Urban Growth in Emerging Economies Gordon McGranahan,George Martine,2014-04-29 Along with globalization, urban transitions have been central in the southward shift in economic power towards the newly emerging economies. As this book shows, however, these transitions have not been painless, and it is important for the rest of the urbanizing world to learn from the mistakes. It examines the role of urbanization and urban growth in the emerging economies, taking the BRICS countries (Brazil, Russia, India, China and South Africa) as case studies. Their different approaches towards urbanization have shaped their historical development paths and assisted or constrained their futures. Several of the BRICS bear heavy burdens from past failures to accommodate urban growth inclusively and efficiently, and many other urbanizing countries in Asia and Africa are in danger of replicating their mistakes. The overriding lesson of the book is that cities and nations must anticipate urbanization, and accommodate urban growth pro-actively, so as not to be left with an enduring legacy of inequalities and lost opportunities. This book is aimed at students and researchers in urban studies and development studies. It will also be of interest to policy advisors concerned with urbanization and the role of cities in a country's development

Potential Impacts of Climate Change on U.S. Transportation
Committee on Climate Change and U.S. Transportation,Division
on Earth and Life Studies,2008-07-16 While every mode of
transportation in the U.S. will be affected as the climate changes,
potentially the greatest impact on transportation systems will be
flooding of roads, railways, transit systems, and airport runways
in coastal areas because of rising sea levels and surges brought
on by more intense storms, says a new report from the National
Research Council. Though the impacts of climate change will vary
by region, it is certain they will be widespread and costly in
human and economic terms, and will require significant changes
in the planning, design, construction, operation, and maintenance
of transportation systems. The U.S. transportation system was
designed and built for local weather and climate conditions,
predicated on historical temperature and precipitation data. The
report finds that climate predictions used by transportation
planners and engineers may no longer be reliable, however, in the
face of new weather and climate extremes. Infrastructure pushed
beyond the range for which it was designed can become stressed
and fail, as seen with loss of the U.S. 90 Bridge in New Orleans
after Hurricane Katrina.

Urban Future 21 Peter Hall,Ulrich Pfeiffer,2013-09-13
Prepared for the World Commission on Twenty-First Century
Urbanization Conference in Berlin in July 2000. This book is an
entirely new and comprehensive review of the state of world
urban development at the millennium and a forecast of the main
issues that will dominate urban debates in the next 25 years. It is
the most significant book on cities and city planning problems to
appear for many years.

A Geography of Russia and Its Neighbors Mikhail S.
Blinnikov,2021-02-17 Authoritative yet accessible, the definitive
undergraduate text on Russian geography and culture has now

been thoroughly revised with current data and timely topics, such as the annexation of Crimea and Sevastopol and other background for understanding Russia's 2022 invasion of Ukraine. Thematic chapters provide up-to-date coverage of Russia's physical, political, cultural, and economic geography. Regional chapters focus on the country's major regions and the other 14 former Soviet republics. Written in a lucid, conversational style by a Russian-born international expert, the concise chapters interweave vivid descriptions of urban and rural landscapes, examinations of Soviet and post-Soviet life, deep knowledge of environmental and conservation issues, geopolitical insights, engaging anecdotes, and rigorous empirical data. Over 200 original maps, photographs, and other figures are also available as PowerPoint slides at the companion website, many in color. New to This Edition *Separate chapter on Ukraine and Crimea, covering events through 2019. *Timely topics--the political crisis in Ukraine and annexation of Crimea and Sevastopol; the return of Putin as president; climate change and environmental degradation; economic slowdown; political shifts in the republics; the role of Russian-backed forces in Syria, Libya, and Central African Republic; changes in Russia–United States relations; and more. *Thoroughly updated population, economic, and political data. *80 new or updated figures, tables, and maps. Pedagogical Features *End-of-chapter review questions, suggested assignments, and in-class exercises. *Within-chapter vignettes about Russian places, culture, and history. *End-of-chapter Internet resources and suggestions for further reading. *Companion website with all figures and maps from the book, many in full color.

Implementing Climate and Global Change Research National Research Council,Division on Engineering and Physical Sciences,Division of Behavioral and Social Sciences and Education,Division on Earth and Life Studies,Committee to Review the U.S. Climate Change Science Program Strategic

Plan,2004-08-16 The report reviews a draft strategic plan from the U.S. Climate Change Science Program, a program formed in 2002 to coordinate and direct U.S. efforts in climate change and global change research. The U.S. Climate Change Science Program incorporates the decade-old Global Change Research Program and adds a new component -the Climate Change Research Initiative-whose primary goal is to measurably improve the integration of scientific knowledge, including measures of uncertainty, into effective decision support systems and resources.

