Proceedings of the Fourth International Forum on Decision Sciences Xiang Li,Xiaofeng Xu,2017-01-22 These conference proceedings focus on the topics of data-driven decision-making, stochastic decision-making, fuzzy decision-making and their applications in real-life problems. Beijing University of Chemical Technology organized IFDS2016, the 4th International Forum on Decision Sciences, with the theme "Data-Driven Decision-Making." The proceedings collect 84 selected papers presenting cutting-edge modeling and solution methods and include numerous practical case studies, making it a valuable resource for students, researchers and practitioners working in the fields of decision science, operations research, management science and engineering.

Unleash Your Hidden Poker Memory Bennett Onika,2012-04 Your poker face is set. Now train your brain with memory-strengthening exercises that will increase your odds of winning. Going beyond the common poker strategy book, this one-of-a-kind guide utilizes basic memory techniques designed to enable a player to easily keep track of poker statistics during a live game. A variety of engaging imagery is provided, teaching players how to remember approximately 10 to 100 times the information an untrained player would have at a tournament. Covering everything from how often a player plays to memorizing tells, this is the ideal companion for both serious amateurs and professional card sharks.

Wireless Coordinated Multicell Systems Duy H. N. Nguyen,Tho Le-Ngoc,2014-05-15 This SpringerBrief discusses the current research on coordinated multipoint transmission/reception (CoMP) in wireless multi-cell systems. This book analyzes the structure of the CoMP precoders and the

message exchange mechanism in the CoMP system in order to reveal the advantage of CoMP. Topics include interference management in wireless cellular networks, joint signal processing, interference coordination, uplink and downlink precoding and system models. After an exploration of the motivations and concepts of CoMP, the authors present the architectures of a CoMP system. Practical implementation and operational challenges of CoMP are discussed in detail. Also included is a review of CoMP architectures and deployment scenarios in the LTE-Advanced standard. Readers are exposed to the latest multiuser precoding designs for the CoMP system under two operating modes, interference aware and interference coordination. Wireless Coordinated Multi cell Systems: Architectures and Precoding Designs is a concise and approachable tool for researchers, professionals and advanced-level students interested in wireless communications and networks.

Markets and power in digital capitalism Philipp Staab, 2024-03-05 Markets and power in digital capitalism delves into the complex world of modern capitalism, where technology giants reign supreme. From Google and Apple to Amazon and Tencent, these internet behemoths have reshaped the economic landscape, transforming capitalism as we know it. Philipp Staab takes readers on a thought-provoking journey through the virtual realm, exploring how digital surveillance and evaluation practices have infiltrated every aspect of our lives. What sets digital capitalism apart, he argues, is the rise of 'proprietary markets'. No longer focused on producing goods and selling them for profit, today's meta-platforms thrive by owning and controlling the very markets in which they operate. This raises important questions about power dynamics, market monopolies and the future of economic systems. With sharp insight and meticulous research, the book sheds light on the intricate

workings of our digitised economy. Staab's compelling analysis challenges us to confront the realities of surveillance capitalism and the urgent need to address the inequities it perpetuates.

Sales Management. Simplified. Mike Weinberg, 2015-10-21 Packed with examples and anecdotes, *Sales Management. Simplified.* offers a proven formula for prospecting, developing, and closing deals—in your time, on your terms. Why do sales organizations fall short? Every day, expert consultants like Mike Weinberg are called on by companies to find the answer – and it's one that may surprise you. Typically, the issue lies not with the sales team but with how it is being led. Through their attitude and actions, senior executives and sales managers unknowingly undermine performance. Weinberg tells it straight by calling out the problems plaguing sales forces and the costly mistakes made by even the best-intentioned sales managers. The good news is that with the right guidance, results can be transformed. In *Sales Management. Simplified.*, Weinberg teaches managers how to: Implement a simple framework for sales leadership Foster a healthy, high-performance sales culture Conduct productive meetings Put the right people in the right roles Retain top producers and remediate underperformers Point salespeople at the proper targets Blending blunt, practical advice with funny stories from the field, *Sales Management. Simplified.* delivers the tools every sales manager needs to succeed. Managing sales doesn't have to be complicated, and the solution starts with you!

