Blogging in Beirut Sarah Jurkiewicz, 2018-01-31 Unlike previous media-analytic research, Sarah Jurkiewicz's anthropological study understands blogging as a social field and a domain of practice. This approach underlines the significance of blogging in practitioners' daily lives and for their self-understanding. In this context, the notion of publicness enables a consideration of publics not as static 'spheres' that actors merely enter, but as produced and constituted by social practices. The vibrant media landscape of Beirut serves as a selection of samples for an ethnographic exploration of blogging.

Networked Publics and Digital Contention Mohamed Zayani, 2015-08-03 How is the adoption of digital media in the Arab world affecting the relationship between the state and its subjects? What new forms of online engagement and strategies of resistance have emerged from the aspirations of digitally empowered citizens in the Middle East and North Africa? *Networked Publics and Digital Contention* narrates the story of the co-evolution of technology and society in Tunisia, the birthplace of the Arab uprisings. It explores the emergence of a digital culture of contention that helped networked publics negotiate their lived reality, reconfigure power relations, and ultimately redefine the locus of politics. It broadens the focus from narrow debates about the role that social media played in the Arab uprisings toward a fresh understanding of how changes in media affect the state-society relationship over time. Based on extensive fieldwork, in-depth interviews with Internet activists, and immersive analyses of online communication, this book draws our attention away from the tools of political communication and refocuses it on the politics of communication. An original

contribution to the political sociology of media, *Networked Publics and Digital Contention* provides a unique perspective on how networked Arab publics reimagine citizenship, reinvent politics, and produce change.

Syria's Uprising and the Fracturing of the Levant Emile Hokayem,2017-10-03 As an upbeat and peaceful uprising quickly and brutally descended into a zero-sum civil war, Syria has crumbled from a regional player into an arena in which a multitude of local and foreign actors compete. The volatile regional fault lines that run through Syria have ruptured during this conflict, and the course of events in this fragile yet strategically significant country will profoundly shape the future of the Levant.

The Net Delusion Evgeny Morozov,2012-02-28 The revolution will be Twittered! declared journalist Andrew Sullivan after protests erupted in Iran in June 2009. Yet for all the talk about the democratizing power of the Internet, regimes in Iran and China are as stable and repressive as ever. In fact, authoritarian governments are effectively using the Internet to suppress free speech, hone

their surveillance techniques, disseminate cutting-edge propaganda, and pacify their populations with digital entertainment. Could the recent Western obsession with promoting democracy by digital means backfire? In this spirited book, journalist and social commentator Evgeny Morozov shows that by falling for the supposedly democratizing nature of the Internet, Western do-gooders may have missed how it also entrenches dictators, threatens dissidents, and makes it harder -- not easier -- to promote democracy. Buzzwords like 21st-century statecraft sound good in PowerPoint presentations, but the reality is that digital diplomacy requires just as much oversight and consideration as any other kind of diplomacy. Marshaling compelling evidence, Morozov shows why we must stop thinking of the Internet and social media as inherently liberating and why ambitious and seemingly noble initiatives like the promotion of Internet freedom might have disastrous implications for the future of democracy as a whole.

Real-Time Diplomacy P. Seib, 2012-05-14 In light of the events of 2011, Real-Time Diplomacy examines how diplomacy has evolved as media have gradually reduced the time available to policy makers. It analyzes the workings of real-time diplomacy and the opportunities for media-centered diplomacy programs that bypass governments and directly engage foreign citizens.

Understanding Suicide Connie Goldsmith, 2016-08-01 Suicide is among the top three causes of death for young people ages 15 to 24. In fact, this global epidemic claims 41,000 lives per year in the United States alone. Suicide touches people of all ages—from those who consider and attempt suicide to those who lose a loved to suicide. Yet silence often surrounds these deaths and makes suicide difficult to understand. Looking beyond common myths and misconceptions, author Connie Goldsmith examines common risk factors and covers warning signs, ways to reach out to a suffering loved one, and precautions that can save lives. And survivors' personal stories offer honest

examinations of both grief and hope.

