The Beneficiary Janny Scott, 2020-04-14 A NEW YORK TIMES NOTABLE BOOK OF THE YEAR [A] poignant addition to the literature of moneyed glamour and its inevitable tarnish and decay...like something out of Fitzgerald or Waugh.—The New Yorker A parable for the new age of inequality: part family history, part detective story, part history of a vanishing class, and a vividly compelling exploration of the degree to which an inheritance—financial, cultural, genetic—conspired in one person's self-destruction. Land, houses, and money tumbled from one generation to the next on the eight-hundred-acre estate built by Scott's investment banker great-grandfather on Philadelphia's Main Line. There was an obligation to protect it, a license to enjoy it, a duty to pass it on—but it was impossible to know in advance how all that extraordinary good fortune might influence the choices made over a lifetime. In this warmly felt tale of an American family's fortunes, journalist Janny Scott excavates the rarefied world that shaped her charming, unknowable father, Robert Montgomery Scott, and provides an incisive look at the weight of inheritance, the tenacity of addiction, and the power of buried secrets. Some beneficiaries flourished, like Scott's grandmother, Helen Hope Scott, a socialite and celebrated horsewoman said to have inspired Katherine Hepburn's character in the play and Academy Award-winning film *The Philadelphia Story*. For others, including the author's father, she concludes, the impact was more complex. Bringing her journalistic talents, light touch, and crystalline prose to this powerful story of a child's search to understand a parent's puzzling end, Scott also raises questions about our new Gilded Age. New fortunes are being amassed, new estates are being born. Does anyone wonder how it will all play out, one hundred years hence?

China Networks Jens Damm,Mechthild Leutner,2009 Networks ranging from village level to transnational level have always played a crucial role in Chinese society. The contributors to this volume aim to trace the interaction between various networks which have existed from the 19th century to the present day. The articles deal with theoretical concepts, historical examples, such as non-state responses to the North China Famine (1876 - 1879), the role of missionaries in the modernization of China and disaster management, including recent inter-ethnic business competition in Hong Kong, Han settlers in Xinjiang, temple festivals in Macau and urban migrants' social networks in today's China. By drawing on new material and theoretical frameworks, these studies shed fresh light on the ways in which various forms of networks have shaped Chinese society, while at the same time questioning traditional and rigid perspectives of Chinese society based solely on networks and guanxi.

Radicalization to Terrorism Sophia Moskalenko,Clark McCauley,2020-05-01 Terrorism and radicalization came to the forefront of news and politics in the US after the unforgettable attacks of September 11th, 2001. When George W. Bush famously asked Why do they hate us?, the President echoed the confusion, anger and fear felt by millions of Americans, while also creating a politicized discourse that has come to characterize and obscure discussions of both phenomena in the media. Since then the American public has lived through a number of domestic attacks and threats, and watched international terrorist attacks from afar on television sets and computer screens. The anxiety and misinformation surrounding terrorism and radicalization are perhaps best detected in questions that have continued to recur in the last decade: Are terrorists crazy?; Is there a profile of individuals likely to become terrorists?; Is it possible to prevent radicalization to terrorism? Fortunately, in the two decades since 9/11, a significant body of research has emerged that can help provide definitive answers. As experts in the psychology of radicalization, Sophia Moskalenko and Clark McCauley propose twelve mechanisms that can move individuals, groups, and mass publics from political indifference to sympathy and support for terrorist violence. Radicalization to Terrorism: What Everyone Needs to Know synthesizes original and existing research to answer the questions raised after each new attack, including those committed by radicalized Americans. It offers a rigorously informed overview of the insight that will enable readers to see beyond the relentless news cycle to understand where terrorism comes from and how best to respond to it.

