Craftsmen of the Army J M Kneen,D J Sutton,1997-01-01 This book tells the story of the Royal Electrical and mechanical Engineers from 1969 to 1992. During this period the army underwent extensive re-organisation and the REME had to adapt and innovate in order to provide the engineering support needed.

Pacific Symposium on Biocomputing 2010, Kamuela, Hawaii, USA, 4-8 January 2010 Russ B. Altman,2009-10-23 The Pacific Symposium on Biocomputing (PSB) 2010 is an international, multidisciplinary conference for the presentation and discussion of current research in the theory and application of computational methods in problems of biological significance. Presentations are rigorously peer reviewed and are published in an archival proceedings volume. PSB 2010 will be held on January 4 - 8, 2010 in Kohala Coast, Hawaii. Tutorials and workshops will be offered prior to the start of the conference. PSB 2010 will bring together top researchers from the US, Asia Pacific, and around the world to exchange research results and address pertinent issues in all aspects of computational biology. It is a forum for the presentation of work in databases, algorithms, interfaces, visualization, modeling, and other computational methods, as applied to biological problems, with emphasis on applications in data-rich areas of molecular biology. The PSB has been designed to be responsive to the need for critical mass in sub-disciplines within biocomputing. For that reason, it is the only meeting whose sessions are defined dynamically each year in response to specific proposals. PSB sessions are organized by leaders of research in biocomputing's hot topics. In this way, the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field.

CA²RE+ 3 – Frameworks of Design-Driven Research Borrego, Ignacio,Pasel, Ralf,Weidinger, Jürgen,2023-03-02 After the six conferences for artistic and architectural research CA²RE+ has contributed substantially to the fact that design-driven research today is a widely established and scientifically accepted research method on most European countries and the number of involved universities is an indicator for a rapidly growing community in the field of practice-based research. This big effort has meant an interchange of knowledge and at the same time the construction of an international net with very valuable connections. We have created a collective learning environment where we have developed a multidisciplinary approach to a design-driven methodology on scientific research along six steps: observation, sharing, comparison, reflection, reformulation and recommendation, that arrive now to an end, or at least to a preliminary evaluation after this three-year journey. In this final book we collect and share the results of the last two events (Ljubljana and Delft) and the recommendations and conclusions from all partners participating in the whole process. Nach den sechs Konferenzen zu Themen der künstlerischen und architektonischen Forschung hat CA²RE+ wesentlich dazu beigetragen, dass Design Driven Research heute eine weithin etablierte und wissenschaftlich akzeptierte Forschungsmethode in den meisten europäischen Ländern ist. Die Zahl der beteiligten Universitäten ist ein Indikator für eine schnell wachsende Gemeinschaft im Bereich der praxisorientierten Forschung. Diese Anstrengung hat einen Wissensaustausch und gleichzeitig den Aufbau eines internationalen Netzwerkes mit wertvollen Verbindungen hervorgebracht. Wir haben ein kollektives Lernumfeld geschaffen, in dem wir einen multidisziplinären Ansatz für eine gestaltungsorientierte Methodik der wissenschaftlichen Forschung in sechs Schritten entwickelt haben: Beobachtung, Austausch, Vergleich, Reflexion, Neuformulierung und Empfehlung. Diese Entwicklung kommt nun, nach drei Jahren, zu einem Ende oder zumindest zu einer vorläufigen Bewertung. In diesem abschließenden Buch werden die Ergebnisse der letzten beiden Veranstaltungen (Ljubljana und Delft) sowie die Empfehlungen und Schlussfolgerungen aller am gesamten Prozess beteiligten Partner zusammengefasst.

Neurobiology of Exceptionality Con Stough,2006-09-28 Nurture or nature? Biology or environment? Why are some people intelligent, or personable, or creative and others obtuse, or shy, or unimaginative? Although each human being is a unique mixture of positive and negative traits and behaviors, the question remains: What is the neurobiological basis for each individual's makeup? For example, why does one person suffer from a disorder (e.g., ADHD, autism, mental retardation) and another lives free of maladies? These are just some of the issues addressed in detail in Neurobiology of Exceptionality. The introductory chapter provides a broad-based overview of current neurobiological techniques (i.e., terms, procedures, and technologies), which are followed by chapters that offer in-depth examination of the neurobiological bases for: • Impulsive sensation seeking • Creativity • Intelligence • Antisociality • Autism, mental retardation, and Down Syndrome • ADHD • Savant Syndrome This volume provides a one-stop source for clinical psychologists and other allied mental health professionals to access information on a wide range of research on the neurobiology of psychological and psychiatric traits. It is designed to give readers an overview of the current knowledge base of the biological processes for each trait. It is unlikely that any one book could cover all human traits, but the Neurobiology of Exceptionality addresses a wide range of exceptional psychological traits and psychiatric disorders.

