Surprise, Surprise Nasha Maveé, Mr. Roberto Perrelli, Mr. Axel Schimmelpfennig, 2016-10-17 This paper investigates possible drivers of volatility in the South African rand since the onset of the global financial crisis. We assess the role played by local and international economic surprises, commodity price volatility, global market risk perceptions, and local political uncertainty. As a measure of rand volatility, the study uses a market-based implied volatility indicator for the rand / U.S. dollar exchange rate. Economic surprises—the difference between market expectations and data prints—are captured by Citi's Economic Surprise Index which is available for South Africa and its main economic partners. The results suggest that rand volatility is mainly driven by commodity price volatility, and global market volatility, as well as domestic political uncertainty. In addition, economic surprises originating in the United States matter, but not those originating from South Africa, Europe, or China.

Managing Humans Michael Lopp, 2007-10-18 *Managing Humans* is a selection of the best essays from Michael Lopp's popular website *Rands in Repose* (www.randsinrepose.com). Lopp is one of the most sought-after IT managers in Silicon Valley, and draws on his experiences at Apple, Netscape, Symantec, and Borland. This book reveals a variety of different approaches for creating innovative, happy development teams. It covers handling conflict, managing wildly differing personality types, infusing innovation into insane product schedules, and figuring out how to build lasting and useful engineering culture. The essays are biting, hilarious, and always informative.

Geospatial Thinking Marco Painho, Maribel Yasmina Santos, Hardy Pundt, 2010-07-20 For the fourth consecutive year, the Association of Geographic Information Laboratories for Europe (AGILE) promoted the edition of a book with the collection of the scientific papers that were submitted as full-papers to the AGILE annual international conference. Those papers went through a competitive review

process. The 13 AGILE conference call for papers of original and unpublished fundamental scientific research resulted in 54 submissions, of which 21 were accepted for publication in this volume (acceptance rate of 39%). Published in the Springer Lecture Notes in Geoinformation and Cartography, this book is associated to the 13 AGILE Conference on Geographic Information Science, held in 2010 in Guimarães, Portugal, under the title “Geospatial Thinking”. The efficient use of geospatial information and related technologies assumes the knowledge of concepts that are fundamental components of Geospatial Thinking, which is built on reasoning processes, spatial conceptualizations, and representation methods. Geospatial Thinking is associated with a set of cognitive skills consisting of several forms of knowledge and cognitive operators used to transform, combine or, in any other way, act on that same knowledge. The scientific papers published in this volume cover an important set of topics within Geoinformation Science, including: Representation and Visualisation of Geographic Phenomena; Spatiotemporal Data Analysis; Geo-Collaboration, Participation, and Decision Support; Semantics of Geoinformation and Knowledge Discovery; Spatiotemporal Modelling and Reasoning; and Web Services, Geospatial Systems and Real-time Applications.

Letters from Robben Island Robert D. Vassen, 1999-08-31 Late one night in July, 1963, a South African police unit surrounded the African National Congress headquarters in Rivonia and arrested a group of Movement leaders gathered inside. Eventually eight of them, including Nelson Mandela, who was already serving a sentence, Walter Sisulu, Dennis Goldberg, Govan Mbeki, Raymond Mhlaba, Elias Motsoledi, Andrew Mangeni, and Ahmed Kathrada, were convicted of sabotage and, on June 12, 1964, sentenced to life in prison. Soon, these men became widely known as the Rivonia Trialists. Despite their imprisonment, the Trialists played active roles in the struggle against South Africa's racist regime. Instead of being forgotten, as apartheid officials had hoped, they became enduring symbols

in a struggle against injustice and racism. Kathrada and his colleagues were classified as high security prisoners, segregated from others and closely watched. Every activity was regulated and monitored. Among the many indignities visited upon them, the prisoners were prohibited from keeping copies of incoming and outgoing correspondence. Kathrada, or Kathy as he is known, successfully hid both. *Letters From Robben Island* contains a selection of 86 of the more than 900 pieces of correspondence Ahmed Kathrada wrote during his 26 years on Robben Island and at Pollsmoor Prison. Some were smuggled out by friends; others were written in code to hide meaning and content from prison censors. These are among his most poignant, touching, and eloquent communications. They are testimonies to Kathrada, his colleagues, and to their commitment to obtaining human dignity and freedom for all South Africans.

