Red Planet Blues Robert J. Sawyer,2013-03-26 Incorporating the Hugo & Nebula award-nominated novella "Identity Theft" The name's Lomax-Alex Lomax. I'm the one and only private eye working the mean streets of New Klondike, the Martian frontier town that sprang up forty years ago after Simon Weingarten and Denny O'Reilly discovered fossils on the Red Planet. Back on Earth, where anything can be synthesized, the remains of alien life are the most valuable of all collectibles, so shiploads of desperate treasure hunters stampeded here in the Great Martian Fossil Rush. I'm trying to make an honest buck in a dishonest world, tracking down killers and kidnappers among the failed prospectors, the corrupt cops, and a growing population of transfers-lucky stiff who, after striking paleontological gold, upload their minds into immortal android bodies. But when I uncover clues to solving the decades-old murders of Weingarten and O'Reilly, along with a journal that may lead to their legendary mother lode of Martian fossils, God only knows what I'll dig up...

Meet Red, a quirky, headstrong 10-year-old who longs to live in her own perfect paradise far away from her annoying foster family. But when a UFO mistakenly kidnaps her, Red finds herself farther away than she could have possibly imagined--across the galaxy and aboard an enormous spaceship owned by the Aquilari, an ancient creature with a taste for rare and unusual treasures. Before Red can be discovered as a stowaway, the great ship crashes on a small deserted planet, leaving her marooned with a menagerie of misfit aliens. With her newfound friend, a small gray alien named Tawee, Red must find a way to survive the hostile castaways, evade the ravenous wildlife, and contend with Goose, the planet's grumpy, feline custodian. Surely this can't be the paradise she's been hoping for. NASA 50th Anniversary Proceedings: NASA's First 50 Years: Historical Perspectives Steven J. Dick,National Aeronautics and Space Administration,2010-07-07 On 29 July 1958, President Dwight D. Eisenhower signed the National Aeronautics and Space Act, creating the National Aeronautics and Space Administration (NASA), which became operational on 1 October of that year. Over the next 50 years, NASA achieved a set of spectacular feats, ranging from advancing the well-established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight. In the midst of the geopolitical context of the Cold War, 12 Americans walked on the Moon, arriving in peace "for all mankind." Humans saw their home planet from a new perspective, with unforgettable Apollo images of Earthrise and the "Blue Marble," as well as the "pale blue dot" from the edge of the solar system. A flotilla of spacecraft has studied Earth, while other spacecraft have probed the depths of the solar system and the universe beyond. In the 1980s, the evolution of aeronautics gave us the first winged human spacecraft, the Space Shuttle, andthe International Space Station stands as a symbol of human cooperation in

space as well as a possible way station to the stars. With the Apollo fire and two Space Shuttle accidents, NASA has also seen the depths of tragedy. In this volume, a wide array of scholars turn a critical eye toward NASA's first 50 years, probing an institution widely seen as the premier agency for exploration in the world, carrying on a long tradition of exploration by the United States and the human species in general. Fifty years after its founding, NASA finds itself at a crossroads that historical perspectives can only help to illuminate.

Robot Warriors David Jefferis,2006 Examines how robot warriors help soldiers during war. They are run by computers operated by humans or remote controls. Shows how using robots for dangerous work can help prevent injury to humans.
