Coastal Fishes of Oman John E. Randall, 1995 The Sultanate of Oman, at the southeastern corner of the Arabian Peninsula, borders on three different bodies of Ocean: the Arabian Sea, the Gulf of Oman and the Arabian Gulf. This beautifully illustrated book is the first to bring the diverse inshore fish fauna of Oman under one cover. Recent fieldwork by the author and colleagues has increased the number of known shore fishes (defined as those occurring in less than 200 metres) to 930, all of which are treated in this volume. A surprising 52 new species of inshore fishes of Oman (four of which required new generic names) were collected during the recent fieldwork; these had to be described in scientific papers to make the names available for this book. All of the species are illustrated, mostly in colour. The family and species accounts are written to be understood by the layman (a glossary and diagrams are provided to explain scientific terms), but with enough detail and references to serve the needs of professional biologists. *Coastal Fishes of Oman* will promote appreciation of the unique fish fauna of Oman, provide a much-needed inventory of this invaluable resource, and form the basis for future fisheries management.

**Counseling and Psychotherapy** Siang-Yang Tan, 2022-04-19 This substantially revised and updated edition of a widely used textbook covers the major approaches to counseling and psychotherapy from a Christian perspective, with hypothetical verbatim transcripts of interventions for each major approach and the latest empirical or research findings on their effectiveness. The second edition covers therapies and techniques that are increasing in use, reduces coverage of techniques that are waning in importance, and includes a discussion of lay counseling. The book presents a Christian approach to counseling and psychotherapy that is Christ-centered, biblically based, and Spirit-filled.

*World Fish Farming: Cultivation and Economics* E. Brown, 2012-12-06 Until the First Edition of *World Fish Farming: Cultivation and Economics* was published several years ago, there was little or no economic and technical information on commercial aquaculture either by countries or by species. I tried at that time to partially fill the gap in the literature. In this Second Edition, I have updated data originally presented and increased the scope by adding new countries. New trout data have been added for 10 western European countries; sections on cost of production of food-sized catfish and fingerlings in the USA; new and improved chapters for Japan, Hungary, Indonesia, the Philippines, and the United Kingdom; and completely new chapters pertaining to Poland, Thailand, and Czechoslovakia have all been added to this edition. The book now includes 31 countries, including all major producing ones. Between 5.5 and 6.0 million metric tons of finfish, shrimp, and crayfish cultured production are represented, which accounts for about 90% of the world's total. The People's Republic of China and the USSR, as well as countries on the continents of Europe, Asia, North America, and Oceania, are represented. Because of only minimal reported cultured fish production in Africa and South America, these continents have been omitted. Also, according to information received from New Zealand, there is no culturing of fish in that country other than for restocking of public waters. More than 100 species of cultured fish, seven species of shrimp and prawns, and six species of crayfish are discussed.
