Regional Economic Outlook, October 2021, Western Hemisphere: A Long and Winding Road to Recovery

INTERNATIONAL MONETARY FUND., 2021-10-21

An economic recovery is underway in Latin America and the Caribbean (LAC) but the pandemic still casts shadows on much of the region. The recovery was robust in the first quarter of 2021 but lost momentum in some countries in the second quarter, reflecting the rebound in COVID-19 cases. Real GDP is projected to grow by 6.3 percent in 2021, followed by a more moderate growth of 3 percent in 2022, but would not catch up with pre-pandemic trends in the medium term as persistent weakness in labor markets raises risks of scarring. Broadly favorable external conditions, high commodity prices, and pent-up demand support short-term growth, while monetary and fiscal policy reversals work in the other direction. Risks to the outlook are tilted downward. Main downside risks are the emergence of more transmissible and deadlier COVID-19 variants, tightening of global financial conditions, sovereign debt rollover risks, and social unrest as a year with heavy election schedule looms. Fiscal policy should allocate sufficient resources for health spending, including vaccination, and continue to support households and firms in a more targeted fashion while the pandemic persists, backed by credible assurances of medium-term debt sustainability to maintain access to finance. Monetary policy has started to address inflationary pressures but should continue to support economic activity insofar as the dynamics of inflation expectations permit. If rising inflation threatens to de-anchor inflation expectations, central banks should tighten monetary policy to signal a commitment to inflation targets and avoid persistent increases in inflation. Preemptive and decisive action should be accompanied with

clear and transparent communication. Financial policy should shift from blanket support to targeted support of viable firms, to ensure that necessary labor and capital reallocations are not hindered. Supply-side policies should foster inclusive growth, including through progressive and growth-friendly tax reforms and measures to intensify climate change adaptation and mitigation.

NATO and Transatlantic Relations in the 21st Century

Michele Testoni,2020-12-30 This book explores the evolution and future relevance of NATO from the perspective of the member-states. Addressing the overarching question of the relevance of transatlantic relations in the 21st century, the volume has three core objectives. The first is to reinforce the view that international alliances serve not only an external-oriented goal, but also a domestic-oriented aim, which is to control others' behaviour. The second is to show that tensions amongst NATO allies have become more acute and, therefore, more dangerous. The third is to discuss current transatlantic relations through the adoption of a second image perspective; that is, one that emphasizes the multiple vertical linkages that connect NATO to the politics and the policies of each ally. The chapters presented here are built on a dual approach: on the one hand, they look at the place the Alliance occupies in the domestic public debate and the strategic culture of specific member states; on the other, they analyze how each of these countries contributes to NATO's operations and what interests and visions they share for the Alliance's future. This book will be of much interest to students of NATO, international

organizations, foreign policy, and security studies in general.

*Do Federal Social Programs Work?* David B. Muhlhausen, 2013-04-09 Addressing an issue of burning interest to every taxpayer, a Heritage Foundation scholar brings objective analysis to bear as he responds to the important—and provocative—question posed by his book's title. Of course, the answer to that question will also help determine whether the American public should fear budget cuts to federal social programs. Readers, says author David B. Muhlhausen, can rest easy. As his book decisively demonstrates, scientifically rigorous national studies almost unanimously find that the federal government fails to solve social problems. To prove his point, Muhlhausen reports on

large-scale evaluations of social programs for children, families, and workers, some advocated by Democrats, some by Republicans. But it isn't just the results that matter. It's the lesson to readers on how Americans can—and should—accurately assess government programs that cost hundreds of billions of dollars each year. At the book's core is an insistence that we move beyond anecdotal reasoning and often-partisan opinion to measure the effectiveness of social programs using objective analysis and scientific methods. At the very least, the results of such analysis will, like this book, provide a sound basis for much-needed public debate.

### **Review of the 21st Century Truck Partnership**

National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee to Review the 21st Century Truck Partnership, 2008-10-19 The 21st Century Truck Partnership (21CTP), a cooperative research and development partnership formed by four federal agencies with 15 industrial partners, was launched in the year 2000 with high hopes that it would dramatically advance the technologies used in trucks and buses, yielding a cleaner, safer, more efficient generation of vehicles. Review of the 21st Century Truck Partnership critically examines and comments on the overall adequacy and balance of the 21CTP. The book reviews how well the program has accomplished its goals, evaluates progress in the program, and makes recommendations to improve the likelihood of the Partnership meeting its goals. Key recommendations of the book include that the 21CTP should be continued, but the future program should be revised and better balanced. A clearer goal setting strategy should be developed, and the

goals should be clearly stated in measurable engineering terms and reviewed periodically so as to be based on the available funds.
