Africa Ian Maddieson, Thomas J. Hinnebusch, 1998 For more than a quarter of a century the Annual conference on African Linguistics (ACAL) has provided a lively forum for the confrontation of ideas on theoretical linguistics with descriptive data on African languages.

Affix Ordering Across Languages and Frameworks Stela Manova, 2015 This volume advances our understanding of how word structure in terms of affix ordering is organized in the languages of the world. Affix ordering is a central issue in linguistic theory and there has been much research on the topic. The present volume contributes novel data from typologically diverse well-studied and lesser-studied languages as well as original analyses, and covers the major approaches in the field. Unlike previous research, most of the contributions in this collection consider more than one language.

Angles of Object Agreement Andrew Nevins, Anita Peti-Stantic, Mark de Vos, Jana Willer-Gold, 2022-11-30 This volume draws on insights from a range of theoretical perspectives to explore objects, agreement, and their intersecting angles, based on novel data from multiple language families. The chapters explore the mechanics of object agreement, constraints on symmetry, features of object agreement, and issues relating to the left periphery.

The Oxford Guide to Australian Languages Claire Bowern, 2023-03-16 The Oxford Guide to Australian Languages is a wide-ranging reference work that explores the more than 550 traditional and new Indigenous languages of Australia. Australian languages have long played an important role in diachronic and synchronic linguistics and are a vital testing ground for linguistic theory. Until now, however, there has been no comprehensive and accessible guide to their vast linguistic

diversity. This volume fills that gap, bringing together leading scholars and junior researchers to provide an up-to-date guide to all aspects of the languages of Australia. The chapters in the book explore typology, documentation, and classification; linguistic structures from phonology to pragmatics and discourse; sociolinguistics and language variation; and language in the community. The final part offers grammatical sketches of a selection of languages, sub-groups, and families. At a time when the number of living Australian languages is significantly reduced even compared to twenty year ago, this volume establishes priorities for future linguistic research and contributes to the language expansion and revitalization efforts that are underway.

Space in Tense Kyung-Sook Chung, 2012 This monograph explores the tense, aspect, mood, and evidentiality of Korean, which has a rich verbal inflectional system, and proposes novel treatments within the framework of compositional semantics. One of the major contributions is the demonstration that Korean has two types of deictic tense—simple deictic and spatial deictic tense. Spatial deictic tense refers to the notion of the speaker's 'perceptual field' (or deictic range), as well as to temporality, functioning to set up a condition for a systematic evidential distinction. The research in this volume shows that the basic paradigm of evidentiality of Korean derives from the standard TMA system combined with the notion of space. This volume also shows that perfect and past tense utilize different primitives. The intended readership of this volume extends beyond Koreanists to scholars interested specifically in tense, mood, aspect, and evidentiality as well as in general theories of grammar and semantics-pragmatics.

Contrastive Studies in Verbal Valency Lars Hellan, Andrej Malchukov, Michela Cennamo, 2017-04-30 In recent years, issues of verbal valency, valency alternations and verb classes have seen a new upsurge of interest from a variety of perspectives. This book comprises articles investigating valency phenomena on a contrastive basis within Romance, Germanic and Slavic, and also in Basque and in the West-African language Ga, as well as classical Greek and Sanskrit. Phenomena include transitive and ditransitive constructions and alternations, involving reflexives, cognate objects, 'null' objects, case (in its syntagmatic and paradigmatic aspects), and infinitives, mostly in a synchronic perspective. Aiming at a closer understanding of the range of regularities falling within the concept of valency frames, the book offers a representative array of current assumptions, hypotheses, methodologies and new findings within the overall field. The volume will provide a valuable resource for researchers and students both in general linguistics and in the relevant language particular disciplines.

Deconstructing Ergativity Maria Polinsky, 2016 Building upon theoretical innovations and extensive empirical findings, this book explains variation in the syntactic behavior of ergative arguments across languages. It offers a new analysis of ergativity by recognizing two distinct types, PP-ergative- and DP-ergative-languages. Each type is characterized by a set of correlated features which result in structural consistency.

