Genre in a Changing World Charles Bazerman,Adair Bonini,2009-09-16 Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

Introduction to Information Retrieval Christopher D. Manning,Prabhakar Raghavan,Hinrich Schütze,2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Surgery for Sleep Disordered Breathing Karl Hörmann,Thomas Verse,2010-03-01 Nasal continuous positive airway pressure ventilation is the gold standard in the treatment of obstructive sleep apnea. Long-term compliance rates are about 60%. Therefore, several alternative treatment options are of special interest. Beside conservative therapies, various surgical concepts exist. The field of surgery for sleep disordered breathing has rapidly grown with new instrumentation and surgical techniques in the last 10 years. Surgeons in these fields have to attend scientific meetings, participate in workshops, and read the literature to stay up to date. In our sleep laboratories we conduct 30 polysomnographies each night. Each year, we perform almost 1,000 surgical procedures for sleep disordered breathing apart from numerous other conservative and apparative treatment modalities. Referring to our experience and the present literature, we tried to give new information on surgical techniques in this second edition. The chapters are grouped in different anatomical fields of interest. We wanted to give general advice and specific new hints for the surgery of sleep disordered breathing so that the reader learns basic techniques followed by more advanced surgery. In addition to the illustrated surgical descriptions, the chapters contain informations about indications and contraindications of each surgical procedure and the postoperative care. Special interest has been dedicated to evidence-based medicine. So in each chapter, there is a table of references summarizing the effectiveness of the procedure and EBM grade.

Managing Ocean Environments in a Changing Climate Kevin J. Noone,Ussif Rashid Sumaila,Robert J. Diaz,2013-06-29 Managing Ocean Environments in a Changing Climate summarizes the current state of several threats to the global oceans. What distinguishes this book most from previous works is that this book begins with a holistic, global-scale focus for the first several chapters and then provides an example of how this approach can be applied on a regional scale, for the Pacific region. Previous works usually have compiled local studies, which are essentially impossible to properly integrate to the global scale. The editors have engaged leading scientists in a number of areas, such as fisheries and marine ecosystems, ocean chemistry, marine biogeochemical cycling, oceans and climate change, and economics, to examine the threats to the oceans both individually and collectively, provide gross estimates of the economic and societal impacts of these threats, and deliver high-level recommendations. Nominated for a Katerva Award in 2012 in the Economy category State of the science reviews by known marine experts provide a concise, readable presentation written at a level for managers and students Links environmental and economic aspects of ocean threats and provides an economic analysis of action versus inaction Provides recommendations for stakeholders to help stimulate the development of policies that would help move toward sustainable use of marine resources and services

Writing Spaces Dana Driscoll,Matthew Vetter,2020-03-07 Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide range of topics about writing. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about the craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in first year writing or writing-intensive courses across the disciplines at any level. Volume 3 continues the tradition of previous volumes with topics such as voice and style in writing, rhetorical appeals, discourse communities, multimodal composing, visual rhetoric, credibility, exigency, working with personal experience in academic writing, globalized writing and rhetoric, constructing scholarly ethos, imitation and style, and rhetorical punctuation.

Guidance for the Validation of Analytical Methodology and Calibration of Equipment Used for Testing of Illicit Drugs in Seized Materials and Biological Specimens United Nations,2009 The validation of analytical methods and the calibration of equipment are important aspects of quality assurance in the laboratory. This manual deals with both of these within the context of testing of illicit drugs in seized materials and biological specimens. It provides an introduction and practical guidance to national authorities and analysts in the implementation of method validation and verification, and also in the calibration/performance verification of laboratory instrumentation and equipment within their existing internal quality assurance programmes. The procedures described represent a synthesis of the experience of scientists from several reputable laboratories around the world.

Lessons from NAFTA Daniel Lederman,William Francis Maloney,William F. Maloney,Luis Serven,2005 Analyzing the experience of Mexico under the North American Free Trade Agreement (NAFTA), the authors draw lessons for other countries considering free trade agreements with the United States. The authors conclude that NAFTA raised external trade and foreign investment inflows and had a modest effect on Mexico’s average income per person. It is likely that NAFTA also helped achieve a modest reduction in poverty and an improvement in job quality. However, major obstacles remain to Mexico’s long term development—NAFTA is not enough. The main lesson for other countries is that free trade agreements offer opportunities to accelerate economic growth, but do not guarantee it.

Vocabulary Development Jeremy M. Anglin,2000-05-18 This monograph studies research conducted for the purpose of investigating the relationship between vocabulary recognition and morphological knowledge during the early and middle elementary school years. The findings suggest that lexical development can be characterized in terms of increasing morphological complexity, and as a child ages, the proportion of known complex words that the child figured out by analyzing their morphological structure increased.