Great Siberian Migration Donald Treadgold,2015-12-08 What were the causes, characteristics, and effects of the great flood of migration over the Ural Mountains into Siberia in the late 19th and 20th centuries? The author studies the background conditions fostering the migration and then the migration itself: its actual course; the establishment of settlements; the legal, political, and economic factors involved. It is the thesis of this book that the Siberian migration was related to other developments in Russian society of late Tsarist times which were tending to break clown legal barriers between social classes and to provide all groups with greater access to economic opportunity. Originally published in 1957. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished

backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Narrative Policy Analysis Emery Roe,1994-11-04 Narrative Policy Analysis presents a powerful and original application of contemporary literary theory and policy analysis to many of today's most urgent public policy issues. Emery Roe demonstrates across a wide array of case studies that structuralist and poststructuralist theories of narrative are exceptionally useful in evaluating difficult policy problems, understanding their implications, and in making effective policy recommendations. Assuming no prior knowledge of literary theory, Roe introduces the theoretical concepts and terminology from literary analysis through an examination of the budget crises of national governments. With a focus on several particularly intractable issues in the areas of the environment, science, and technology, he then develops the methodology of narrative policy analysis by showing how conflicting policy stories often tell a more policy-relevant meta-narrative. He shows the advantage of this approach to reading and analyzing stories by examining the ways in which the views of participants unfold and are told in representative case studies involving the California Medfly crisis, toxic irrigation in the San Joaquin Valley, global warming, animal rights, the controversy over the burial remains of Native Americans, and Third World development strategies. Presenting a bold innovation in the interdisciplinary methodology of the policy sciences, Narrative Policy Analysis brings the social sciences and humanities together to better address real-world problems of public policy—particularly those issues characterized by extreme uncertainty, complexity, and polarization—which, if not more effectively managed now, will plague us well into the next

century.

Shaping Immigration News Rodney Benson,2013-08-19 This book compares French and US news coverage of immigration from the 1970s to the 2000s.

The SAGE Handbook of Media and Migration Kevin Smets,Koen Leurs,Myria Georgiou,Saskia Witteborn,Radhika Gajjala,2019-10-31 Migration moves people, ideas and things. Migration shakes up political scenes and instigates new social movements. It redraws emotional landscapes and reshapes social networks, with traditional and digital media enabling, representing, and shaping the processes, relationships and people on the move. The deep entanglement of media and migration expands across the fields of political, cultural and social life. For example, migration is increasingly digitally tracked and surveilled, and national and international policy-making draws on data on migrant movement, anticipated movement, and biometrics to maintain a sense of control over the mobilities of humans and things. Also, social imaginaries are constituted in highly mediated environments where information and emotions on migration are constantly shared on social and traditional media. Both, those migrating and those receiving them, turn to media and communicative practices to learn how to make sense of migration and to manage fears and desires associated with cross-border mobility in an increasingly porous but also controlled and divided world. The SAGE Handbook of Media and Migration offers a comprehensive overview of media and migration through new research, as well as a review of present scholarship in this expanding and promising field. It explores key interdisciplinary concepts and methodologies, and how these are challenged by new realities and the links between contemporary migration patterns and its use of mediated processes. Although primarily grounded in media and communication studies, the Handbook builds on research in the fields of sociology, anthropology, political science, urban studies, science and

technology studies, human rights, development studies, and gender and sexuality studies, to bring to the forefront key theories, concepts and methodological approaches to the study of the movement of people. In seven parts, the Handbook dissects important areas of cross-disciplinary and generational discourse for graduate students, early career researcher, migration management practitioners, and academics in the fields of media and migration studies, international development, communication studies, and the wider social science discipline. Part One: Keywords and Legacies Part Two: Methodologies Part Three: Communities Part Four: Representations Part Five: Borders and Rights Part Six: Spatialities Part Seven: Conflicts

Global Islamophobia George Morgan,2016-04-22 The decade since 9/11 has seen a decline in liberal tolerance in the West as Muslims have endured increasing levels of repression. This book presents a series of case studies from Western Europe, Australia and North America demonstrating the transnational character of Islamophobia. The authors explore contemporary intercultural conflicts using the concept of moral panic, revitalised for the era of globalisation. Exploring various sites of conflict, Global Islamophobia considers the role played by 'moral entrepreneurs' in orchestrating popular xenophobia and in agitating for greater surveillance, policing and cultural regulation of those deemed a threat to the nation's security or imagined community. This timely collection examines the interpenetration of the global and the local in the West's cultural politics towards Islam, highlighting parallels in the responses of governments and in the worrying reversion to a politics of coercion and assimilation. As such, it will be of interest to scholars of sociology and politics with interests in race and ethnicity; citizenship and assimilation; political communication, securitisation and The War on Terror; and moral panics.

