Dmitri Shostakovich Catalogue Derek C. Hulme, 2010-02-18

Dmitri Shostakovich (1906-75) was one of the greatest composers of the 20th century, as well as the first major Soviet composer. In the fourth edition of *Dmitri Shostakovich Catalogue: The First Hundred Years and Beyond*, Derek C. Hulme names and describes all known musical compositions of the Russian composer. More than 175 major works are annotated and discussed, including such comprehensive details as titles and subtitles, dates of composition, instrumentation, and duration; information on dedications and premieres; arrangements by the composer and others; publication details; notes on bibliographical references and the location of the autograph score; and comprehensive chronological lists of vinyl, compact disc, and visual recordings. The entries are presented chronologically and by opus number, while indexes of names and compositions provide full accessibility. Several appendixes supplement the volume, guiding readers to further information in published sources and providing information on the composer's film, radio, television, and theatre productions; his abandoned projects and obscure works; and his recordings, including box sets and special USSR recordings. An appendix also discusses the monogram DSCH, a musical motif based on his name that permeates his compositions. This new edition also includes a comprehensive chronological chart of Shostakovich's works and historical events and several plates of memorabilia.

Advancements in Antenna Measurement Martin

Krchňák, Marek Češkovič, Pavol Kurdel, Anton Panda, 2024-01-19

This book is a pioneering exploration of a new form of high-frequency attenuation chamber that has the potential to revolutionize antenna measurement techniques. The authors present an innovative concept that leverages the classical principle of changing the polarization of radio waves, eliminating

the need for traditional non-reflection chambers. By analyzing experimental results and searching for the optimal shape and composition of a depolarization panel, this monograph provides valuable insights into creating a non-reflective environment for accurately measuring the directional properties of antennas. The book delves into the methodology of frequency analysis, optimization of the depolarization panel, and the creation of a measuring workplace using this panel. It highlights the crucial attenuation phenomenon of suppressing cross-polarization coupling between transmitting and receiving antennas, enabling antenna measurements in any laboratory environment. With its promising results and practical applications in antenna technology, this publication offers a compelling and cutting-edge approach to antenna measurement that will captivate researchers, engineers, and professionals in the field.

Sequential Learning and Decision-Making in Wireless Resource Management Rong Zheng, Cuiqing Hua, 2017-01-05

This book lays out the theoretical foundation of the so-called multi-armed bandit (MAB) problems and puts it in the context of resource management in wireless networks. Part I of the book presents the formulations, algorithms and performance of three forms of MAB problems, namely, stochastic, Markov and adversarial. Covering all three forms of MAB problems makes this book unique in the field. Part II of the book provides detailed discussions of representative applications of the sequential learning framework in cognitive radio networks, wireless LANs and wireless mesh networks. Both individuals in industry and those in the wireless research community will benefit from this comprehensive and timely treatment of these topics. Advanced-level students studying communications engineering and networks will also find the content valuable and accessible.

New Critical Approaches to the Short Stories of Ernest Hemingway Jackson J. Benson, 2013-07-12 With an Overview by Paul Smith and a Checklist to Hemingway Criticism, 1975-1990 New Critical Approaches to the Short Stories of Ernest Hemingway is an all-new sequel to Benson's highly acclaimed 1975 book, which provided the first comprehensive anthology of criticism of Ernest Hemingway's masterful short stories. Since that time the availability of Hemingway's papers, coupled with new critical and theoretical approaches, has enlivened and

enlarged the field of American literary studies. This companion volume reflects current scholarship and draws together essays that were either published during the past decade or written for this collection. The contributors interpret a variety of individual stories from a number of different critical points of view—from a Lacanian reading of Hemingway’s “After the Storm” to a semiotic analysis of “A Very Short Story” to an historical-biographical analysis of “Old Man at the Bridge.” In identifying the short story as one of Hemingway’s principal thematic and technical tools, this volume reaffirms a focus on the short story as Hemingway’s best work. An overview essay covers Hemingway criticism published since the last volume, and the bibliographical checklist to Hemingway short fiction criticism, which covers 1975 to mid-1989, has doubled in size. Contributors. Debra A. Modellmog, Ben Stotzfus, Robert Scholes, Hubert Zapf, Susan F. Beegel, Nina Baym, William Braasch Watson, Kenneth Lynn, Gerry Brenner, Steven K. Hoffman, E. R. Hagemann, Robert W. Lewis, Wayne Kvam, George Monteiro, Scott Donaldson, Bernard Oldsey, Warren Bennett, Kenneth G. Johnston, Richard McCann, Robert P. Weeks, Amberys R. Social Democracy and the Crisis of Equality Carol

Johnson, 2019-02-20 This book analyses social democratic parties’ attempts to tackle inequality in increasingly challenging times. It provides a distinctive contribution to the literature on the so-called ‘crisis’ of social democracy by exploring the role of equality policy in this crisis. While the main focus is on analysing Australian Labor governments, examples are also given from a wide range of parties internationally. The book traces how a traditional focus on class has expanded to include other forms of inequality, including issues of gender, race, ethnicity and sexuality and explores both the intersections and potential

tensions that result. Meanwhile there are new challenges for equality policy arising from a changing geo-economics (the rise of Asia), the legacies of neoliberalism and the impact of technological disruption.

Stochastic Geometry and Wireless Networks François

Baccelli, Bartłomiej Błaszczyszyn, 2009 This volume bears on wireless network modeling and performance analysis. The aim is to show how stochastic geometry can be used in a more or less systematic way to analyze the phenomena that arise in this context. It first focuses on medium access control mechanisms used in ad hoc networks and in cellular networks. It then discusses the use of stochastic geometry for the quantitative analysis of routing algorithms in mobile ad hoc networks. The appendix also contains a concise summary of wireless communication principles and of the network architectures considered in the two volumes.

The Peacekeeping Failure in South Sudan Mark

Millar, 2022-08-11 In 2011, South Sudan was welcomed into the United Nations as the world's newest nation. Celebrations on the ground reflected palpable relief after more than 20 years of violent struggle. With unprecedented goodwill and optimism, the UN deployed 7,000 soldiers and another 2,000 police and civilian

peacekeepers to the country to support its transition to independence. However, the mission failed and within less than three years South Sudan was plunged into a catastrophic civil war. Using firsthand accounts from senior UN officials and referencing hitherto unseen UN documents, this book explores the role of the peacekeeping mission in that failure. It challenges the resignation with which many in academia and the media greeted the underperformance of the peacekeepers. It suggests that, even while under-resourced, they could have done much more to prevent bloodshed in the new country and protected civilians from the chaos of the first years of the conflict. The UN has thus far avoided a thorough and public examination of its actions in South Sudan. It has avoided accountability and instead rewarded failed decision-makers. This book is an attempt to re-assess the legacy of that mission and to detail how its many mistakes can and should be avoided in the future.