Financing Entrepreneurship and Innovation in Emerging Markets Lourdes Casanova, Peter Klaus Cornelius, Soumitra Dutta, 2017-11-17 *Financing Entrepreneurship and Innovation in Emerging Markets* offers an original perspective on the links between macro data on innovation, data on micro-

entrepreneurial processes and venture capital supply. The authors synthesize two disparate fields of research and thinking—innovation and entrepreneurship and economics—to illuminate how domestic companies compete and the business environment in which entrepreneurial firms operate. Its broad scope and firm linkages between processes at different levels leapfrogs research topics. For those investigating entrepreneurship and innovation in the early stages of economic development, this book demonstrates how micro and macro foundations of productivity, and hence economic growth and development, are inextricably intertwined. Combines macro and micro perspectives on innovation processes Reveals how economic growth and development are inextricably intertwined Uses case studies to portray the entrepreneurial firm and its role in accelerating the speed of innovation and dissemination of new technologies Identifies common flaws undermining public venture programs, including poor design, a lack of understanding for the entrepreneurial process and implementation problems

The Era of Chinese Multinationals Lourdes Casanova, Anne Miroux, 2019-11-12 Chinese multinationals have grown in size and increased their global presence dramatically over the last decade. They have emerged as formidable competitors for western incumbents. These firms have instigated profound changes, such as displaced trade and investment flows, new business models, and the emergence of a new geography of global innovation. In a single volume, *The Era of Chinese Multinationals* captures the forces driving the disruptive growth of Chinese multinational corporations. Following a presentation of the surge of Chinese companies, the book turns to corporate characteristics of those firms and how they compare with western multinationals in terms of revenues, profits, branding, and business

strategy. The book uses data and case studies to depict the relevant issues with the goal of providing insights to global executives on collaborating and competing with Chinese companies. Covers the Chinese government's expansionist policies and Chinese firms' new role as a global acquirer of companies Examines common characteristics of Chinese companies and their efforts to make China an innovation hub Illustrates its analysis with case studies and interviews with corporate executives and experts in multilateral institutions

Big-Data Analytics for Cloud, IoT and Cognitive Computing Kai Hwang, Min Chen, 2017-08-14 The definitive guide to successfully integrating social, mobile, Big-Data analytics, cloud and IoT principles and technologies The main goal of this book is to spur the development of effective big-data computing operations on smart clouds that are fully supported by IoT sensing, machine learning and analytics systems. To that end, the authors draw upon their original research and proven track record in the field to describe a

practical approach integrating big-data theories, cloud design principles, Internet of Things (IoT) sensing, machine learning, data analytics and Hadoop and Spark programming. Part 1 focuses on data science, the roles of clouds and IoT devices and frameworks for big-data computing. Big data analytics and cognitive machine learning, as well as cloud architecture, IoT and cognitive systems are explored, and mobile cloud-IoT-interaction frameworks are illustrated with concrete system design examples. Part 2 is devoted to the principles of and algorithms for machine learning, data analytics and deep learning in big data applications. Part 3 concentrates on cloud programming software libraries from MapReduce to Hadoop, Spark and TensorFlow and describes business, educational, healthcare and social media applications for those tools. The first book describing a practical approach to integrating social, mobile, analytics, cloud and IoT (SMACT) principles and technologies Covers theory and computing techniques and technologies, making it suitable for use in both computer science and electrical engineering programs Offers an extremely well-informed vision of future intelligent and cognitive computing environments integrating SMACT technologies Fully illustrated throughout with examples, figures and approximately 150 problems to support and reinforce learning Features a companion website with an instructor manual and PowerPoint slides www.wiley.com/go/hwangIOT Big-Data Analytics for Cloud, IoT and Cognitive Computing satisfies the demand among university faculty and students for cutting-edge information on emerging intelligent and cognitive computing systems and technologies. Professionals working in data science, cloud computing and IoT applications will also find this book to be an extremely useful working resource.

Cloud Computing for Machine Learning and Cognitive Applications Kai Hwang, 2017-07-07 The first textbook to teach students how to build data analytic solutions on large data sets using cloud-based technologies. This is the first textbook to teach students how to build data analytic solutions on large data sets (specifically in Internet of Things applications) using cloud-based technologies for data storage, transmission and mashup, and AI techniques to analyze this data. This textbook is designed to train college students to master modern cloud computing systems in operating principles, architecture design, machine learning algorithms, programming models and software tools for big data mining, analytics, and cognitive applications.

The book will be suitable for use in one-semester computer science or electrical engineering courses on cloud computing, machine learning, cloud programming, cognitive computing, or big data science. The book will also be very useful as a reference for professionals who want to work in cloud computing and data science. Cloud and Cognitive Computing begins with two introductory chapters on fundamentals of cloud computing, data science, and adaptive computing that lay the foundation for the rest of the book. Subsequent chapters cover topics including cloud architecture, mashup services, virtual machines, Docker containers, mobile clouds, IoT and AI, inter-cloud mashups, and cloud performance and benchmarks, with a focus on Google's Brain Project, DeepMind, and X-Lab programs, IBKai HwangM SyNapse, Bluemix programs, cognitive initiatives, and neurocomputers. The book then covers machine learning algorithms and cloud programming software tools and application development, applying the tools in machine learning, social media, deep learning, and cognitive applications. All cloud systems are illustrated with big data and cognitive application examples.
