Basic Economics Thomas Sowell, 2014-12-02 The bestselling citizen's guide to economics *Basic Economics* is a citizen's guide to economics, written for those who want to understand how the economy works but have no interest in jargon or equations. Bestselling economist Thomas Sowell explains the general principles underlying different economic systems: capitalist, socialist, feudal, and so on. In readable language, he shows how to critique economic policies in terms of the incentives they create, rather than the goals they proclaim. With clear explanations of the entire field, from rent control and the rise and fall of businesses to the international balance of payments, this is the first book for anyone who wishes to understand how the economy functions. This fifth edition includes a new chapter explaining the reasons for large differences of wealth and income between nations. Drawing on lively examples from around the world and from centuries of history, Sowell explains basic economic principles for the general public in plain English.

Eliza Calvert Hall Lynn E. Niedermeier, 2007-01-01 In 1907, author, poet, essayist, and folk art historian Eliza Calvert Hall (1856–1935) published *Aunt Jane of Kentucky*, a collection of stories about rural life infused with the spirit and gentle good humor of its elderly narrator, Aunt Jane. The book and several sequels achieved wide popularity, reaching an estimated one million readers in her lifetime, and placed Hall in the front ranks of “local color” fiction writers of her time. Eliza Calvert Hall's life and work unfolded during a time of restlessness and change for American women. Born Eliza “Lida” Calvert in Bowling Green, Kentucky, Hall experienced the upheaval of both the Civil War and family scandal. Forced to help support her mother and four siblings by teaching school, she became a published poet, adopting her grandmother's name, Hall, as her pseudonym. At twenty-nine, she

married William A. Obenchain, and in the space of eight years gave birth to four children. As Hall struggled to balance her writing career with the duties of a nineteenth-century wife and mother, suffragist Laura Clay was lobbying for every woman's right to vote. Hall joined the battle, writing fearlessly in support of suffrage and equality. While her passionate essays served as a direct appeal for this cause, her creative writing also carried a feminist spirit, celebrating the strength, humor, love, and art of the common woman. In *Eliza Calvert Hall: Kentucky Author and Suffragist*, Lynn E. Niedermeier tells the story of this remarkable Kentuckian for the first time. Hall's challenge was to balance the artist's creative ambitions with the crusader's passion for achieving the goal of political equality for American women. Her successes did not stem from privilege or leisure; although she was an acclaimed writer, Hall was an ordinary woman, a wife and mother of moderate economic means. Through the power of her words, she challenged others to match her courage, independence, intellectual energy, and loyalty to her sex.

Human-Machine Reconfigurations Lucille Alice Suchman, 2007 Publisher description

Data Structures and Algorithms in Java Michael T. Goodrich, Roberto Tamassia, Michael H. Goldwasser, 2014-06-16 The design and analysis of efficient data structures has long been recognized as a key component of the Computer Science curriculum. Goodrich and Tamassia's approach to this classic topic is based on the object-oriented paradigm as the framework of choice for the design of data structures. For each ADT presented in the text, the authors provide an associated Java interface. Concrete data structures realizing the ADTs are provided as Java classes implementing the interfaces. The Java code implementing fundamental data structures in this book is organized in a single Java package, `net.datastructures`. This package forms a coherent library of data structures and algorithms in Java specifically designed for educational purposes in a way that is complimentary with the Java Collections Framework.

Power, Protection and Magic in Thailand Craig J. Reynolds, 2019-10-22 This biographical study of an unusual southern policeman explores the relationship between religion and power in Thailand during the early twentieth century when parts of the country were remote and banditry was rife. Khun Phan (1898–2006), known as Lion Lawman, sometimes used rather too much lethal force in carrying out his orders. He was the most famous graduate of a monastic academy in the mid-south, whose senior teachers imparted occult knowledge favoured by fighters on both sides of the law. Khun Phan imbibed this knowledge to confront the risks and uncertainty that lay ahead and bolster his confidence and self-reliance for his struggle with adversaries. Against the background of national events, the story is rooted in the mid-south where the policeman was born and died. Based on a wide range of works in Thai language, on field trips to the region and on interviews with local and regional scholars as well as the policeman's descendants, this generously illustrated book, accompanied by short video clips, brings to life the distinctive environment of the lakes district on the Malay Peninsula.

The Great Influenza John M. Barry, 2005-10-04 #1 New York Times bestseller "Barry will teach you almost everything you need to know about one of the deadliest outbreaks in human history."—Bill Gates Monumental... an authoritative and disturbing morality tale.—Chicago Tribune The strongest weapon against pandemic is the truth. Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, *The Great Influenza* provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face on nothing, to try to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart. At the height of World War I, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.
