The Disappearing Spoon Sam Kean,2010-07-12 From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Deadline Chris Crutcher,2009-04-21 Ben Wolf has big things planned for his

senior year. Had big things planned. Now what he has is some very bad news and only one year left to make his mark on the world. How can a pint-sized, smart-ass seventeen-year-old do anything significant in the nowheresville of Trout, Idaho? First, Ben makes sure that no one else knows what is going on--not his superstar quarterback brother, Cody, not his parents, not his coach, no one. Next, he decides to become the best 127-pound football player Trout High has ever seen; to give his close-minded civics teacher a daily migraine; and to help the local drunk clean up his act. And then there's Dallas Suzuki. Amazingly perfect, fascinating Dallas Suzuki, who may or may not give Ben the time of day. Really, she's first on the list. Living with a secret isn't easy, though, and Ben's resolve begins to crumble . . . especially when he realizes that he isn't the only person in Trout with secrets.

eXtreme Project Management Douglas DeCarlo, 2004-10-21 Today's new breed, eXtreme projects are different. They feature high speed, high change, high complexity, high risk, and high stress. While traditional projects follow the classic model of ready, aim, fire, eXtreme project managers succeed by

shooting the gun and then redirecting the bullet while not losing sight of their moving target. eXtreme Project Management provides a practical guide for leaders working under high risk and high pressure while producing the desired bottom-line results. Based on Doug DeCarlo's extensive experience in working with more than 250 project teams, his eXtreme project management model is built around an integrated set of principles, values, skills, tools, and practices proven to consistently work under conditions of rapid change and uncertainty. eXtreme project management is based on the premise that you don't manage the unknown the same way you manage the known. It's a people-centric approach to high performance that makes quality of life a fundamental part of the project venture.

Literacy in the Open-access College Richard C. Richardson, Elizabeth C. Fisk, Morris A. Okun, 1983 Based on a 3-year case study of an open-access community college, this monograph examines the background to, causes of, and possible resolutions for the decline of literacy in open-access colleges. Chapter 1 presents a working definition of literacy; considers the nature of literacy in a community college setting; and raises issues concerning the impact of the decline of college standards on the student, institution, and

society. Chapter 2 describes the curriculum, administration, faculty, and students of the college and illustrates the complex and dynamic character of the study setting. Chapter 3 provides a detailed description of teaching and learning in the classroom, and chapter 4 looks at reading and writing behaviors required in class activities. Chapter 5 discusses the educational objectives of the college instructors, with a focus on the relationship of course objectives to instructor style, the emphasis on cognitive objectives in the classroom, faculty responses to low student literacy skills, and the reciprocal effects of student skills and teacher objectives. In chapter 6, student motives for pursuing an education are examined along with the way the institution reinforces and responds to these motives. Chapter 7 examines non-classroom influences contributing to the lack of literacy skills, including inadequate advisement, student placement problems, and the absence of special services for non-traditional students. Chapter 8 considers the indirect impact of administrative priorities on classroom literacy. Chapter 9 discusses the implications of study findings for administration and instruction in open-access colleges and offers recommendations for promoting literacy. (LAL)