Transformation in Higher Education Nico Cloete, 2006 This book presents the most comprehensive and most thorough study of the developments in South African higher education and research after the first democratic elections of 1994 – that is of post-Apartheid South African higher education. This volume will provide its readers with a detailed insight into the new (i.e. post-1994) South African higher education system. The large number of experienced authors and editors involved in the book guarantees that the reader will be introduced in the new SA higher education system from a large number of perspectives that are presented in a consistent and coherent way. This book will be of interest to scholars, students, administrators, policymakers and politicians interested in South Africa, higher education and research, and policy analysis. Publications on higher education are not new. But this volume, which is the first of its kind as a collective effort of tracing and examining the twists and turns taken by processes of change in the South African higher education system in a context of profound societal and global transformation, adds a fresh dimension to the debate. In its

examination of the extent to which the changes were in line with policy intentions, particularly with regard to equity, democratisation, responsiveness and efficiency, and how a new institutional landscape started emerging, it makes a momentous contribution to the current debate about higher education restructuring. Njabulo Ndebele, Vice-chancellor, University of Cape Town and Chair of the South African Association of University Vice-chancellors This book addresses a rich variety of issues on South African higher education. It puts these in the relevant context of the process of globalization and it shows that the South African experiences offer us a lot to learn. Highly recommended for those who are intrigued by the innovations taking place in South African higher education as well as for those who intend to grasp the effects of globalization. Frans van Vught, Rector Magnificus and founding Director of the Center for Higher Education Policy Studies, University of Twente, The Netherlands Reflection is a crucial ingredient to learning. In this book on higher education we have reflections on a unique period in the history of a country that managed its transition to democracy in a way that was unique, but from which we can all learn. Higher education in South Africa played a vital role in that transition and was part of the many tensions, choices and influences. They have been thoughtfully captured. Brenda Gourley, Vice-chancellor, The Open University, UK and board member, Centre for Higher Education Transformation. No contemporary higher education system has changed as dramatically as that in South Africa. This book, rich in data, examines the changes that took place and offers insights into how change frequently cannot be predicted. The analysis captures the excitement, high expectations, remarkable successes, and failures in the transformation of the apartheid system of higher education. This excellent study provides rich fare for comparative analysis. Fred M. Hayward, American Council on Education Pilot Project, Executive Vice President, Council for Higher Education Accreditation, US.

Boundary Element Methods in Engineering Balkrishna S. Annigeri,Kadin Tseng,2012-12-06

The Boundary Element Method (BEM) has become established as an effective tool for the solutions of problems in engineering science. The salient features of the BEM have been well documented in the open literature and therefore will not be elaborated here. The BEM research has progressed rapidly, especially in the past decade and continues to evolve worldwide. This Symposium was organized to provide an international forum for presentation of current research in BEM for linear and nonlinear problems in solid and fluid mechanics and related areas. To this end, papers on the following topics were included: rotary wing aerodynamics, unsteady aerodynamics, design and optimization, elasticity, elasto dynamics and elastoplasticity, fracture mechanics, acoustics, diffusion and wave motion, thermal analysis, mathematical aspects and boundary/finite element coupled methods. A special session was devoted to parallel/vector supercomputing with emphasis on massive parallelism. This Symposium was sponsored by United Technologies Research Center (UTRC) , NASA Langley Research Center, and the International Association of Boundary Element Methods (IABEM) . We thank the UTRC management for their permission to host this Symposium. In particular, we thank Dr. Arthur S. Kesten and Mr. Robert E. Olson for their encouragement and support. We gratefully acknowledge the support of Dr. E. Carson Yates, Jr. of NASA Langley, Prof. Luigi Morino, Dr. Thomas A.

The Consequences of Policy Uncertainty Sandile Hlatshwayo,Mr.Magnus

Saxegaard,2016-09-23 In recent years, the link between the real effective exchange rate (REER) and exports in South Africa has weakened. While exports still rise in response to REER depreciations, the REER-export elasticity is below historical estimates. The literature has put forward a number of possible explanations, from multi-national supply-chains to muted exchange rate pass-through. This

research explores the role of policy uncertainty in reducing the responsiveness of exports to relative price changes. We construct a novel “news chatter” measure of policy uncertainty and examine how it, paired with other supply-side constraints, can improve our understanding of export performance. We find that increased policy uncertainty diminishes the responsiveness of exports to the REER and has short and long-run level effects on export performance. Finally, we show that a measure of competitiveness that adjusts for uncertainty and supply-side constraints greatly outperforms the REER in tracking exports performance.

