CT Atlas of Adult Congenital Heart Disease Wojciech Mazur,Marilyn J. Siegel,Tomasz Miszański-Jamka,Robert Pelberg,2013-07-01 The aims and scope of this atlas include a complete review of the embryology of the normal heart, the normal cardiac anatomy along with a complete discussion of the terms and definitions used to identify and clarify both normal and abnormal anatomy. In addition, techniques of cardiac CT angiography as it pertains to imaging congenital abnormalities are discussed including radiation concepts and radiation saving techniques. The bulk of this book then goes on to completely review the field of adult congenital heart disease using text and more importantly a multitude of pictorial examples (in color and grey scale) to demonstrate the abnormalities. Drawings accompany each picture to better explain the example. Furthermore, difficult and complex anatomical examples are supplemented with digital images and movies to aid in illustrating and understanding the anatomy. Each general set of anomalies as well as each specific abnormality or set of abnormalities includes a concise and simple review of the embryology and epidemiology of the abnormality as well as a concise explanation of the anatomy of the abnormality. In addition, the methods to identify and recognize the abnormality by computed tomography is discussed. Finally, the prognosis and common treatment options for the anomaly are addressed within this comprehensive book.

Annual Energy Outlook 2016 With Projections to 2040 Energy Dept., Energy Information Administration,2017-02-15 The Annual Energy Outlook 2016 presents long-term projections of energy supply, demand, and prices through 2040. The projections, focused on U.S. energy markets, are based on results from EIA's National Energy Modeling System which enables EIA to make projections under alternative, internally consistent sets of assumptions.

Asian Development William E. James,Seiji Naya,Gerald M. Meier,1989 While the world's attention has been focused on the spectacular economic success of Japan and Korea, the less developed countries of Asia have often been neglected. Asian Development closes the gap. In nontechnical style and with minimal mathematics, it presents an in-depth perspective on the economic development of fourteen countries in East, Southeast, and South Asia. Asian Development is mainly a story of success. Though some problems remain, Asian countries have shown remarkable resilience in responding to sharp changes in the international economy--oil shocks, world recession and inflation, exchange-rate and interest-rate fluctuations, and rapid technological change. The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies. Looking back they comment: In the past, growth of the United States and Japan pulled up the growth rates of the smaller economies in the region. Looking forward, they predict: In the future, increasingly it will be the growth of the Asian developing countries that acts as a catalyst to growth in the more advanced economies.

Multispectral and Hyperspectral Remote Sensing Data for Mineral Exploration and Environmental Monitoring of Mined Areas Amin Beiranvand Pour,Basem Zoheir,Biswajeet Pradhan,Mazlan Hashim,2021-09-01 In recent decades, remote sensing technology has been incorporated in numerous mineral exploration projects in metallogenic provinces around the world. Multispectral and hyperspectral sensors play a significant role in affording unique data for mineral exploration and environmental hazard monitoring. This book covers the advances of remote sensing data processing algorithms in mineral exploration, and the technology can be used in monitoring and decision-making in relation to environmental mining hazard. This book presents state-of-the-art approaches on recent remote sensing and GIS-based mineral prospectivity modeling, offering excellent information to professional earth scientists, researchers, mineral exploration communities and mining companies.

Advances in Electrochemical Science and Engineering ,2008-07-11 Volume 6 in the well-established series Advances in Electrochemical Science and Engineering covers - among others - such important topics as time dependent modulation techniques and computer modeling by continuum and non-continuum methods. As in all previous volumes, the editors have succeeded in selecting highly topical areas of electrochemical research and in presenting authors who are leaders in their fields. The result is a compelling set of reviews which serves equally well as an excellent and up-to-date source of information for experienced researchers active in the field as well as an introduction for newcomers. From reviews of previous volumes: 'This is an essential book for researchers in electrochemistry; it covers areas of both fundamental and practical importance, with reviews of high quality. The material is very well presented and the choice of topics reflects a balanced editorial policy that is welcomed.' The Analyst

Analysis of Complex Surveys C. J. Skinner,D. Holt,T. M. F. Smith,1989-11-24 This study discusses appropriate principles and methods for the analysis of surveys, such as stratified multi-stage sampling, as well as the complex structure of the populations upon which these designs are based. It features essays on current research written by international experts.

