Public Sector Performance and Development Cooperation in Rwanda Stephan Klingebiel, Victoria Gonsior, Franziska Jakobs, Miriam Nikitka, 2016-11-30 This study provides a conceptual framework for analysing Results-Based Approaches to improving public sector effectiveness and efficiency according to their actor constellation and shared characteristics. Though the importance of functioning public sector agencies and organizations for sustainable development is accepted, public sector reform efforts have achieved only modest success. Results-Based Approaches aim at improving public sector performance through the establishment of reward modalities on the domestic and international levels, and the authors evaluate the potential of these approaches to provide an entry point for development cooperation. Applying their framework to empirical data obtained from fieldwork in Rwanda, they analyse the main domestic performance approach - Imhigo - and suggest how this might be strengthened.

Acolhimento de crianças e adolescentes Dalízia Amaral Cruz, Elson Ferreira Costa, Celina Maria Colino Magalhães, Lília Iêda Chaves Cavalcante, 2024-02-09 O Laboratório de Ecologia do Desenvolvimento, vinculado à Universidade Federal do Pará (UFPA), desenvolve pesquisas na área da Psicologia do Desenvolvimento, entre elas no contexto do acolhimento infantojuvenil no Brasil, que ainda é uma realidade muito presente na vida de inúmeras crianças e adolescentes em situação de risco e vulnerabilidade social e pessoal. Nesse sentido, por meio do Núcleo de Estudo e Pesquisa em Acolhimento Institucional e Adoção (NEPAIA), várias iniciativas de estudos têm sido realizadas, com o intuito de contribuir com as discussões e aprimoramento do atendimento e das políticas públicas. Esta obra, portanto, é resultado da reunião de pesquisas

nacionais e ações inovadoras, desenvolvidas em serviços de acolhimento de crianças e adolescentes brasileiros. Trata-se de uma construção coletiva, na qual profissionais e especialistas na área nos convidam a refletir sobre temas ainda pouco explorados na literatura, como acolhimento conjunto, família acolhedora, crianças e adolescentes ameaçados de morte, fenômeno da retratação de crianças e adolescentes vítimas de violência sexual, entre outros. Target Volume Delineation for Conformal and Intensity-Modulated Radiation Therapy Nancy Y. Lee,Nadeem Riaz, Jiade J. Lu,2014-12-08 This textbook is designed to help the busy radiation oncologist to accurately and confidently delineate tumor volumes for conformal radiation therapy (including IMRT). The book provides an atlas of clinical target volumes (CTVs) for commonly encountered cancers, with each chapter illustrating CTV delineation on a slice-by-slice basis, on planning CT images. Common anatomic variants for each tumor are represented in individual illustrations, with annotations highlighting differences in coverage. The anatomy of each site and patterns of lymphatic drainage are discussed, and their influence on the design of CTVs is explained in detail. Utilization of other imaging modalities, including MRI, to delineate volumes is highlighted. Key details of simulation and planning are briefly reviewed. Although the emphasis is on target volume delineation for conformal techniques, information is also provided on conventional radiation field setup and design when IMRT is not suitable.

Handbook of Treatment Planning, 2nd Ed Gregory M. M. Videtic,Neil Woody,Andrew D. Vassil,2014-08-14 This is a highly practical resource about the specific technical aspects of delivering radiation treatment. Pocket-sized and well organized for ease of use, the book is designed to lead radiation oncology trainees and residents step by step through the basics of radiotherapy planning and delivery for all major malignancies. This second edition retains the valued features of the first edition-comprehensive yet concise, practical, evidence-based-while incorporating recent advances in the field. This includes expanded and updated discussions of SBRT for prostate and GI tumors, intraoperative.

Practical Radiation Oncology Supriya Mallick,Goura K. Rath,Rony Benson,2019-11-25 This book addresses the most relevant aspects of radiation oncology in terms of technical integrity, dose parameters, machine and software specifications, as well as regulatory requirements. Radiation oncology is a unique field that combines physics and biology. As a result, it has not only a clinical aspect, but also a physics aspect and biology aspect,

all three of which are inter-related and critical to optimal radiation treatment planning. In addition, radiation oncology involves a host of machines/software. One needs to have a firm command of these machines and their specifications to deliver comprehensive treatment. However, this information is not readily available, which poses serious challenges for students learning the planning aspect of radiation therapy. In response, this book compiles these relevant aspects in a single source. Radiation oncology is a dynamic field, and is continuously evolving. However, tracking down the latest findings is both difficult and time-consuming. Consequently, the book also comprehensively covers the most important trials. Offering an essential ready reference work, it represents a value asset for all radiation oncology practitioners, trainees and students.

Radiation Oncology Physics International Atomic Energy Agency, 2005 This publication is aimed at students and teachers involved in teaching programmes in field of medical radiation physics, and it covers the basic medical physics knowledge required in the form of a syllabus for modern radiation oncology. The information will be useful to those preparing for professional certification exams in radiation oncology, medical physics, dosimetry or radiotherapy technology.
