**A Minimalist Theory of Simplest Merge** Samuel D. Epstein, Hisatsugu Kitahara, T. Daniel Seely, 2021-09-28 This collection explicates one of the core ideas underpinning Minimalist theory – explanation via simplification – and its role in shaping some of the latest developments within this framework, specifically the simplest Merge hypothesis and the reduction of syntactic phenomena to third factor considerations. Bringing together recent papers on the topic by Epstein, Kitahara, and Seely, with one by Epstein, Seely and Obata, and one by Kitahara, the book begins with an introduction which situates the papers in a cohesive overview of some of the latest research on Minimalism, as facilitated by current theoretical developments. The volume integrates a historical overview of evolutions in Merge, starting with Chomsky’s (pre-Merge) Aspects model up to current theoretical models, including a primer of Chomsky’s most recent theory of Merge based on the concept of Workspace. The Minimalist notions of perfection and simplification are also outlined, providing clearly explicated coverage of key technical concepts within the framework as applied to grammatical phenomena. Taken as a whole, the collection both introduces and advances Minimalist theory for students and scholars in linguistics and related sub-disciplines of psychology, philosophy, and cognitive science, as well as offering new directions for future research for researchers in these fields.

Mobile Tech Report 2015 John R. Roberts, 2015-02-23 If you read technology news, you’ll notice it’s not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I’ve collected what happened in the industry in 2014 and make predictions on what will and won’t happen in 2015. You can read what did happen in the mobile technology in 2014. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I’m surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It’s often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who’s up, who’s down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore’s Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won’t and will happen in 2015 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare,

SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2014 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters.

**Merger Delusion** Peter F. Trent,2012 Powerless under the country's constitution, Canadian municipal governments often find themselves in conflict with their provincial masters. In 2002, the Province of Quebec forcibly merged all cities on the Island of Montreal into a single municipality - a decision that was partially reversed in 2006. The first book-length study of the series of mergers imposed by the Parti Québécois government,The Merger Delusion is a sharp and insightful critique by a key player in anti-merger politics. Peter Trent, mayor of the City of Westmount, Quebec, foresaw the numerous financial and institutional problems posed by amalgamating municipalities into megacities. Here, he presents a stirring and detailed account of the battle he led against the provincial government, the City of Montreal, the Board of Trade, and many of his former colleagues.

Describing how he took the struggle all the way to the Supreme Court of Canada, Trent demonstrates the ways in which de-mergers resonated with voters and eventually helped the Quebec Liberal Party win the 2003 provincial election. As the cost and pitfalls of forced mergers become clearer in hindsight, The Merger Delusion recounts a compelling case study with broad implications for cities across the globe.

**Perspectives on the Architecture and Acquisition of Syntax** Gautam Sengupta, Shruti Sircar, Madhavi Gayathri Raman, Rahul Balusu, 2018-03-06 This festschrift volume brings together important contributions by expert syntacticians across the globe on tense and finiteness, adjectives, dative and ergative case, acquisition of case, and other topics both within the domain of Dravidian linguistics and in the broader theoretical understanding of cross-linguistic data. Professor R. Amritavalli, a renowned linguist, has spent over three decades in the fields of syntax and syntactic acquisition, making important and landmark contributions in these areas, and this book is a recognition of her work. The contributors cover these themes in the context of English, Chinese, Japanese, Korean, Hindi-Urdu, Bangla, Dravidian languages, and understudied languages like Huave. The analyses presented here have major implications for current theories of syntax and semantics, first and second language acquisition, language typology and historical linguistics, and will be a valuable resource for students, researchers and teachers.

*Structuring Sense: Volume III: Taking Form* Hagit Borer, 2013-10-03 Structuring Sense explores the difference between words however defined and structures however constructed. It sets out to demonstrate over three volumes that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure, from memory of words to manipulation of rules. Its reformulation of how grammar and lexicon interact has profound implications for linguistic, philosophical, and psychological theories about human mind and language. Hagit Borer departs from language specific constructional approaches and from lexicalist approaches to argue that universal hierarchical structures determine interpretation, and that language variation emerges from the morphological and phonological properties of inflectional material. Taking Form, the third and final volume of Structuring Sense, applies this radical approach to the construction of complex words. Integrating research in syntax and morphology, the author develops a new model of word formation, arguing that on the one hand the basic building blocks of language are rigid semantic and syntactic functions, while on the other hand they are roots, which in themselves are but packets of phonological information, and are devoid of both meaning and grammatical properties of any kind. Within such a model, syntactic category, syntactic selection and argument structure are all mediated through syntactic structures projected from rigid functions, or alternatively, constructed through general combinatorial principles of syntax, such as Chomsky's Merge. The meaning of 'words', in turn, does not involve the existence of lexemes, but rather the matching of a well-defined and phonologically articulated syntactic domain with conceptual Content, itself outside the domain of language as such. In a departure from most current models of syntax but in line with many philosophical traditions, then, the Exo-Skeletal model partitions 'meaning' into formal functions, on the one hand, and Content, on the other hand. While the former are read off syntactico-semantic structures as is usually assumed, Content is crucially read off syntactico-phonological structures.

The Oxford Guide to the Uralic Languages Marianne Bakró-Nagy, Johanna Laakso, Elena Skribnik, 2022-03-24 This volume offers the most comprehensive and wide-ranging treatment available today of the Uralic language family, a group of languages spoken in northern Eurasia. While there is a long history of research into these languages, much of it has been conducted within several disparate national traditions; studies of certain languages and topics are somewhat limited and in many cases outdated. The Oxford Guide to the Uralic Languages brings together leading scholars and junior researchers to offer a comprehensive and up-to-date account of the internal relations and diversity of the Uralic language family, including the outlines of its historical development, and the contacts between Uralic and other languages of Eurasia. The book is divided into three parts. Part I presents the origins and development of the Uralic languages: the initial chapters examine reconstructed Proto-Uralic and its divergence, while later chapters provide surveys of the history and codification of the three Uralic nation-state languages (Hungarian, Finnish, and Estonian) and the Uralic minority languages from Baltic Europe to Siberia. This part also explores questions of endangerment, revitalization, and language policy. The chapters in Part II offer individual structural overviews of the Uralic languages, including a number of understudied minority languages for which no detailed description in English has previously been available. The final part of the book provides cross-Uralic comparative and typological case studies of a range of issues in phonology, morphology, syntax, and the lexicon. The chapters explore a number of topics, such as information structure and clause combining, that have traditionally received very little attention in Uralic studies. The volume will be an essential reference for students and researchers specializing in the Uralic languages and for typologists and comparative linguists more broadly.

**Weimar Cities** John Bingham, 2016-05-06 Weimar Cities explores Germany's efforts to come to grips with its great cities after World War I; by extension the book measures the feasibility of the postwar experiment that was the Weimar Republic. The book focuses particularly on the weakness, both local and national, that resulted from the disjunct between the cities' perceived and actual power.
