New Perspectives on Bare Noun Phrases in Romance and Beyond Johannes Kabatek,Albert Wall,2013-11-15 This book envisions the study of bare noun phrases as a field of research in its own right rather than an accessory matter in the wider domain of nominal determination. Combining insights from different theoretical backgrounds and extending the empirical coverage of bare noun phenomena, the ten contributions provide new perspectives on long-standing but still actively debated problems as well as investigations into previously ignored issues. The volume focuses on the wide range of bare noun phenomena in Romance languages, including Spanish, Catalan, Brazilian and European Portuguese, Italian and French; but also widens its inherently comparative perspective to languages such as Bulgarian and Modern Hebrew. The authors discuss the importance of cross-linguistic patterns in the modeling of the syntax and semantics of noun phrases and of common noun denotations, the role of information structure as well as that of discourse traditions and coordination.

Argument structure in Kashmiri Saartje Verbeke,2017-11-20 In Argument structure in Kashmiri Saartje Verbeke studies the patterns of grammatical relations in the Indo-Aryan language Kashmiri, including case marking and verb agreement, from a typological point of view.

The Tamil Auxiliary Verb System Sanford B. Steever,2020-04-02 This book introduces the syntactic process of auxiliary formation and applies it to the grammatical analysis of the indicative, or non-modal, auxiliary verbs of Modern Tamil. Using data from spoken and written registers gathered over several years, the book demonstrates for the first time the systematic nature of auxiliary verb phenomena, and how they are integrated into the grammar of the language. Including fresh information on new verb constructions, verbal categories and tenses, this book will be a welcome addition to the current general linguistics literature, in particular the study of verbal categories and the morphosyntactic processes that instantiate them.

Modality￿Aspect Interfaces Werner Abraham,Elisabeth Leiss,2008-06-26 The main topics pursued in this volume are based on empirical insights derived from Germanic: logical and typological dispositions about aspect-modality links. These are probed in a variety of non-related languages. The logically establishable links are the following: Modal verbs are aspect sensitive in the selection of their infinitival complements – embedded infinitival perfectivity implies root modal reading, whereas embedded infinitival imperfectivity triggers epistemic readings. However, in marked contexts such as negated ones, the aspectual affinities of modal verbs are neutralized or even subject to markedness inversion. All of this suggests that languages that do not, or only partially, bestow upon full modal verb paradigms seek to express modal variations in terms of their aspect oppositions. This typological tenet is investigated in a variety of languages from Indo-European (German, Slavic, Armenian), African, Asian, Amerindian, and Creoles. Seeming deviations and idiosyncrasies in the interaction between aspect and modality turn out to be highly rule-based.

The Comparative Syntax of Korean and Japanese Yutaka Sato,Sungdai Cho,2023-12-21 This book provides a detailed survey of Korean and Japanese syntax from a comparative perspective, based within a generative framework. Yukata Sato and Sungdai Cho demonstrate that while the two languages exhibit remarkably similar morphosyntactic features, they behave differently in specific types of construction, with the main differences observed in genitive marking, sentence negation, Negative Polarity Items, the formation of causatives, and passivization. The book also explores pragmatic and sociolinguistic issues in the two languages, and shows that they differ in the perception and realization of 'givenness' as a topic marker and in the influence of relationships of power and distance on the use of honorifics. The authors further offer

additional context by exploring the typological relationship between Japanese and Korean and the surrounding languages such as Ainu, and the Chinese and Altaic languages, as well as providing socio-cultural and historical background.

The Routledge Handbook of Arabic Linguistics Elabbas Benmamoun,Reem Bassiouney,2017-12-22 The Routledge Handbook of Arabic Linguistics introduces readers to the major facets of research on Arabic and of the linguistic situation in the Arabic-speaking world. The edited collection includes chapters from prominent experts on various fields of Arabic linguistics. The contributors provide overviews of the state of the art in their field and specifically focus on ideas and issues. Not simply an overview of the field, this handbook explores subjects in great depth and from multiple perspectives. In addition to the traditional areas of Arabic linguistics, the handbook covers computational approaches to Arabic, Arabic in the diaspora, neurolinguistic approaches to Arabic, and Arabic as a global language. The Routledge Handbook of Arabic Linguistics is a much-needed resource for researchers on Arabic and comparative linguistics, syntax, morphology, computational linguistics, psycholinguistics, sociolinguistics, and applied linguistics, and also for undergraduate and graduate students studying Arabic or linguistics.

Language Contact in the Territory of the Former Soviet Union Diana Forker,Lenore A. Grenoble,2021-06-15 The former Soviet Union (USSR) provides the ideal territory for studying language contact between one and the same dominant language (Russian) and a wide range of genealogically and typologically diverse languages with varying histories of language contact. This is the first book that bundles different case studies and systematically investigates the impact of Russian at all linguistic levels, from the lexicon to the domains of grammar to discourse, and with varying types of outcomes such as relatively rapid language shift, structural changes in a relatively stable contact situation, pidginization and super variability at the post-pidgin stage. The volume appeals to linguists studying language contact and contact-induced language change from a broad range of perspectives, who want to gain insight into how one of the largest languages in the world influences other smaller languages, but also experts of mostly minority languages in the sphere of the former Soviet Union.