Singular Sensation Michael Riedel,2020-11-10 The extraordinary story of a transformative decade on Broadway, featuring gripping behind-the-scenes accounts of shows such as *Rent*, *Angels in America*, *Chicago*, *The Lion King*, and *The Producers*—shows that changed the history of the American theater. The 1990s was a decade of profound change on Broadway. At the dawn of the nineties, the British invasion of Broadway was in full swing, as musical spectacles like *Les Misérables*, *Cats*, and *The Phantom of the Opera* dominated the box office. But Andrew Lloyd Webber's *Sunset Boulevard* soon spelled the end of this era and ushered in a new wave of American musicals, beginning with the ascendance of an unlikely show by a struggling writer who reimagined Puccini's opera *La Bohème* as the smash Broadway show *Rent*. American musical comedy made its grand return, culminating in *The Producers*, while plays, always an endangered species on Broadway, staged a powerful comeback with Tony Kushner's *Angels in America*. A different breed of producers rose up to challenge the grip theater owners had long held on Broadway, and corporations began to see how much money could be made from live theater. And just as Broadway had clawed its way back into the mainstream of American popular culture, the September 11 attacks struck fear into the heart of Americans who thought Times Square might be the next target. But Broadway was back in business just two days later, buoyed by talented theater people intent on bringing New Yorkers together and supporting the economics of an injured city. Michael Riedel presents the drama behind every mega-hit or shocking flop, bringing readers into high-stakes

premieres, fraught rehearsals, tough contract negotiations, intense Tony Award battles, and more. From the bitter feuds to the surprising collaborations, all the intrigue of a revolutionary era in the Theater District is packed into *Singular Sensation*. Broadway has triumphs and disasters, but the show always goes on.

The Road to Oz Jay Scarfone, William Stillman, 2018-10-01 A complete retelling of how *The Wizard of Oz* was influenced and created, and attained its iconic status. The new Jay Scarfone and William Stillman volume will reflect recent research and much more through newly discovered period interviews, media resources of the era, transcriptions and unique contemporary interviews with those who were there. Additionally, never-before-published imagery accompanies the text, which may be presented as inserts or interspersed throughout. In its truth and candor, this new historical contribution will need to be unofficial and unauthorized. *The Road to Oz* is ideal to tie-in with the 2018-19 80th anniversary of the 1939 movie.

On the Turn Bárbara Arizti, Silvia Martínez-Falquina, 2007 *On the Turn: The Ethics of Fiction in Contemporary Narrative in English* is an attempt to listen to the various voices that participate in the current dialogue on the relationship between fiction and ethics. The editors' (TM) introduction investigates the current state of affairs on the return to ethics in critical and literary consideration, and it opens up the way for the variety of approaches that follows. Participants include internationally recognized scholars like Andrew Gibson, Patricia Waugh, or Native American fiction writer and poet Gordon Henry, winner of the American Book Award in 1995. All in all, contributors cover a significant geographical diversity, and their approaches also vary from general theory to particular examples, from traditional interpretations to post-deconstruction ethics. Authors analyze texts both mainstream and marginal, colonial and postcolonial; they examine the ethics of race, gender and sexuality; the ethics of self-positioning and orientation; the ethics of style; the ethics of reception; the ethics of mode and genre; the ethics of extreme situations of evil, disease and fascism. In its search for a better understanding of the global/nationalistic world of today, *On the Turn* therefore moves beyond the scope of literary criticism into issues of wider, more urgent relevance. What should I, ought I, may I, must I, do, if anything, on the basis of reading, when I have read a literary work? What does reading a literary work authorize, or even command, me to do? Writing an essay about the work would be one response. *On the Turn* is a wonderfully diverse, learned, challenging, provocative, even sometimes controversial, collection of essays on the ethical dimensions of literature. This book is testimony to the continued lively interest in the ethical turn in literary studies. The authors are, for the most part, concerned with ethical theory and with ethically charged situations in postmodern novels in English, as they shape readers' (TM) values and judgments. Poetry and non-print media are, however, also discussed. J. Hillis Miller UCI Distinguished Research Professor of Comparative Literature and English, University of California at Irvine *The Ethics of Fiction* is an important and exciting volume that explores with energy and rigour the connections between ethics and literature. Relating literature to philosophy, neurobiology, politics, religion, deconstruction and psychoanalysis, the twenty two contributors richly advance the ethical turn (TM) recently embraced by many critics. Works by authors such as Ian McEwan, A.S. Byatt, Charles Palliser, Hanif Kureishi, J.M. Coetzee, David Malouf, George Orwell, E.L. Doctorow, Flannery O'Connor, Toni Morrison and Paul Auster are presented in a new light and complex topics such as territoriality, the nature of love, Islamophobia and the politics of representation are tackled with imagination and intellectual integrity. This book is essential reading for anyone interested in the dialogue between ethics and literature. Avril Horner, Professor of English, Kingston University

