lncRNAs in Cancer Metastasis and Therapy Resistance Aamir Ahmad, Palmiro Poltronieri, Shahab Uddin, 2023-10-30 lncRNAs (long non-coding RNAs) are the relatively longer (more than 200 nucleotides long) subtypes of ncRNAs (non-coding RNAs) i.e the RNAs that do not code for any proteins. However, even without themselves being translated, lncRNAs impact the cellular gene expressions and functions in ways that are just beginning to be explored. The metastasis of human cancers as well as acquired resistance against the administered therapeutics are two major factors responsible for the cancer-associated mortality.

Breeding Research on Aromatic and Medicinal Plants Christopher B Johnson, Chlodwig Franz, 2002-10-08 The field of medicinal/aromatic plant breeding is growing and changing?this resource will help you stay up to date! In this essential book, researchers from large and small laboratories and institutions throughout Europe and the Mediterranean region explore recent developments in the selection and breeding of aromatic and medicinal plants. They take varied approaches?from traditional breeding to the use of molecular markers?and complement them with up-to-date information on biodiversity and resource conservation. From the editors: ?It is widely recognized that a strategy of `conservation through use,? by which plant collection via wild harvesting is replaced by controlled cultivation, is the best way forward if we are to balance human demands with the necessary conservation of the biodiversity represented by these species. That provides one major driving force for research in this field. Another concerns the very real need for improving the quality control of products on the market, both to satisfy consumer demand and to conform with the (justifiably) increasing requirements for standardization and precise identification of the composition of the plant materials being sold for human use. We hope that this volume will give readers a taste of the exciting developments in the field.? Breeding Research on Aromatic and Medicinal Plants examines: breeding for resistance and abiotic factors manipulating natural product accumulation through genetic engineering biochemical and molecular regulation of essential oil accumulation economic and legal considerations that breeders will encounter the ethical aspects of breeding these plants

Dyslexia in Higher Education Amanda T. Abbott-Jones, 2021-11-04 People can best help dyslexic students once they understand dyslexia's association with anxiety and effective coping strategies, both cognitively and emotionally. By highlighting the perspectives of dyslexic students, this book evidences the prevalence of anxiety in dyslexic communities. The shared experience from a range of dyslexic learners pinpoints best practice models and helps combat the isolation felt by many with learning difficulties. The author targets academic areas where students struggle, offering techniques to overcome these barriers. Such obstacles are not always due to cognitive factors but may be associated with negative experiences, leading to fear and uncertainty. Recounting these sticking points through student voices, rather than from a staff viewpoint, enables readers to find meaningful solutions to dyslexia-related problems. Through this dynamic methodology, the book shows researchers and practitioners how to understand dyslexic needs on an emotional level, while presenting dyslexic readers with practical coping methods.