Variation within and across Romance Languages Marie-Hélène Côté,Eric Mathieu,2014-12-15 This volume is a selection of twenty peer-reviewed articles first presented at the 41st annual Linguistic Symposium on Romance Languages (LSRL), held at the University of Ottawa in 2011. They are thematically linked by a broad notion of variation across languages, dialects, speakers, time, linguistic contexts, and communicative situations. Furthermore, the articles address common theoretical and empirical issues from different formal, experimental, or corpus-based perspectives. The languages analyzed belong to the main members of the Romance family, Spanish, Portuguese, Catalan, French, Ladin, Italian, Sardinian, and Romanian, and a variety of topics across a wide spectrum of linguistic subfields, from phonetics to semantics, as well as historical linguistics, bilingualism and second-language learning, is covered. By illustrating the richness and complementarity of subjects, methods, and theoretical frameworks explored within Romance linguistics, significant contributieons are made to both the documentation of Romance languages and to linguistic theory.

Benefactives and Malefactives Fernando Zúñiga,Seppo Kittilä,2010-04-14 Benefactives are constructions used to express that a state of affairs holds to someone's advantage. The same construction sometimes also serves as a malefactive, whose meanings are generally not a simple mirror image of the benefactive. Benefactive constructions cover a wide range of phenomena: malefactive passives, general and specialized benefactive cases and adpositions, serial verb constructions and converbal constructions (including e.g. verbs of giving and taking), benefactive applicatives, and

other morphosyntactic strategies. The present book is the first collection of its kind to be published on this topic. It includes both typological surveys and in-depth descriptive studies, exploring both the morphosyntactic properties and the semantic nuances of phenomena ranging from the familiar English double-object construction and the Japanese adversative passive to comparable phenomena found in lesser-known languages of Africa, Asia, and the Americas. The book will appeal to typologists and linguists interested in linguistic diversity and it will also be a useful reference work for linguists working on language description.

Christian Reading Blossom Stefaniw,2019-05-28 Christian Reading shifts the assumption that study of the Bible must be about the content of the Bible or aimed at confessional projects of religious instruction. Blossom Stefaniw focuses on the lesson transcripts from the Tura papyri, which reveal verbatim oral classroom discourse, to show how biblical texts were used as an exhibition space for the traditional canon of general knowledge about the world. Stefaniw demonstrates that the work of Didymus the Blind in the lessons reflected in the Tura papyri was similar to that of other grammarians in late antiquity: articulating the students' place in time, their position in the world, and their connection to their heritage. But whereas other grammarians used revered texts like Homer and Menander, Didymus curated the cultural patrimony using biblical texts: namely, the Psalms and Ecclesiastes. By examining this routine epistemological and pedagogical work carried out through the Bible, Christian Reading generates a new model of the relationship of Christian scholarship to the pagan past.

Diversity in African languages Doris L. Payne,Sara Pacchiarotti,Mokaya Bosire ,2016-12-31 Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics, held at the University of Oregon. Most chapters focus on single languages, addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation, in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daats'íin (Gumuzic) stands out as the first-ever published article on this hitherto unknown and endangered language found in the Ethiopian-Sudanese border lands.

Time, Tense and Aspect in Early Vedic Grammar Eystein Dahl,2010-06-14 Drawing on insights from formal semantics and linguistic typology, this book presents a comprehensive account of the tense/aspect/mood system in Early Vedic, the language of the Rigveda. It also outlines a theoretical framework for the study of semantics in dead languages.

Person, Case, and Agreement András Bárány,2018 This book provides both language-specific and cross-linguistic comparative analyses of phenomena relating to person, case and case-marking, and agreement. It offers an explicit and detailed analysis of differential object marking in Hungarian, and shows that the same general type of analysis can account for related phenomena in unrelated languages such as Kashmiri and Sahaptin. In Hungarian, the person of both the subject and the object determines verbal morphology, while in Kashmiri and Sahaptin, person determines object case-marking and

subject case-marking, respectively. Andras Barany adopts broadly the same analysis for these three languages, focusing on how person and agreement influence case-marking. In contrast, the final chapters examine how case-marking influences agreement and show how to account for both orders of interaction. Finally, the author discusses typological generalizations based on the interaction of case and agreement and shows how only the attested patterns of case-marking and agreement in ditransitive clauses are predicted. The book combines data from eight different language families with theory and explicit analyses, and will be of interest to both formal and data-oriented linguists and typologists alike.

Verb Valency Changes Albert Álvarez González,Ia Navarro,2017-09-30 This volume surveys a variety of verb valency change phenomena among diverse languages and from diverse theoretical viewpoints. It offers typological studies comparing languages in topics like applicative polysemy, complex predicate formation and locative alternation, but also works describing the different valency-changing operations in specific languages including West Circassian, Huasteca Nahuatl, Tlachichilco Tepehua and Seri, and works dealing with specific valency change constructions, such as tla- constructions in Nahuatl, resultatives in Yaqui, antipassives in Mocoví, and labile verbs in Arabic. This book aims to put this variety of backdrops in perspective and to clarify the notion and mechanisms of verb valency change. Both scholars and expert readers will get in these works a better understanding of the different verb valency changing operations and of the typological aspects involved in this phenomenon, together with a better grasp of how argument realization and verb morphology are connected in some languages.