Wife | Daughter | Self Beth Kephart, 2021-03-02 *Wife | Daughter | Self* investigates identity and the writing life through the perspective of one of the nation's top memoir teachers and critics. How are we shaped by the people we love? Who are we when we think no one else is watching? How do we trust the choices we make? The answers shift as the years go by. The stories remake themselves as we remember. Curiously, inventively, Beth Kephart reflects on the iterative, composite self in her

new memoir—traveling to lakes and rivers, New Mexico and Mexico, the icy waters of Alaska and a hot-air balloon launch in search of understanding. She is accompanied, often, by her Salvadoran-artist husband. She spends time, a lot of time, with her widowed father. As she looks at them she ponders herself and comes to terms with the person she is still becoming. At once sweeping and intimate, *Wife | Daughter | Self* is a memoir built of interlocking essays by an acclaimed author, teacher, and critic.

Rafael Viñoly Architects Philip Jodidio, Rafael Viñoly, 2011 KEYNOTE: The definitive monograph highlighting the global works of the visionary hailed by The New York Times' Herbert Muschamp as the most elegant architect now practicing in the United States. For nearly half a century Rafael Vinoly has been driven by the belief that the responsibility of architecture is to elevate the public realm. While his early work in Argentina transformed the landscape of his native continent, his first major projects in New York--the John Jay College of Criminal Justice--and in Tokyo--the International Forum--established Vinoly as an international presence in architecture, whose buildings sustain a structural originality that transcends passing fads. This monograph features a chronological sampling of Vinoly's best work in the United States, Latin America, Europe, Asia, Africa and the Middle East. The large and small-scale projects encompass courthouses, private residences, athletic facilities, performing arts centers, museums, and educational buildings. Illustrated with photographs, plans, and drawings, and accented by Vinoly's personal reflection on his career, this volume brings together the achievements of one of today's most internationally acclaimed architects. AUTHOR: Rafael Vinoly was born in Uruguay and by the age of twenty was founding partner of Estudio de Arquitectura, which would become one of the largest design studios in Latin America. In 1983 he founded Rafael Vinoly Architects PC, a New York based firm that now has offices in London, Los Angeles, San Francisco, Chicago, and Abu Dhabi. Philip Jodidio has published numerous books on contemporary architecture, including *Architecture: Art and Architecture: Nature*. He lives in Grimentz, Switzerland. ILLUSTRATIONS 500 colour illustrations

Overkill Paul A. Offit, 2020-04-14 An acclaimed medical expert and patient advocate offers an eye-opening look at many common and widely used medical interventions that have been shown to be far more harmful than helpful. Yet, surprisingly, despite clear evidence to the contrary, most doctors continue to recommend them. Modern medicine has significantly advanced in the last few decades as more informed practices, thorough research, and incredible breakthroughs have made it possible to successfully treat and even eradicate many serious ailments. Illnesses that once were a death sentence, such as HIV and certain forms of cancer, can now be managed, allowing those affected to live longer, healthier lives. Because of these advances, we now live 30 years longer than we did 100 years ago. But while we have learned much in the preceding decades that has changed our outlook and practices, we still rely on medical interventions that are vastly out of date and can adversely affect our health. We all know that finishing the course of antibiotics prevents the recurrence of illness, that sunscreens block harmful UV rays that cause skin cancer, and that all cancer-screening programs save lives. But do scientific studies really back this up? In this game-changing book, Dr. Paul A. Offit debunks fifteen common medical interventions that have long been considered gospel despite mounting evidence of their adverse effects, from vitamins, sunscreen, fever-reducing medicines, and eyedrops for pink eye to more serious procedures like heart stents and knee surgery. Analyzing how these practices came to be, the biology of what makes them so ineffective and harmful, and the medical culture that continues to promote them, *Overkill* informs patients to help them advocate for their health. By educating ourselves, we can ask better questions about some of the drugs and surgeries that are all too readily available—and all too heavily promoted.
