**Mobile Tech Report 2016** John R. Roberts, 2016-02-01 If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2015 and make predictions on what will and won't happen in 2016. You can read what did happen in the mobile technology in 2015. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2015 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2016 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2015 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters.

A Grammar of Kunbarlang Ivan Kapitonov, 2021-07-05 This is a comprehensive linguistic description of Kunbarlang (Gunbalang), a highly endangered polysynthetic language of northern Australia. Kunbarlang belongs to the non-Pama-Nyungan Gunwinyguan language family and is currently spoken by nearly 40 people. This work draws on elicitations and analysis of narratives from the author's original field work (2015--2018), as well as those from previous recordings. The main areas covered are the sound system, morphology, syntax, and aspects of lexical and constructional semantics. Dictated by the polysynthetic structure of the language and the patterns of its use, the principal focus of the work is the analysis of the verbal complex and the interaction between the verb and other constituents of the clause. The analysis strike a balance between taking into consideration the areal and genetic context, being informed by linguistic typology and theory, yet at the same time remaining data-driven and theory-neutral in the way generalisations are stated. Against the Australian and a broader cross-linguistic background, Kunbarlang possesses remarkable features at all levels of its organisation.

*Reported Discourse* Tom Güldemann, Manfred von Stechow, 2002-09-24 The present volume unites 15 papers on reported discourse from a wide genetic and geographical variety of languages. Besides the treatment of traditional problems of reported discourse like the classification of its intermediate categories, the book reflects in particular how its grammatical, semantic, and pragmatic properties have repercussions in other linguistic domains like tense-aspect-modality, evidentiality, reference tracking and pronominal categories, and the grammaticalization history of quotative constructions. Almost all papers present a major shift away from analyzing reported discourse with the help of abstract transformational principles toward embedding it in functional and pragmatic aspects of language. Another central methodological approach pervading this collection consists in the discourse-oriented examination of reported discourse based on large corpora of spoken or written texts which is increasingly replacing analyses of constructed de-contextualized utterances prevalent in many earlier treatments. The book closes with a comprehensive bibliography on reported discourse of about 1.000 entries.

**Meta-analysis and Combining Information in Genetics and Genomics** Rudy Guerra, Darlene R. Goldstein, 2016-04-19 *Novel Techniques for Analyzing and Combining Data from Modern Biological Studies Broadens the Traditional Definition of Meta-Analysis* With the diversity of data and meta-data now available, there is increased interest in analyzing multiple studies beyond statistical approaches of formal meta-analysis. Covering an extensive range of quantitative information combination methods, *Meta-analysis and Combining Information in Genetics and Genomics* looks at how to analyze multiple studies from a broad perspective. After presenting the basic ideas and tools of meta-analysis, the book addresses the combination of similar data types: genotype data from genome-wide linkage scans and data derived from microarray gene expression experiments. The expert contributors show how some data combination problems can arise even within the same basic framework and offer solutions to these problems. They also discuss the combined analysis of different data types, giving readers an opportunity to see data combination approaches in action across a wide variety of genome-scale investigations. As heterogeneous data sets become more common, biological understanding will be significantly aided by jointly analyzing such data using fundamentally sound statistical methodology. This book provides many novel techniques for analyzing data from modern biological studies that involve multiple data sets, either of the same type or multiple data sources.

*Telicity, Change, and State* Violeta Demonte, Louise McNally, 2012-06-07 This volume presents new work by leading researchers on central themes in the study of event structure: the nature and representation of telicity, change, and the notion of state. The book advances our understanding of these aspects of event structure by combining foundational semantic research with a series of case

studies from a variety of languages. The book begins with an overview of the theoretical issues central to the volume, along with a brief presentation of the remaining chapters and the points of contact between them. The chapters, developed within several different theoretical perspectives, promote cross-theory as well as cross-linguistic comparison. The work will interest scholars and advanced students of morphology, syntax, semantics, and their interfaces. It will also appeal to researchers in philosophy, psycholinguistics, and language acquisition who are interested in the notions of telicity, change, and stativity.

**Variation and Change in Gallo-Romance Grammar** Sam Wolfe, Martin Maiden, 2020-05-13 This volume offers a wide-range of case studies on variation and change in the sub-family of the Romance languages that includes French and Occitan: Gallo-Romance. Both standard and non-standard Gallo-Romance data can be of enormous value to studies of morphosyntactic variation and change, yet, as the volume demonstrates, non-standard and comparative Gallo-Romance data have often been lacking in both synchronic and diachronic studies. Following an introduction that sets out the conceptual background, the volume is divided into three parts whose chapters explore a variety of topics in the domains of sentence structure, the verb complex, and word structure. The empirical foundation of the volume is exceptionally rich, drawing on standard and non-standard data from French, Occitan, Francoprovençal, Picard, Wallon, and Norman. This diversity is also reflected in the theoretical and conceptual approaches adopted, which span traditional philology, sociolinguistics, formal morphological and syntactic theory, semantics, and discourse-pragmatics. The volume will thus be an indispensable tool for researchers and students in French and (Gallo-) Romance linguistics as well as for readers interested in grammatical theory, sociolinguistics, and historical linguistics.

*The Dravidian Languages* Sanford B. Steever, 2019-12-18 The Dravidian language family is the world's fourth largest with nearly 250 million speakers across South Asia from Pakistan to Nepal, from Bangladesh to Sri Lanka. This authoritative reference source provides a unique description of the languages, covering their grammatical structure and historical development, plus sociolinguistic features. Each chapter combines a modern linguistic perspective with traditional historical linguistics, and a uniform structure allows for easy typological comparison between the individual languages. New to this edition are chapters on Beṭṭa Kuṛumba, Kuṛux, Kūvi and Malayāḷam, and enlarged sections in various existing chapters, as well as updated bibliographies and demographic data throughout. The Dravidian Languages will be invaluable to students and researchers within linguistics, and will also be of interest to readers in the fields of comparative literature, areal linguistics and South Asian studies.

## **Advances in formal Slavic linguistics 2017** Franc Marušič, Petra Mišmaš, Rok Žaucer,

Advances in Formal Slavic Linguistics 2017 is a collection of fifteen articles that were prepared on the basis of talks given at the conference Formal Description of Slavic Languages 12.5, which was held on December 7-9, 2017, at the University of Nova Gorica. The volume covers a wide array of topics, such as control verbs, instrumental arguments, and perduratives in Russian, comparatives, negation, n-words, negative polarity items, and complementizer ellipsis in Czech, impersonal se-constructions and complementizer doubling in Slovenian, prosody and the morphology of multi-purpose suffixes in Serbo-Croatian, and indefinite numerals and the binding properties of dative arguments in Polish. Importantly, by exploring these phenomena in individual Slavic languages, the collection of articles in this volume makes a significant contribution to both Slavic linguistics and to linguistics in general.