Kastom, property and ideology Siobhan McDonnell, Matthew Allen, Colin Filer, 2017-03-22 The relationship between customary land tenure and 'modern' forms of landed property has been a major political issue in the 'Spearhead' states of Melanesia since the late colonial period, and is even more pressing today, as the region is subject to its own version of what is described in the international literature as a new 'land rush' or 'land grab' in developing countries. This volume aims to test the application of one particular theoretical framework to the Melanesian version of this phenomenon, which is the framework put forward by Derek Hall, Philip Hirsch and Tania Murray Li in their 2011 book, *Powers of Exclusion: Land Dilemmas in Southeast Asia*. Since that framework emerged from studies of the agrarian transition in Southeast Asia, the key question addressed in this volume is whether 'land transformations' in Melanesia are proceeding in a similar direction, or whether they take a somewhat different form because of the particular nature of Melanesian political economies or social institutions. The contributors to this volume all deal with this question from the point of view of their own direct engagement with different aspects of the land policy process in particular countries. Aside from discussion of the agrarian transition in Melanesia, particular attention is also paid to the growing problem of land access in urban areas and the gendered nature of landed property relations in this region.

Armed Organizations and Political Elites in Civil Wars Erwin van Veen, 2024-06-03 This book analyses under what conditions, and with what developmental effects, armed organizations shift their 'coercive profile' during civil wars, with a focus on the recent conflicts in Syria and Iraq. The work begins with an operationalisation of the term 'political settlement', focusing on how power is organized in fragile and conflict-affected countries, and then uses this operationalization to analyse

the political settlements of contemporary Syria and Iraq, including their breakdown and transformation during recent civil wars (of 2011-today in Syria and 2014-17 in Iraq). It subsequently examines why and how elite factions have used armed organizations in times of conflict. This approach links an understanding of the broad evolution of power relations at the national level with the specific effects of the use of armed organizations on such relations. It argues for a shift from assigning fixed labels to armed organizations during civil wars to studying their coercive profile in a dynamic fashion, i.e. how armed organizations behave in terms of their use of threats and coercive force. The book introduces five profiles of coercive behaviour that demonstrate how the same organization can behave very differently at various points in time. One of these, the 'hybrid coercive profile', fills a gap in the existing civil war typology of organized armed violence by opening up the possibility of elite factions deliberately combining collaborative and competitive modes of behaviour. As an evidence base, the book provides in-depth analysis of the origins, evolution and operations of four armed organizations that have acted under a hybrid coercive profile during the Syrian and Iraqi civil wars: the Syrian Kurdish People's Defence Forces, the Eagles of the Whirlwind of the Syrian Social Nationalist Party, the Iraqi Kurdish Peshmerga and the Badr Organization. By connecting the concepts of political settlement and civil war, and applying them to specific armed organizations operating in Syria and Iraq, the book offers new insights into this nexus. This book will be of much interest to students of civil wars, conflict studies, Middle Eastern Studies and International Relations.

The Oxford Handbook of Peace History Charles Howlett, Christian Philip Peterson, Deborah D. Buffton, David L. Hostetter, 2023 The Oxford Handbook of Peace History uniquely explores the distinctive dynamics of peacemaking across time and place, and analyzing how past and present

societies have created diverse cultures of peace and applied strategies for peaceful change. The analysis draws upon the expertise of many well-respected and distinguished scholars from disciplines such as anthropology, economics, history, international relations, journalism, peace studies, sociology, and theology. This work is divided into six parts. The first three sections address the chronological sweep of peace history from the Ancient Egyptians to the present while the last three cover biographical profiles of peace advocates, key issues in peace history, and the future of peace history. A central theme throughout is that the quest for peace is far more than the absence of war or the pursuit of social justice ideals. Students and scholars, alike, will appreciate that this work examines the field of peace history from an international perspective and expands analysis beyond traditional Eurocentric frameworks. This volume also goes far beyond previously published handbooks and anthologies in answering what are the strengths and limits of peace history as a discipline, and what can it offer for the future. It also has the unique features of a state-of-the-field introduction with a detailed treatment of peace history historiography and a chapter written by a noted archivist in the field that provides a comprehensive list of peace research resources. It is a work ably suited applicable for classrooms and scholarly bookshelves--