Clitics between Syntax and Lexicon Birgit Gerlach,2002-10-10 As a typical interface phenomenon, clitics have become increasingly important in linguistic theory during the last decade. The present book contributes to the recent discussion and first provides a comprehensive overview of clitic sequencing, clitic placement and clitic doubling in the major Romance languages. In addition, new data from a northern Italian dialect are introduced. The author then gives a critical summary of the current morphological analyses of clitic phenomena. She also discusses recent Optimality-theoretical analyses of clitic combinations and clitic placement and shows how these analyses can be improved upon when we also consider a morphological treatment of clitics. This book provides innovative solutions to clitic phenomena within the framework of a constraint-based morphological theory and will be of interest not only to morphologists, syntacticians and those working on the grammar of Romance languages, but also to linguists who are interested in the organisation of the grammar and the lexicon.

The Syntactic Structures of Korean Jong-Bok Kim,2016-07-28 Jong-Bok Kim offers a remarkably broad yet in-depth overview of popular contemporary topics in Korean syntax and semantics.

Definiteness in a Language without Articles – A Study on Polish Adrian Czardybon,2017-06-13 The aim of this book is to investigate how definiteness is expressed in Polish, a language which is claimed to have no definite and in-definite articles. The central question is how the difference in definiteness is indicated between 'a woman' and 'the woman' in Polish. In English, the definite article 'the' and the indefinite article 'a' express the category of definiteness explicitly. Since definiteness is also relevant in articleless languages, there are other means to indicate that a nominal phrase is definite or indefinite. This study is delimited to four means for expressing definiteness in Polish, which are demonstratives, aspect, case alternation, and information structure. Each strategy is investigated independently from the others, although they interact in a complex way, which is shown at the end of this book resulting in a decision tree. Polish is not investigated in isolation, however, the study is complemented by comparisons with other

Slavic languages and also with a Polish dialect called 'Upper Silesian', which differs from Polish. The analysis in this book is based on LeÌ€obner's theory of 'Concept Types and Determination' (CTD). LeÌ€obner's distinction of the four concept types (sortal, relational, functional, individual) is crucial since definiteness phenomena under discussion can be explained. Therefore, the interaction of the four concept types with the four definiteness strategies plays a central role in this book. This series explores issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is grounded in the idea explored in the Collaborative Research Center 'The structure of representations in language, cognition and science' (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.

The Dravidian Languages Sanford B. Steever,2019-12-18 The Dravidian language family is the world's fourth largest with nearly 250 million speakers across South Asia from Pakistan to Nepal, from Bangladesh to Sri Lanka. This authoritative reference source provides a unique description of the languages, covering their grammatical structure and historical development, plus sociolinguistic features. Each chapter combines a modern linguistic perspective with traditional historical linguistics, and a uniform structure allows for easy typological comparison between the individual languages. New to this edition are chapters on Beṭṭa Kuṟumba, Kuṟux, Kūvi and Malayāḷam, and enlarged sections in various existing chapters, as well as updated bibliographies and demographic data throughout. The Dravidian Languages will be invaluable to students and researchers within linguistics, and will also be of interest to readers in the fields of comparative literature, areal linguistics and South Asian studies.

Theoretical Approaches to Disharmonic Word Order Theresa Biberauer,Michelle Sheehan,2013-12-05 This book considers the implications of cross-linguistic word-order patterns for linguistic theory. One of the salient results of Joseph Greenberg's pioneering work in language typology was the notion of a 'harmonic' word-order type, whereby if the verb appears at the left or right edge of the verb phrase, other heads (e.g. prepositions, nouns) also tend to do so. Today, however, there is recognition in both the typological and generative literature that very many, and possibly even the majority of languages, fail to be fully harmonic in the sense that all head-complement pairs pattern alike. But does this imply limitless variation? The chapters in this volume, written by international scholars, discuss the issues arising from this basic question, drawing on data from typologically distinct disharmonic languages, including Mandarin Chinese, Basque, Mócheno (a Tyrolean variety spoken in Northern Italy), French, English, Hixkaryana (a Cariban language), Khalkha Mongolian, Uyghur Turkic, and Afrikaans. The volume begins with a substantial introduction to the study of word order and its relation to linguistic theory. It is then divided into sections on the nature of disharmony; the role of prosody; the question of Antisymmetry and novel alternatives to Antisymmetry; and the Final-over-Final Constraint. Aside from introducing new empirical findings, the volume also offers a range of new perspectives on disharmonic word orders, the status of word order in linguistic theory, and theoretical accounts of typological gaps.

The Development of IELTS Caroline Clapham,1996-07-11 This book investigates the ESP claim that tertiary level ESL students should be given reading proficiency tests in their own academic subject areas, and studies the effect of background knowledge on reading comprehension.