The Grammar of Focus Georges Rebuschi,Laurice Tuller,1999-11-15 The grammar of focus has been studied in generative grammar from its inception. It has been the subject of intense, detailed cross-linguistic investigation for over 20 years, particularly within the Principles and Parameters framework. It is appropriate at this point, therefore, to take stock. Appraisal at this particular point is all the more legitimate because it comes at a time of general evaluation of the results of the profound activity that has characterized the Principles and Parameters framework. This general assessment has produced a radical new direction within that framework. The volume starts off with an introductory chapter that aims to provide an outline for the assessment, to be followed by an overview of the evolution of the study of focus in generative grammar, and a recapitulation of the principal issues associated with focus. These issues are taken up in the remaining chapters of the book, where various grammatical means of marking focus (as well as grammaticalization of focus marking) are analyzed in a wide variety of languages.

Risk analysis in aquaculture Lind, C.E.,Dana, G.V.,Perera, R.P.,Phillips, M.J.,2015-04-07 This publication is based on materials covered and outputs generated during the Workshop on Risk Assessment Methodologies and Tools for Aquaculture in Sub-Saharan Africa, which was jointly held by WorldFish and FAO in Siavonga, Zambia on 28 June - 2 July 2010. The workshop was delivered as a training exercise to 17 participants from seven sub-Saharan countries and was designed to highlight current methodologies and tools available for environmental risk analysis in aquaculture development. A key focus of the workshop was to encourage participants to consider hypothetical but realistic scenarios and to discuss issues relevant to evaluating the environmental risks of a given activity or scenario. This publication presents selected scenarios from the workshop and the outcomes of the deliberative process as developed by the participants. This publication is factual but not comprehensive, therefore any statements or estimations of risk do not represent the actual risks arising from the described scenario. It is intended to serve as an easily readable introduction to risk analysis, highlighting worked examples that will provide guidance on how a risk analysis may be approached in a similar situation.ÿ

Reading across the Disciplines Karen Manarin,2022-05-03 Reading Across the Disciplines offers a collection of twelve essays detailing a range of approaches to dealing with students' reading needs at the college level. Transforming reading in higher education requires more than individual faculty members working on SoTL projects in their particular fields. Teachers need to consider reading across the disciplines. In this collection, authors from Australia and North America, teaching in a variety of disciplines, explore reading in undergraduate courses, doctoral seminars, and faculty development activities. By paying attention to the particular classroom and placing those observations in conversation with scholarly literature, they create new knowledge about reading in higher education from disciplinary and cross-disciplinary perspectives. Reading Across the Disciplines demonstrates how existing research about reading can be applied to specific classroom contexts, offering models for faculty members whose own research interests may lie elsewhere but who believe in the importance of reading.

Girl Wars Cheryl Dellasega,Charisse Nixon,2007-11-01 The only book with a program that is proven to solve the problem of female bullying, a controversial issue first exposed in the bestselling *Reviving Ophelia*. Stop the Hurting Mary Pipher's bestselling *Reviving Ophelia* triggered widespread interest in the culture of preteen and teenage girls and the seeming epidemic of relational aggression (bullying) among them. Gossip, teasing, forming cliques, and other cruel behaviors are the basis of this bullying, which harms both victim and aggressor. Until now, no one has been able to offer practical and effective solutions that stop girls from hurting each other with words and actions. But in *Girl Wars*, two experts explain not only how to prevent such behavior but also how to intervene should it happen, as well as overcome the culture that breeds it. Illustrated by compelling true stories from mothers and girls, the authors offer effective, easy-to-implement strategies that range from preventive to prescriptive, such as how to -Adopt a help, don't hurt strategy -Provide positive role models -Teach communication skills online and off -Stress assertiveness, not aggressiveness -Learn conflict resolution skills -Identify alternatives to bullying behavior With their combined experience in offering and evaluating programs that combat bullying, the authors show that girls not only want to help rather than hurt each other, they can do so with guidance from concerned adults.

Craftsmen of the Army Prince Philip,2017-10-30 The Corps of Royal Electrical and Mechanical Engineers (REME) provides the Armys integral repair and recovery capability. Its soldiers are deployed at the front line and have to be capable of switching instantly from a technical role to fighting alongside those they support, as their many awards for gallantry demonstrate.This, the third volume of REMEs distinguished history covers the period from post-Cold War drawdown to the end of UK combat operations in Afghanistan, during which time REME was continuously involved in operations. The narrative knits together personal accounts of front line experiences with an explanation the political and military background, with a particular focus on equipment support issues.It explains how REME operates and deals with broader issues related to the procurement and support of equipment, and the changing organizations delivering these vital services, within which members of REME have frequently played key enabling roles.
