Collaborative Creative Thought and Practice in Music Professor Margaret S Barrett,2014-12-28 Focusing on the domain of music, the approach taken in this book falls into three sections: investigations of the people, processes, products, and places of collaborative creativity in compositional thought and practice; explorations of the ways in which creative collaboration provides a means of crossing boundaries between disciplines such as music performance and musicology; and studies of the emergence of creative thought and practice in educational contexts including that of the composer and the classroom. The volume concludes with an extended chapter that reflects on the ways in which the studies reported advance understandings of creative thought and practice.

Literature and Science Bruce,2023-12-14 Taking as a starting point the embeddedness of all disciplinary and interdisciplinary inquiry - since interdisciplinarity is itself not a unitary phenomenon but encompasses many different knowledge practices embedded in widely differing political, economic and ideological constituencies - the essays in this volume explore in different ways some of the conversations currently taking place across disciplinary boundaries in the exciting new field of literature and science. Like literature, science is seen as a site of competing ideological constructions, as a complex (and richly ambiguous) element of modern (and postmodern) social discourse, circulating in a wider cultural community where its currency fluctuates according to complex changes in social and epistemic conditions, including the relative prestige or cultural capital of 'science' (or 'literature') within professional and disciplinary hierarchies at any given time.

The Frémont Cannon High Up and Far Back Ernest Allen Lewis,1992-01-01 Years of research can be historically enlightening & full of adventure. Second only to Sir Francis Drake's Ye Platte of Brasse, the lost Fremont Cannon is the next most important artifact of the early western history of the United States yet to be found. With convincing argument, Lewis leads us step-by-step in the explorer's tracks & through the maze of legend surrounding the Fremont Cannon. On its most pleasurable level, this is a treasure hunt, suitable for both scholar & layman. While filling in important historical gaps, THE FREMONT CANNON piques us with delicious agonies.--Peter Wild, Pulitzer Prize nominee, University of Arizona. Ernest Allen Lewis became infected with the Fremont Cannon fever & has made a persistent search for the artifact & the truth: probing the wilderness, poring over old maps & documents & interviewing knowledgeable people in an attempt to separate facts from hearsay & legend. The results are embodied in this clearly written book & is a sound & effective piece of investigative history.--Mary Lee Spence, Professor of History, University of Illinois. The text explores language, character, motifs, and symbols and considers Maraini's work in light of her reputation as a feminist writer and of declining postmodern and emerging posthuman critical social theories.