Data Politics Didier Bigo,Engin Isin,Evelyn Ruppert,2019-03-13 Data has become a social and political issue

because of its capacity to reconfigure relationships between states, subjects, and citizens. This book explores how data has acquired such an important capacity and examines how critical interventions in its uses in both theory and practice are possible. Data and politics are now inseparable: data is not only shaping our social relations, preferences and life chances but our very democracies. Expert international contributors consider political questions about data and the ways it provokes subjects to govern themselves by making rights claims. Concerned with the things (infrastructures of servers, devices, and cables) and language (code, programming, and algorithms) that make up cyberspace, this book demonstrates that without understanding these conditions of possibility it is impossible to intervene in or to shape data politics. Aimed at academics and postgraduate students interested in political aspects of data, this volume will also be of interest to experts in the fields of internet studies, international studies, Big Data, digital social sciences and humanities. The Open Access version of this book, available at https://www.routledge.com/Data-Politics-Worlds-Subjects-Rights/ Bigo-Isin-Ruppert/p/book/9781138053267, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

The Cambridge Companion to Narrative David Herman,2007-07-19 The Cambridge Companion to Narrative provides a unique and valuable overview of current approaches to narrative study. An international team of experts explores ideas of storytelling and methods of narrative analysis as they have emerged across diverse traditions of inquiry and in connection with a variety of media, from film and television, to storytelling in the 'real-life' contexts of face-to-face interaction, to literary fiction. Each chapter presents a survey of scholarly approaches to topics such as character, dialogue, genre or language, shows how those approaches can be brought to bear on a relatively well-

known illustrative example, and indicates directions for further research. Featuring a chapter reviewing definitions of narrative, a glossary of key terms and a comprehensive index, this is an essential resource for both students and scholars in many fields, including language and literature, composition and rhetoric, creative writing, jurisprudence, communication and media studies, and the social sciences.

   Racial Criminalization of Migrants in the 21st Century Professor Salvatore Palidda,2013-02-28 Over the last two decades in the West, there has been a significant increase in the arrest, imprisonment and detention of migrants. The racial criminalization and victimization of migrants and Roma people has led judicial authorities, local governments, the police, mass media and the general population to perceive migrants and 'gypsies' as responsible for a wide range of offences. Taking into consideration the political and cultural conditions that affect and interconnect societies of emigration and immigration, the contributors examine and compare a range of cases in Europe and the United States. The contributions demonstrate how the persecution of the 'current enemy' is the 'total political fact' of the 21st century in that it ensures consensus and business, or what might be termed the 'crime deal' of today. This provocative book has international appeal and will be a valuable resource for academics, researchers and policymakers with an interest in migration and social and ethnic control.

Narrative Michael J. Toolan,2001 This classic text has been substantially rewritten. Narrative explores a range of written, spoken, literary and non-literary narratives. It shows what systematic attention to language can reveal about the narratives themselves, their tellers, and those to whom they are addressed. New material includes sections on gendered narrative, film narrative and a discussion of ways in which the internet and global television are changing conceptions of narrative.

Gender and Migration Christiane Timmerman,Maria Lucinda Fonseca,Lore Van Praag,Sónia Pereira,2018-11-23 The impact of gender on migration processes Considering the dynamic and reciprocal relationship between gender relations and migration, the contributions in this book approach migration dynamics from a gender-sensitive perspective. Bringing together insights from various fields of study, it is demonstrated how processes of social change occur differently in distinct life domains, over time, and across countries and/or regions,

influencing the relationship between gender and migration. Detailed analysis by regions, countries, and types of migration reveals a strong variation regarding levels and features of female and male migration. This approach enables us to grasp the distinct ways in which gender roles, perceptions, and relations, each embedded in a particular cultural, geographical, and socioeconomic context, affect migration dynamics. Hence, this volume demonstrates that gender matters at each stage of the migration process. In its entirety, Gender and Migrationgives evidence of the unequivocal impact of gender and gendered structures, both at a micro and macro level, upon migrant's lives and of migration on gender dynamics.