African linguistics on the prairie Jason Kandybowicz, Travis Major, Harold Torrence, Philip T. Duncan, 2018-06-15 African Linguistics on the Prairie features select revised peer-reviewed papers from the 45th Annual Conference on African Linguistics, held at the University of Kansas. The articles in this volume reflect the enormous diversity of African languages, as they focus on languages from all of the major African language phyla. The articles here also reflect the many different research perspectives that frame the work of linguists in the Association for Contemporary African Linguistics. The diversity of views presented in this volume are thus indicative of the vitality of current African linguistics research. The work presented in this volume represents both descriptive and theoretical methodologies and covers fields ranging from phonetics, phonology, morphology, typology, syntax, and semantics to sociolinguistics, discourse analysis, language acquisition, computational linguistics and beyond. This broad scope and the quality of the articles contained within holds out the promise of continued advancement in linguistic research on African languages.

Mobile Tech Report 2016 John R. Roberts, 2016-02-01 If you read technology news, you'll notice

it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2015 and make predictions on what will and won't happen in 2016. You can read what did happen in the mobile technology in 2015. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2015 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2016 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2015 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters.

A grammar of Fwe Hilde Gunnink, 2022-07-06 This book provides a first-ever comprehensive overview of the grammatical structure of Fwe. Fwe is a Bantu language spoken on the border between Zambia and Namibia, by some 20,000 people. Very little previous documentation exists on the language, and the current description of Fwe is based exclusively on newly collected field data. It includes an analysis of the grammatical structure of Fwe, followed by basic cultural information on greetings, a Fwe narrative with its English translation, and a lexicon comprising some 2200 Fwe lexemes with their English translation. This book is intended as a resource for linguists, whether interested in African languages, Bantu languages, language typology, or general linguistics.

The Sino-Tibetan Languages Randy J. LaPolla, Graham Thurgood, 2016-12-08 There are more native speakers of Sino-Tibetan languages than of any other language family in the world. Our records of these languages are among the oldest for any human language, and the amount of active research on them has multiplied in the last few decades. Now in its second edition and fully updated to include new research, *The Sino-Tibetan Languages* includes overview articles on individual

languages, with an emphasis on the less commonly described languages, as well as descriptions and comments on the subgroups in which they occur. There are overviews of the whole family on genetic classification and language contact, syntax and morphology, and also on word order typology. There are also more detailed overview articles on the phonology, morphosyntax, and writing system of just the Sinitic side of the family. Supplementing these overviews are articles on Shanghainese, Cantonese and Mandarin dialects. Tibeto-Burman is reviewed by genetic or geographical sub-group, with overview articles on some of the major groups and areas, and there are also detailed descriptions of 41 individual Tibeto-Burman languages, written by world experts in the field. Designed for students and researchers of Asian languages, *The Sino-Tibetan Languages* is a detailed overview of the field. This book is invaluable to language students, experts requiring concise, but thorough, information on related languages, and researchers working in historical, typological and comparative linguistics.

The Oxford Guide to the Uralic Languages Marianne Bakró-Nagy, Johanna Laakso, Elena Skribnik, 2022-03-24 This volume offers the most comprehensive and wide-ranging treatment available today of the Uralic language family, a group of languages spoken in northern Eurasia. While there is a long history of research into these languages, much of it has been conducted within several disparate national traditions; studies of certain languages and topics are somewhat limited and in many cases outdated. *The Oxford Guide to the Uralic Languages* brings together leading scholars and junior researchers to offer a comprehensive and up-to-date account of the internal relations and diversity of the Uralic language family, including the outlines of its historical development, and the contacts between Uralic and other languages of Eurasia. The book is divided into three parts. Part I presents the origins and development of the Uralic languages: the initial chapters examine reconstructed Proto-Uralic and its divergence, while later chapters provide surveys of the history and codification of the three Uralic nation-state languages (Hungarian, Finnish, and Estonian) and the Uralic minority languages from Baltic Europe to Siberia. This part also explores questions of endangerment, revitalization, and language policy. The chapters in Part II offer individual structural overviews of the Uralic languages, including a number of understudied minority languages for which no detailed description in English has previously been available. The final part of the book provides cross-Uralic comparative and typological case studies of a range of issues in phonology, morphology, syntax, and the lexicon. The chapters explore a number of topics, such as information structure and clause combining, that have traditionally received very little attention in Uralic studies. The volume will be an essential reference for students and researchers specializing in the Uralic languages and for typologists and comparative linguists more broadly.

