What's Your Formula? Brian Washburn, 2021-06-29 Your Periodic Table of Learning Elements Engaging, effective training programs are a mixture of science and art, requiring the right balance of adult learning theory, available technology, intuitive tools, proven practices, creativity, and risk. How does a trainer find the right combination and proportion of these elements? How does a trainer know what's possible? To answer these questions, Brian Washburn offers a simple yet elegant periodic table of learning elements modeled on the original periodic table of chemical properties. Washburn's elements—which are organized into solids, liquids, gases, radioactive, and interactive categories similar to their chemical cousins—are metaphors for the tools and strategies of the field of learning design; when they're combined, and under certain conditions, they have the potential to create amazing learning experiences for participants. They are that impactful. From critical gas-like elements like the air we breathe, present in every training room (think instructional design or visual design), to radioactive elements, powerful and dangerous yet commonly used (think PowerPoint), Washburn guides you through the pitfalls and choices you confront in creating engaging learning experiences. A well-designed training program can be world-changing, he argues, and if you believe in your craft as a learning professional, you can do this too. Whether you're an experienced learning designer or new to the field, this book inspires with new ideas and ways to organize the design of your learning programs. With stories from Washburn's professional experience, the book includes a hands-on glossary of definitions and descriptions for more than 50 of his elements.

Trial Presentation Companion Shannon Lex Bales, 2018-06-22 Defendant Reginald McKay, a mentally disturbed American who became a home-grown Islamic terrorist, poisoned members of a Jewish temple during Passover seder. After one of the The Trial Presentation Companion: A Step-by-Step Guide to Presenting Electronic Evidence in the Courtroom, written by award-winning legal technologist Shannon Lex Bales, is NITA's first-ever, comprehensive "how-to" manual on running electronic evidence in the courtroom. This face-saving guide will help you and your firm expand your comfort zone in working with all the bits and pieces—laptops, trial presentation software, document cameras, audio-visual components, the puzzling array of cords and cables—that are increasingly essential when presenting electronic evidence in court in the modern era. Checklists and guides are included to help your firm create a technology plan for trial and recognize where opposing firms may attempt less-than-reputable technical tactics, such as burden shifting, to throw a monkey wrench in your trial plan. For the judiciary, the book presents a warts-and-all view of trial technology and discusses reasonable presentation obligations by firms to the court and how the court can ensure more efficient technological processes and fewer problems in the courtroom. Part One, Trial Presentation in Theory, is just that: a theoretical explanation, in plain (and often tongue-in-cheek) English, about why expert trial technologists do what they do during pretrial and in court—how to organize and name exhibit files, choose the best software for your needs, build a trial kit of equipment to take to court, comply with the Trial Management Order, develop an effective workflow, cultivate relationships that provide mutual support in court and out, and much more. Included as a free bonus are ready-to-use forms and checklists for you to download and use to help you mind the details of your case. Part Two, Trial Presentation in Practice, shows you, step by illustrated step, how you, too, can bring that same game to your own legal team as you huddle for trial. Even if you don't know an HDMI port from a VGA and have never set up a folder system on your server before, The Trial Presentation Companion will show you how, and before you know it, you'll be running the show like you were born to it. This book is suitable for everyone from judges and law firm partners and associates to law students, budding trial technologists, and paralegals. Whatever your position, we envision you using this eBook alongside your computer, open on either an iPad or a secondary monitor while you plan and execute your courtroom presentation plan. This eBook's functionality is optimized on an iPad because it enables you to pinch-zoom the graphics to view the details, but it may also be downloaded to your desktop and viewed with Adobe Digital Editions. Digital Reader is an eBook reader for PC and Mac—and best of all, it's free.
