Improving Schools with Blended Learning Tony Yeigh,David Lynch,Paul Fradale,Edward Lawless,David Turner,Royce Willis,2021-02-11 *Improving Schools with Blended Learning* is specifically designed to address the important issues needed to successfully modernise education within the context of technological change. It does this by first providing a clear roadmap for designing Blended Learning environments able to respond to the technological imperatives challenging schools at present, and then illustrating this roadmap via specific, original research that details the 'how to' aspects of a successful technology-based design process. School leaders, teachers, teacher education students and researchers will all find highly relevant information about how to manage for disruption in the new and informative approach to Blended Learning (BL) they will discover in this book. This book arose from two different research projects the authors have been pursuing over the last 3–5 years, including school improvement research and Blended Learning research designed to investigate the role of technology in effective teaching and learning. By combining the insights gained from these two different research areas, this book is able to present a novel understanding of BL that is both insightful and clearly evidence-based. *Improving Schools with Blended Learning* also provides several original contributions to specific knowledge in the areas of BL and school improvement that most educators will find highly useful, including the use of BL schemas, a clear and extended BL continuum, how to measure and evaluate the success of BL, how to scaffold teacher ICT knowledge and skills, and a specific process for contextualising applied BL in relation to the 'disruption' imperatives of the Knowledge Economy.

Territorial Self-Government as a Conflict Management Tool Dawn Walsh,2018-03-27 This book provides an in-depth narrative of the difficulties facing Territorial Self-Government institutions across Northern Ireland, Bosnia, the former Yugoslav Republic of Macedonia, Moldova, and Iraq. It brings together analyses of both prominent and lesser known cases to provide a broad overview of how Territorial Self-Government operates as a conflict management tool in different contexts. Drawing on lessons from these five cases, the author demonstrates the importance of designing and implementing international guarantees to self-government and the associated difficulties. Domestic capacity development must be encouraged and international actors needs to balance the guarantees aimed at providing stability with their wider security and economic concerns. The volume also strongly connects to broader research and theory on conflict management, particularly the role of institutional design and international assistance.

Inside Smart Cities Andrew Karvonen,Federico Cugurullo,Federico Caprotti,2018-09-12 The era of the smart city has arrived. Only a decade ago, the promise of optimising urban services through the widespread application of information and communication technologies was largely a techno-utopian fantasy. Today, smart urbanisation is occurring via urban projects, policies and visions in hundreds of cities around the globe. Inside Smart Cities provides real-world evidence on how local authorities, small and medium enterprises, corporations, utility providers and civil society groups are creating smart cities at the neighbourhood, city and regional scales. Twenty three empirically detailed case studies from the Global North and South – ranging from Cape Town, Stockholm and Abu Dhabi to Philadelphia, Hong Kong and Santiago – illustrate the multiple and diverse incarnations of smart urbanism. The contributors draw on ideas from urban studies, geography, urban planning, science and technology studies and innovation studies to go beyond the rhetoric of technological innovation and reveal the political, social and physical implications of digitalising the built environment. Collectively, the practices of smart urbanism raise fundamental questions about the sustainability, liveability and resilience of cities in the future. The findings are relevant to academics, students, practitioners and urban stakeholders who are questioning how urban innovation relates to politics and place.

Routledge Handbook of Sustainable Heritage Kalliopi Fouseki,May Cassar,Guillaume Dreyfuss,Kelvin Ang Kah Eng,2022-07-29 This handbook presents cutting-edge and global insights on sustainable heritage, engaging with ideas such as data science in heritage, climate change and environmental challenges, indigenous heritage, contested heritage and resilience. It does so across a diverse range of global heritage sites. Organized into six themed parts, the handbook offers cross-disciplinary perspectives on the latest theory, research and practice. Thirty-five chapters offer insights from leading scholars and practitioners in the field as well as early career researchers. This book fills a lacuna in the literature by offering scientific approaches to sustainable heritage, as well as multicultural perspectives by exploring sustainable heritage in a range of different geographical contexts and scales. The themes covered revolve around heritage values and heritage risk; participatory approaches to heritage; dissonant heritage; socio-environmental challenges to heritage; sustainable heritage-led transformation and new cross-disciplinary methods for heritage research. This book will be an invaluable resource for students and scholars in heritage studies, archaeology, museum studies, cultural studies, architecture, landscape, urban design, planning, geography and tourism.

Model Rules of Professional Conduct American Bar Association. House of Delegates,Center for Professional Responsibility (American Bar Association),2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Introduction to Nursing Informatics Pamela Hussey,Margaret Ann Kennedy,2021-01-04 This significantly revised 5th edition provides nurses with a practical guide to the fundamental concepts of digital health from a nursing perspective. Nursing informatics has never been more important as contemporary healthcare continues to experience tremendous technological advances. The nursing profession is ideally positioned as a key enabler for the design and adoption of emerging eHealth models of care and quality outcomes. The book also features real world examples to illustrate the theory and encourages readers to think critically about their current practices and how they can potentially integrate relevant theories and techniques into their future practice to advance integrated care. Introduction to Nursing Informatics is designed for use as a primer for practicing nurses and students in undergraduate programs of study and includes contributions from leading international experts who have practiced in the field over a number of years. The information is presented and integrated in a purposeful manner to encourage readers to explore the key concepts of nursing practice, digital health, health information management and its relationship to informatics.

The Digital Citizen(ship) Luigi Ceccarini,2021-02-26 This cutting-edge book explores the diverse and contested meanings of ‘citizenship’ in the 21st century, as representative democracy faces a mounting crisis in the wake of the digital age. Luigi Ceccarini enriches and updates the common notion of citizenship, answering the question of how it is possible to fully live as a citizen in a post-modern political community.

Practices for Network Management Jukka Vesalainen,Katri Valkokari,Magnus Hellström,2017-02-09 Presenting 17 tools developed through rigorous design science research, this book bridges the relevance gap within network management. In so doing, it proposes a novel system-framework and establishes a path towards a networks-as-practice view on inter-organizational relationships. The systems-framework builds on three institutionalized business practices: Networks-as-coordinated social systems, Networks-as-knowledge-creating platforms, and Networks-as-value-generating

entities. Through these tools, Towards Relational Business Practices intends to propose a new managerial praxis and provoke new and improved frameworks and models for network management.

Handbook of Research on Driving Transformational Change in the Digital Built Environment Underwood, Jason,Shelbourn, Mark,2021-05-07 The construction industry is amidst a digital transformation that is focused on addressing well-documented issues and calls for significant improvements and changes through increased productivity, whole-life value, client focus, reduction of waste, and being more sustainable.
