Sea of Poppies Amitav Ghosh, 2009-09-29 The first in an epic trilogy, Amitav Ghosh's *Sea of Poppies* is a remarkably rich saga . . . which has plenty of action and adventure à la Dumas, but moments also of Tolstoyan penetration--and a drop or two of Dickensian sentiment (The Observer [London]). At the heart of this vibrant saga is a vast ship, the *Ibis*. Her destiny is a tumultuous voyage across the Indian Ocean shortly before the outbreak of the Opium Wars in China. In a time of colonial upheaval, fate has thrown together a diverse

cast of Indians and Westerners on board, from a bankrupt raja to a widowed tribeswoman, from a mulatto American freedman to a free-spirited French orphan. As their old family ties are washed away, they, like their historical counterparts, come to view themselves as jahaj-bhais, or ship-brothers. The vast sweep of this historical adventure spans the lush poppy fields of the Ganges, the rolling high seas, and the exotic backstreets of Canton. With a panorama of characters whose diaspora encapsulates the vexed colonial history of the East itself, *Sea of Poppies* is a storm-tossed adventure worthy of Sir Walter Scott (Vogue).

Infrared and Raman Spectroscopy Peter Larkin, 2017-11-13 Infrared and Raman Spectroscopy, Principles and Spectral Interpretation, Second Edition provides a solid

introduction to vibrational spectroscopy with an emphasis on developing critical interpretation skills. This book fully integrates the use of both IR and Raman spectroscopy as spectral interpretation tools, enabling the user to utilize the strength of both techniques while also recognizing their weaknesses. This second edition more than doubles the amount of interpreted IR and Raman spectra standards and spectral unknowns. The chapter on characteristic group frequencies is expanded to include increased discussions of sulphur and phosphorus organics, aromatic and heteroaromatics as well as inorganic compounds. New topics include a discussion of crystal lattice vibrations (low frequency/THz), confocal Raman microscopy, spatial resolution in IR and Raman microscopy, as well as criteria for selecting Raman excitation wavelengths. These additions accommodate the growing use of vibrational spectroscopy for process analytical monitoring, nanomaterial investigations, and structural and identity determinations to an increasing user base in both industry and academia. Palms of controversies Alain Rival, Patrice Levang, 2014-07-17 The rapid development of oil palm cultivation feeds many social issues such as biodiversity, deforestation, food habits or ethical investments. How can this palm be viewed as a "miracle plant" by both the agro-food industry in the North and farmers in the tropical zone, but a serious ecological threat by non-governmental organizations (NGOs) campaigning for the environment or rights of local indigenous peoples? In the present book the authors - a biologist and an agricultural economist- describe a global and complex tropical sector, for which the interests of the many different stakeholders are often antagonistic. Oil palm has become emblematic of recent changes in North-South relationship in agricultural development. Indeed, palm oil is produced and consumed in the South; its trade is driven by emerging countries, although the major part of its transformations is made in the North that still hosts the largest multinational agro industries. It is also in the North that the

sector is challenged on ethical and environmental issues. Public controversy over palm oil is often opinionated and it is fed by definitive and sometimes exaggerated statements. Researchers are conveying a more nuanced speech, which is supported by scientific data and a shared field experience. Their work helps in building a more balanced view, moving attention to the South, the region of exclusive production and major consumption of palm oil.