Castells in Africa Muller, Johan,Cloete, Nico,2017-11-28 Castells in Africa: Universities and Development collects the papers produced by Manuel Castells on his visits to South Africa, and publishes them in a single volume for the first time. The book also publishes a series of empirically-based papers which together display the multi-faceted and far-sighted scope of his theoretical framework, and its fecundity for fine-grained, detailed empirical investigations on universities and

development in Africa. Castells, in his afterword to this book, always looking forward, assesses the role of the university in the wake of the upheavals to the global economic order. He decides the university's function not only remains, but is more important than ever. This book will serve as an introduction to the relevance of his work for higher education in Africa for postgraduate students, reflective practitioners and researchers. Includes two previously unpublished public lectures and an Afterword by Manuel Castells.

An Introduction to Pastoral Care Charles V. Gerkin, 1997 With generative wisdom, Gerkin moves

beyond the predominance of the psychotherapeutic paradigm in pastoral care to a dynamic, interactive process which balances faith, culture, community, and individual well-being. . . . Gerkin's history of pastoral care is skillful. . . . His analysis of the current transitions in the field of care will make this book a classic.--Jeanne Stevenson Moessner, Columbia Theological Seminary, Decatur, and the Georgia Association for Pastoral Care Out of the abundance of his many years as a pastoral caregiver and theologian, Gerkin introduces readers to the history, theory, and practice of pastoral care. This book represents the best of Protestant liberal pastoral theology and fills a long-standing gap. . . . The narrative-hermeneutical paradigm which Gerkin offers holds and works with many of the complexities of pastoral care in postmodern times.--Carrie Doehring, School of Theology, Boston University Gerkin's Introduction to Pastoral Care breaks new ground for an introductory text in its emphasis on care as 'the central metaphor of life in the Christian community.' Thus the scope is much larger than the more usual focus only on individual and family needs. He is deeply sensitive to both individual and community dimensions through his quadrilateral nexus of tradition, individuals and family, community, and cultural context.--James N. Lapsley, Princeton Theological Seminary The formula appears simple: take the very best of pastoral care theory and research of the past, build upon it the best of contemporary literature and practice in the pastoral arts and sciences, season it with rich experiences of a pioneer in the pastoral care, counseling, and education movement, and you have a solid bridge to the 21st century. Gerkin has proven the formula. . . . [Gerkin] articulates a pastoral care for the 21st century.--Orlo C. Strunk, Jr., Pastoral Psychotherapist at The Coastal Samaritan Center, Myrtle Beach, South Carolina.

Academic Fault Lines Patricia J. Gumport,2019-07-16 How did public higher education become an

industry? This unprecedented account reveals how campus leaders and faculty preserved the vitality and core values of public higher education despite changing resources and expectations. American public higher education is in crisis. After decades of public scrutiny over affordability, access, and quality, indictments of the institution as a whole abound. Campus leaders and faculty report a loss of public respect resulting from their alleged unresponsiveness to demands for change. But is this loss of confidence warranted? And how did we get to this point? In *Academic Fault Lines*, Patricia J. Gumport offers a compelling account of the profound shift in societal expectations for what public colleges and universities should be and do. She attributes these new attitudes to the ascendance of industry logic—the notion that higher education must prioritize serving the economy. Arguing that industry logic has had far-reaching effects, Gumport shows how this business-oriented mandate has prompted colleges to restructure for efficiency gains, adopt more corporate forms, develop deeper ties with industry, and mold academic programs in the interest of enhancing students' future employment prospects. She also explains how industry logic gained traction and momentum, altering what constitutes legitimacy for public higher education. Yet Gumport's narrative is by no means defeatist. Drawing on case studies of nine public colleges and universities, as well as more than 200 stakeholder interviews, Gumport's nuanced account conveys the successful efforts of leaders and educators to preserve and even strengthen fundamental public values such as educational access, knowledge advancement regardless of currency, and civic responsibility. Ultimately, *Academic Fault Lines* demonstrates how intrepid faculty and administrators engaged their communities both on and off campus, collaborating and inventing win-win scenarios to further public higher education's expanding legacy of service to all citizens while preserving its centrality to society and the world.