Cyberactivism and Citizen Journalism in Egypt Courtney C. Radsch, 2016-09-23 This compelling book explores how Egyptian bloggers used citizen journalism and cyberactivism to chip away at the state's monopoly on information and recalibrate the power dynamics between an authoritarian regime and its citizens. When the Arab uprisings broke out in early 2011 and ousted entrenched leaders across the region, social media and the Internet were widely credited with playing a role, particularly when the Egyptian government shut down the Internet and mobile phone networks in an attempt to stave off the unrest there. But what these reports missed were the years of grassroots

organizing, digital activism, and political awareness-raising that laid the groundwork for this revolutionary change. Radsch argues that Egyptian bloggers created new social movements using blogging and social media, often at significant personal risk, so that less than a decade after the information revolution came to Egypt they successfully mobilized the overthrow of the state and its president.

Entrepreneurship in Power Semiconductor Devices, Power Electronics, and Electric Machines and Drive Systems Krishnan Ramu, 2020-12-07 *Entrepreneurship in Power Semiconductor Devices, Power Electronics, and Electric Machines and Drive Systems* introduces the basics of entrepreneurship and a methodology for the study of entrepreneurship in electrical engineering and other engineering fields. Entrepreneurship is considered here in three fields of electrical engineering, viz. power semiconductor devices, power electronics and electric machines and drive systems, and their current practice. It prepares the reader by providing a review of the subject matter in the three fields, their current status in research and development with analysis aspect as needed, thus allowing readers to gain self-sufficiency while reading the book. Each field's emerging applications, current market and future market forecasts are introduced to understand the basis and need for emerging startups. Practical learning is introduced in: (i) power semiconductor devices entrepreneurship through the prism of 20 startups in detail, (ii) power electronics entrepreneurship through 28 startup companies arranged under various application fields and (iii) electric machines and drive systems entrepreneurship through 15 startups in electromagnetic and 1 in electrostatic machines and drive systems. The book: (i) demystifies entrepreneurship in a practical way to equip engineers and students with entrepreneurship as an option for their professional growth, pursuit and success; (ii) provides engineering managers and corporate-level executives a detailed view of

entrepreneurship activities in the considered three fields that may potentially impact their businesses, (iii) provides entrepreneurship education in an electrical engineering environment and with direct connection and correlation to their fields of study and (iv) endows a methodology that can be effectively employed not only in the three illustrated fields of electrical engineering but in other fields as well. This book is for electrical engineering students and professionals. For use in undergraduate and graduate courses in electrical engineering, the book contains discussion questions, exercise problems, team and class projects, all from a practical point of view, to train students and assist professionals for future entrepreneurship endeavors.

The Rhetoric of Soft Power Craig Hayden, 2012 *The Rhetoric of Soft Power: Public Diplomacy in Global Contexts* provides a comparative assessment of public diplomacy and strategic communication initiatives in order to portray how Joseph Nye's notion of soft power has translated into context-specific strategies of international influence. The book examines four cases--Japan, Venezuela, China, and the United States--to illuminate the particular significance of culture, foreign publics, and communication technologies for the foreign policy ambitions of each country. This study explores the notion of soft power as a set of theoretical arguments about power, and as a reflection of how nation-states perceive what is an increasingly necessary perspective on international relations in an age of ubiquitous global communication flows and encroaching networks of non-state actors. Through an analysis of policy discourse, public diplomacy initiatives, and related programs of strategic influence, soft power in each case represents a localized set of assumptions about the requirements of persuasion, the relevance of foreign audiences to state goals, and the perception of what counts as a soft power resource. This timely analysis provides an unprecedented comparative investigation of the relationship between soft power and public diplomacy.