Esophageal Squamous Cell Carcinoma Nobutoshi Ando,2014-10-22 Esophageal cancer causes an estimated 386,000 deaths worldwide and is the sixth most common cause of death for men. The background

characteristics of esophageal cancer treatment are markedly different between Asian and Western countries, however. In tumor histology, squamous cell carcinoma associated with smoking and alcohol consumption is overwhelmingly prevalent in Asia, whereas adenocarcinoma associated with Barrett's metaplasia is markedly prevalent in the West. In Asia, especially in Japan, the key persons who play important roles in the management of esophageal cancer patients are surgeons; in the West those roles are filled by medical and radiation oncologists as well as surgeons. The philosophy of surgeons regarding cancer surgery varies from locoregional to local tumor control, particularly in focusing on lymph node dissection. Physicians' approach to surgical adjuvant therapy differs, therefore, between Asia and the West. Considering these East-West differences in esophageal cancer treatment, the currently available results of Western evidence should not be considered directly applicable to esophageal cancer in Asia. In this book, the authors discuss the knowledge base in Japan in terms of treatment of esophageal squamous cell carcinoma. Since this volume contains a wide spectrum of current information and addresses topics surrounding the treatment of patients with esophageal squamous cell carcinoma, it is highly relevant to Asian physicians and researchers as well as to their counterparts in the West.

Nano-Energetic Materials Shantanu Bhattacharya, Avinash Kumar Agarwal, T. Rajagopalan, Vinay K. Patel, 2018-11-09 This book presents the latest research on the area of nano-energetic materials, their synthesis, fabrication, patterning, application and integration with various MEMS systems and platforms. Keeping in mind the applications for this field in aerospace and defense sectors, the articles in this volume contain contributions by leading researchers in the field, who discuss the current challenges and future perspectives. This volume will be of use to researchers working on various applications of high-energy research.

Magnetic Resonance Imaging of Congenital Heart Disease Mushabbar A. Syed, Raad H. Mohiaddin, 2012-12-19 This textbook is alone in focusing on the subject of cardiac magnetic resonance (CMR) imaging in pediatric and adult patients with congenital heart disease. The topic of congenital heart disease imaging is usually relegated to a single chapter in most general CMR texts. The expanding scope of CHD warrants a text dedicated to covering CHD and CMR imaging in detail. Our proposed book aims to be a comprehensive and authoritative text on this subject. This book is a multi-authored, illustrated text that includes supplementary access to a number of clinical videos. Authors have been selected from imaging experts in the most medically advanced areas of the world, heavily weighted by experts in the US and Europe to produce the quintessential reference in this topic.

Sensors and Microsystems G. Di Francia, C. Di Natale, B. Alfano, S. De Vito, E. Esposito, G. Fattoruso, F. Formisano, E. Massera, M. L. Miglietta, T. Polichetti, 2020-02-21 This book showcases the state of the art in the field of sensors and microsystems, revealing the impressive potential of novel methodologies and technologies. It covers a broad range of aspects, including: bio-, physical and chemical sensors; actuators; micro- and nano-structured materials; mechanisms of interaction and signal transduction; polymers and biomaterials; sensor electronics and instrumentation; analytical microsystems, recognition systems and signal analysis; and sensor networks, as well as manufacturing technologies, environmental, food and biomedical applications. The book gathers a selection of papers presented at the 20th AISEM National Conference on Sensors and Microsystems, held in Naples, Italy in February 2019, the event brought together researchers, end users, technology teams and policy makers.

Aortopathy Koichiro Niwa, Harald Kaemmerer, 2017-02-09 This is the first textbook to focus on Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic - an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction - is getting more and more attention among cardiovascular physicians. This is the first book to refer for cardiologists, pediatric cardiologists, surgeons, ACHD specialists, etc. to acquire thorough knowledge on Aortopathy.

