Competing Values Leadership Kim S. Cameron, Robert E. Quinn, Jeff Degraff, Anjan V. Thakor, 2014-08-29 It would be unusual for a framework as powerful and predictive as the Competing Values Framework to remain unchallenged and absent of criticism. In addition to updating the examples and references, this second edition provides a new chapter motivated

The Positive Organization Robert E. Quinn, 2015-08-24 Beholden to accepted assumptions about people and organizations, too many enterprises waste human potential. Robert Quinn shows how to defy convention and create organizations where people feel fully engaged and continually rewarded, where both individually and collectively they flourish and exceed expectations. The problem is that leaders are following a negative and constraining “mental map” that insists organizations must be rigid, top-down hierarchies and that the people in them are driven mainly by self-interest and fear. But leaders can adopt a different mental map, one where organizations are networks of fluid, evolving relationships and where people are motivated by a desire to grow, learn, and serve a larger goal. Using dozens of memorable stories, Quinn describes specific actions leaders can take to facilitate the emergence of this organizational culture—helping people gain a sense of purpose, engage in authentic conversations, see new possibilities, and sacrifice for the common good. The book includes the Positive Organization Generator, a tool that provides 100 real-life practices from positive organizations and helps you reinvent them to fit your specific needs. With the POG you can identify and implement the practices that will have the greatest impact on your organization. At its heart, the book helps leaders to see new possibilities that lie within the acknowledged realities of organizational life. It provides five keys for learning to be bilingual—speaking the conventional language of business as well as the language of the positive organization. When leaders can do this, they are able to make real and lasting change.

Competing Values Leadership Kim S. Cameron, Robert E. Quinn, Jeff DeGraff, Anjan V. Thakor, 2006 Both the framework and the book make notable contributions to both theory and practice. The book will be of value to scholars and organization leaders in understanding the concepts of value creation and organizational effectiveness. It will be an aid to consultants in conceptualizing strategies for organizations and in counselling leaders on how to operationalize the concepts in their organizations. S.R. Mohnot, Global Business Review This is a very readable and excellently presented volume. It will interest anyone concerned with organizational effectiveness and the competing values model. Economic Outlook and Business Review I recommend this book to anyone wishing to understand and practice leadership. Leadership is often treated in mutually-exclusive categories, such as Theory X vs. Theory Y, managers vs. leaders, transactional vs. transformative, initiation vs. consideration, etc. The Competing Values Framework presented in this book transcends these dualities. It features eight competing but complementary values that are critical for managing today's complex and pluralistic organizations. The framework emphasizes the need for balance among the eight leadership roles, and an appreciation of the context, timing, and contingencies when the leadership roles facilitate and inhibit collective endeavors. I have followed the development and testing of the Competing Values Framework over the years. It makes important contributions to both theory and practice. It stimulates positive learning outcomes for students and managers. Andrew H. Van de Ven, University of Minnesota, US Creating value in a firm is an enormously complex endeavor. Yet, despite its complexity, value creation is the objective of every enterprise, every worker, and every leader. The Competing Values Framework can help leaders understand more deeply and act more effectively. In the first book to comprehensively present this framework, the authors discuss its core elements and focus attention

on rethinking the notion of value. They emphasize specific tools and techniques leaders can use to institute sustainable change. The Competing Values Framework was developed in response to the need for a broadly applicable model that would foster successful leadership, improve organizational effectiveness, and promote value creation. It helps leaders think differently about value creation and shows them how to clarify purpose, integrate practices, and lead people. Named one of the 40 most important frameworks in the history of business, it has been studied and tested in organizations for more than 25 years. Currently used by hundreds of firms around the world, the Competing Values Framework serves as a map, an organizing mechanism, a sense-making device, a source of new ideas, and a learning system. This accessible resource will be of great use to organizational scholars interested in the concepts of value creation, organizational effectiveness, and competing values; to leaders and managers interested in enhancing and creating value in their organizations; and to change agents and consultants who use the Competing Values Framework as part of their intervention strategies or who are looking to help improve organizations.

Managing Conflict in Organizations M. Afzalur Rahim, 1992-10-30 This revised and updated edition of Rahim's classic work on managing conflict in organizations presents new evidence that suggests, contrary to generally accepted views, that organizational conflict need not be minimized or avoided in all cases. Some conflicts are functional and others are dysfunctional. Substantive or task-related conflict is functional for nonroutine tasks, but affective conflicts are dysfunctional irrespective of the task conditions. Classifying conflicts as intrapersonal, interpersonal, intragroup, or intergroup, Rahim explains how to diagnose conflict, how to intervene effectively, and how to handle all the different types of conflict that typically arise in organizations.

Leadership Landscapes Christopher Higgins, 2021-12-15 'Leadership Landscapes' provides an invaluable reference point for senior executives or those striving towards a successful cross-border career, to understand how cultural differences impact upon leadership styles and practices. Each semester, we publish a report on our quantitative survey-based global study, alongside our review

of extant in-country leadership literature, preferably written by local scholars and professionals in their native language. Moreover, we attempt to empirically validate these findings by conducting expert interviews with native specialists. This new issue of our ongoing leadership series presents country-specific analyses of culturally endorsed leadership practices and styles in the following countries or territories: Channel Islands, Cuba, Ecuador, Egypt, Eritrea, Indonesia, Iran, Ireland, Nepal, Slovakia, Solomon Islands, Ukraine, Uruguay and Venezuela. This publication contains contributions from around 111 researchers from 26 countries who participated in the Cross-Cultural Business Skills elective offered by the Part-time Academy of the Faculty of Business and Economics at the Amsterdam University of Applied Sciences (HvA). Methods and Tools for Effective Knowledge Life-Cycle-Management Alain Bernard,Serge Tichkiewitch,2008-04-01 Knowledge Management is a wide, critical and strategic issue for all the companies, from the SMEs to the most complex organizations. The key of competitiveness is knowledge, because of the necessity of reactivity, flexibility, agility and innovation capacities. Knowledge is difficult to measure itself but what is visible, this is the way of improving products, technologies and enterprise organizations. During the last four years, based on the experience of most of the best experts around the World, CIRP (The International Academy for Production Engineering) has decided to prepare and structure a Network of Excellence (NoE) proposal. The European Community accepted to found the VRL-KCiP (Virtual Research Laboratory – Knowledge Community in Production). As its name indicates it, the aim of this NoE was really to build a «Knowledge Community in Production ». This was possible and realistic because the partners were

representative of the most important universities in Europe and also because of strong partnerships with laboratories far from Europe (Japan, Australia, South Africa, USA, etc...). Based on such powerful partnership, the main issue was to help European manufacturing industry to define and structure the strategic knowledge in order to face the strategic worldwide challenges. Manufacturing in Europe currently has two essential aspects: 1. It has to be knowledge intensive given the European demands for high-tech products and services (e.g. electronics, medicines).
