**Solid State NMR of Polymers** T. Asakura,Isao Ando,1998-08-03 In polymer science and technology, the advanced development of various new polymer materials with excellent properties and functions is desirable. For this purpose it is necessary to determine the exact relationship between physical properties and molecular structure-dynamics with powerful techniques. One such technique is solid state NMR. Recently, high resolution NMR studies of solids have been realized by using advanced pulse and mechanical techniques, which has resulted in a variety of structural and dynamical information on polymer systems. Solid state NMR has provided characteristic information which cannot be obtained by other spectroscopic methods. This book is divided into two parts. The first part covers the principles of NMR, important NMR parameters such as chemical shifts, relaxation times, dipolar interactions, quadrupolar interactions, pulse techniques and new NMR methods. In the second part, applications of NMR to a variety of polymer systems in the solid state are described. Features of this book: • Contains an up-to-date and comprehensive account of solid state NMR of polymers by leading researchers in the field • Provides a compilation of solid state NMR of polymers, which makes it an ideal reference book for both NMR researchers and general polymer scientists. This book will be of interest to the NMR community, and will be invaluable for both the beginner and the expert.

*Diaspora Language Contact* Jim Hlavac,Diana Stolac,2021-10-25 This book is an innovative contribution to contact linguistics as it presents a rarely studied but sizeable diaspora language community in contact with five languages – English, German, Italian, Norwegian and Spanish – across four continents. Foregrounded by diachronic descriptions of heritage Croatian in long-standing minority communities the book presents synchronically based studies of the speech of different generations of diaspora speakers. Croatian offers excellent scope as a base language to examine how lexical and morpho-structural innovations occur in a highly inflective Slavic language where external influence from Germanic and Romance languages appears evident. The possibility of internal factors is also addressed and interpretive models of language change are drawn on. With a foreword by Sarah Thomason, University of Michigan

**Language Contact in Sanandaj** Geoffrey Khan,Masoud Mohammadirad,2023-11-06 This book is a detailed study of contact-induced change in the Neo-Aramaic dialect of the Jews of Sanandaj, a town in western Iran. Since its foundation in early 17th century, the city has been home to a significant Jewish community. The Jewish Neo-Aramaic dialect of the town displays different historical layers of contact with various Iranian languages over the course of many centuries. The Iranian languages in question are Gorani, Kurdish, and Persian. Among these, Gorani has had a particularly deep impact on Jewish Neo-Aramaic, whereas the impact of Kurdish, and especially Persian, remains superficial. Jewish Neo-Aramaic records a history of language shift from Gorani to Kurdish in the region. The book offers insights into contact-induced change in social contexts in which a language is maintained as a demarcation of communal identity in a multilingual setting.