Targets, Tracers and Translation – Novel Radiopharmaceuticals Boost Nuclear Medicine Gerald Reischl, 2019-09-20 This is the fourth Special Issue in Pharmaceuticals within the last six years dealing with aspects of radiopharmaceutical sciences. It demonstrates the significant interest and increasing relevance to ameliorate nuclear medicine imaging with PET or SPECT, and also radiotherapeutical procedures. Numerous targets and mechanisms have been identified and have been under investigation over the previous years, covering many fields of medical and clinical research. This development is well illustrated by the articles in the present issue,

including 13 original research papers and one review, covering a broad range of actual research topics in the field of radiopharmaceutical sciences.

Text, Speech and Dialogue Petr Sojka,Aleš Horak,Ivan Kopecek,Karel Pala,2012-08-08 This book constitutes the refereed proceedings of the 15th International Conference on Text, Speech and Dialogue, TSD 2012, held in Brno, Czech Republic, in September 2012. The 82 papers presented together with 2 invited talks were carefully reviewed and selected from 173 submissions. The papers are organized in topical sections on corpora and language resources, speech recognition, tagging, classification and parsing of text and speech, speech and spoken language generation, semantic processing of text and speech, integrating applications of text and speech processing, machine translation, automatic dialogue systems, multimodal techniques and modeling.

Novel Trends in Electroorganic Synthesis Sigeru Torii,2013-03-09 Among the topics of interest to organic chemists today are the versatility and uniqueness of electrolysis procedures in organic synthesis, as well as the latest advances in methodology, including basic concepts for the design of electrolysis conditions and apparatus. The International Symposium on Electroorganic Synthesis met in Kurashiki, Japan, in September 1997 for lectures on all aspects of current research in the field. This volume comprising the papers from the symposium consists of two parts. Part I, Electrooxidation, includes papers on alcohols and phenols, olefins and aromatics, halogenation, polymers, and electrodes, among others. Included in Part II, Electroreduction, are papers on carbonyl compounds, halogen-containing compounds, reaction with EG bases, and metal complexes. The novel trends presented here will be of special interest to researchers and graduate students in electroorganic chemistry and are a valuable resource for all organic chemists.

Bionanomaterials Ravindra Pratap Singh,Kshitij R. B. Singh,2021 This reference text brings together comprehensive reviews of the latest research in the field of bionanomaterials, with a focus on fundamentals and biomedical applications. Detailed coverage of the classification, properties and synthesis of bionanomaterials is provided to enhance readers' understanding. The book combines new ideas to uplift the advancement of bionanomaterials in biomedical research and provides a valuable reference for researchers and advanced students in the fields of biomaterials, bionanotechnology and bioengineering. The major applications covered include nanobiosensing, nanomedicine, diagnostics, therapeutics, tissue engineering and green bionanotechnology. The properties and applications of synthetic bionanomaterials and molecularly-imprinted polymer-based bionanomaterials are also included.

Brazil, Industrial Policies and Manufactured Exports M. Peñalver,World Bank,1983 This review of Brazil's trade policy focuses on the manufacturing industry and its impact on industrial efficiency and manufactured export growth. It includes discussion of the Brazilian experience with policies to promote and regulate the development and acquisition of industrial technology and their impact on output and exports. The report is organized in three separate parts: (i) background on industrial development; (ii) a review of trade policies, concentrating on a quantification of the relative incentives for production oriented toward the domestic market and for exports; and (iii) a review of technology policy, including development of human resources, basic research and development, industrial technology, and technology transfer. Three case studies exemplify the main types of technological transfer. The report does not attempt to elaborate all possible policy implications but to present the main information and analytical tools to be considered in the preparation and evaluation of policy alternatives.

Unveiling the Magic of Words: A Overview of "Rate5 Weight Loss Programs 2915"