Lexical Polycategoriality Valentina Vapnarsky, Edy Veneziano, 2017-10-15 This book presents a collection of chapters on the nature, flexibility and acquisition of lexical categories. These long-debated issues are looked at anew by exploring the hypothesis of lexical polycategoriality –according to which lexical forms are not fully, or univocally, specified for lexical category– in a wide number of unrelated languages, and within different theoretical and methodological perspectives. Twenty languages are thoroughly analyzed. Apart from French, Arabic and Hebrew, the volume includes mostly understudied languages, spoken in New Guinea, Australia, New Caledonia, Amazonia, Meso- and North America. Resulting from a long-standing collaboration between leading international experts, this book brings under one cover new data analyses and results on word categories from the linguistic and acquisitional point of view. It will be of the utmost interest to researchers, teachers and graduate students in different fields of linguistics (morpho-syntax, semantics, typology), language acquisition, as well as psycholinguistics, cognition and anthropology.

The Electrician, 1901

A grammar of Japhug Guillaume Jacques, 2021 Japhug is a vulnerable Gyalrongic language, which belongs to the Trans-Himalayan (Sino-Tibetan) family. It is spoken by several thousand speakers in Mbarkham county, Rngaba district, Sichuan province, China. This grammar is the result of nearly 20 years of fieldwork on one variety of Japhug, based on a corpus of narratives and conversations, a large part of which is available from the Pangloss Collection. It covers the whole

grammar of the language, and the text examples provide a unique insight into Gyalrong culture. It was written with a general linguistics audience in mind, and should prove useful not only to specialists of Trans-Himalayan historical linguistics and typologists, but also to anthropologists doing research in Gyalrong areas. It is also hoped that some readers will use it to learn Japhug and pursue research on this fascinating language in the future.

MMIXware Donald E. Knuth,2003-06-26 MMIX is a RISC computer designed by Don Knuth to illustrate machine-level aspects of programming. In the author's book series The Art of Computer Programming, MMIX replaces the 1960s-style machine MIX. A particular goal in the design of MMIX was to keep its machine language simple, elegant, and easy to learn. At the same time, all of the complexities needed to achieve high performance in practice are taken into account. This book constitutes a collection of programs written in CWEB that make MMIX a virtual reality. Among other utilities, an assembler converting MMIX symbolic files to MMIX objects and two simulators executing the programs in given object files are provided. The latest version of all programs can be downloaded from MMIX's home page. The book provides a complete documentation of the MMIX computer and its assembly language. It also presents mini-indexes, which make the programs much easier to understand. A corrected reprint of the book has been published in August 2014, replacing the version of 1999.

Handbook of Nanocellulose and Cellulose Nanocomposites Hanieh Kargarzadeh,Ishak Ahmad,Sabu Thomas,Alain Dufresne,2017-03-02 An up-to-date and comprehensive overview summarizing recent achievements, the state of the art, and trends in research into nanocellulose and cellulose nanocomposites. Following an introduction, this ready references discusses the characterization as well surface modification of cellulose nanocomposites before going into details of the manufacturing and the self-assembly of such compounds. After a description of various alternatives, including thermoplastic, thermosetting, rubber, and fully green cellulose nanocomposites, the book continues with their mechanic and thermal properties, as well as crystallization and rheology behavior. A summary of spectroscopic and water sorption properties precedes a look at environmental health and safety of these nanocomposites. With its coverage of a wide variety of materials, important characterization tools and resulting applications, this is an essential reference for beginners as well as experienced researchers.