Awakening Democracy through Public Work Harry C. Boyte, 2021-04-30 In the face of authoritarian, divisive trends and multiplying crises, when politics-as-usual is stymied, *Awakening Democracy through Public Work* shows it is possible to build foundations for a democratic awakening grounded in deep American traditions of a citizen-centered commonwealth. *Awakening Democracy through Public Work* begins with the story of Public Achievement, a youth civic education and empowerment initiative with roots in the civil rights movement. It describes Public Achievement's first home in St. Bernard's, a low-income Catholic elementary school in St. Paul, Minnesota, and how the program spread across the country and then abroad, giving birth to the larger concept of public work. In Public Achievement, young people practice citizen politics as they tackle issues ranging from bullying, racism, and sexual harassment to playground improvements, curriculum changes, and better school lunches. They develop everyday political skills for working across differences and making constructive change. Such citizen politics, more like jazz than a set piece of music, involves the interplay and negotiation of diverse interests and views, sometimes contentious, sometimes harmonious. Public Achievement highlights young people's roles as co-creators—builders of schools, communities, and democratic society. They are not citizens in waiting, but active citizens who do public work. *Awakening Democracy through Public Work* also describes how public work can find expression in many kinds of work, from education and health to business and government. It is relevant across the sweep of society. People have experimented with the idea of public work in hundreds of settings in thirty countries, from Northern Ireland and Poland to Ghana and Japan. In Burundi it birthed a national initiative to rework relations between villagers and police. In South Africa it helped people in poor communities to see themselves as problem solvers rather than simply consumers of government services. In the US, at Denison University, public work

is being integrated into dorm life. At Maxfield School in St. Paul, it is transforming special education. In rural Missouri, it led to the emPowerU initiative of the Heartland Foundation, encouraging thousands of young people to stay in the region. In Eau Claire, Wisconsin, it generated Clear Vision, a program providing government support for citizen-led community improvements. Public work has expanded into the idea of citizen professionals working with other citizens, not on them or for them. It has also generated the idea of civic science, in which scientists see themselves as citizens and science as a resource for civic empowerment. *Awakening Democracy through Public Work* shows that we can free the productive powers of people to work across lines and differences to build a better society and create grounded hope for the future.

Performing Democracy in Iraq and South Africa Kimberly Wedeven Segall, 2013-11-08 Reflecting twenty years of research and experience—after working with guerrilla fighters in the Kurdish region of northern Iraq, with Iranian refugees in Istanbul, with interreligious reconciliation groups in Morocco, and with former political prisoners in South Africa—Segall offers a groundbreaking study of globalization, gender, and resistance in public spaces. With timely correctives to the media lens of the Arab and African Spring, the author views protest not just as an economic and political act but also as a potential space of healing and creativity amidst contentious and gendered territories. Analyzing blogs, graphic novels, performances, and public testimonials, this book is unique in its attention to local expressions and creative use of technology to speak of political identities. With its impressive range of generational and gendered voices, *Performing Democracy* suggests hybrid protests that are voicing trauma, seeking change.

Charting a Course: Strategic Choices for a New Administration Richard D. Hooker (Jr.), 2016
Excerpt from *Charting a Course: Strategic Choices for a New Administration*: The new

administration takes office in a time of great complexity. Our new President faces a national security environment shaped by strong currents: globalization; the proliferation of new, poor, and weak states, as well as nonstate actors; an enduring landscape of violent extremist organizations; slow economic growth; the rise of China and a revanchist Russia; a collapsing Middle East; and a domestic politics wracked by division and mistrust. While in absolute terms the Nation and the world are safer than in the last century, today the United States finds itself almost on a permanent war footing, engaged in military operations around the world. [...] No formal document describes a grand strategy for the United States, and indeed, many academics deny that one exists. Yet a close look at our history as a world power suggests that core interests and how we secure them have remained generally consistent over time. If grand strategy rises above particular strategies intended to secure particular objectives, many decades of focusing on nuclear deterrence, power projection, alliances and partnerships, and military and economic strength probably constitute the underpinnings of a coherent grand strategy. How we employ and leverage these instruments of national power to protect, defend, and advance the national interest is, after all, the essence of grand strategy. In a dangerous world, these pillars have provided a strong foundation for national security. If our domestic politics can achieve consensus on future threats and solutions, America is well positioned to lead and prosper in a world that will remain both dangerous and uncertain. R.D. Hooker, Jr. Director, Institute for National Strategic Studies National Defense University Washington, D.C. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and

manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Ramui Webblog 12 books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit

organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Ramui Webblog 12 books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also

allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast

collection of digitized books and historical documents. In conclusion, Ramui Webblog 12 books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous
