It isn't a completely exhaustive reference of all the topics contained within, because obviously that would be impossible in a book of this size. However, it does answer most of the common questions a web professional is likely to come up against in their day-to-day work, in a lively, concise style. Choose the Web Professional's Handbook to take all the boredom out of reference!

The Language of New Media Lev Manovich, 2002-02-22 A stimulating, eclectic account of new media that finds its origins in old media, particularly the cinema. In this book Lev Manovich offers the first systematic and rigorous theory of new media. He places new media within the histories of visual and media cultures of the last few centuries. He discusses new media's reliance on conventions of old media, such as the rectangular frame and mobile camera, and shows how new media works create the illusion of reality, address the viewer, and represent space. He also analyzes categories and forms unique to new media, such as interface and database. Among other topics, Manovich discusses parallels between the histories of cinema and of new media, digital cinema, screen and montage in cinema and in new media, and historical ties between avant-garde film and new media.
