Operator Handbook Joshua Picolet,2020-03-18 The Operator Handbook takes three disciplines (Red Team, OSINT, Blue Team) and combines them into one complete reference guide. The book contains 123 individual cheat sheet references for many of the most frequently used tools and techniques by practitioners. Over 400 pages of content to assist the most seasoned cybersecurity veteran or someone just getting started in the career field. The goal of combining all disciplines into one book was to remove the artificial barriers that only certain knowledge exists within a Team. The reality is today's complex digital landscape demands some level of knowledge in all areas. The Operator culture should mean a well-rounded team member no matter the Team you represent. All cybersecurity practitioners are Operators. The Blue Team should observe and understand Red Team tactics, Red Team should continually push collaboration with the Blue Team, and OSINT should continually work to peel back evidence of evil doers scattered across disparate data sources. In the spirit of having no separation, each reference is listed in alphabetical order. Not only does this remove those team separated notions, but it also aids in faster lookup. We've all had the same experience where we knew there was an NMAP Cheat Sheet but did it fall under Networking, Windows, or Tools? In the Operator Handbook it begins with N so flip to the N's section. Also almost every topic is covered in How to exploit X and How to defend X perspectives. Tools and topics covered: Cloud (AWS, Azure, GCP), Windows, macOS, Linux, Android, iOS, DevOps (Docker, Kubernetes), OSINT, Ports, Forensics, Malware Resources, Defender tools, Attacker tools, OSINT tools, and various other supporting tools (Vim, iptables, nftables, etc...). This handbook was truly meant to be a single source for the most common tool and

techniques an Operator can encounter while on the job. Search Copy Paste L33t.

**The Science of Good and Evil** Michael Shermer,2005-01-02 From bestselling author Michael Shermer, an investigation of the evolution of morality that is a paragon of popularized science and philosophy The Sun (Baltimore) A century and a half after Darwin first proposed an evolutionary ethics, science has begun to tackle the roots of morality. Just as evolutionary biologists study why we are hungry (to motivate us to eat) or why sex is enjoyable (to motivate us to procreate), they are now searching for the very nature of humanity. In The Science of Good and Evil, science historian Michael Shermer explores how humans evolved from social primates to moral primates; how and why morality motivates the human animal; and how the foundation of moral principles can be built upon empirical evidence.

Along the way he explains the implications of scientific findings for fate and free will, the existence of pure good and pure evil, and the development of early moral sentiments among the first humans. As he closes the divide between science and morality, Shermer draws on stories from the Yanamamö, infamously known as the fierce people of the tropical rain forest, to the Stanford studies on jailers' behavior in prisons. The Science of Good and Evil is ultimately a profound look at the moral animal, belief, and the scientific pursuit of truth.

Oblivion Joseph Kosinski,Ian Edginton,Arvid Nelson,Andree Wallin,2010-12-31 In a post-apocalyptic Earth, civilization lives above the clouds and scavengers illegally collect ancient artifacts from the polluted and destroyed surface below. But when one young scavenger discovers a crashed spacecraft planetside- and a beautiful woman within- he rejoices at the find. Little does he realize that his discovery will lead him to a journey filled with romance, adventure and unimaginable danger.

*Sams Teach Yourself Network Troubleshooting in 24 Hours* Jonathan Feldman,2003 Covers topics including black box troubleshooting strategies, documentation, cable modems, wireless infrastructure, enterprise routers, and lag problems.

*Science Friction* Michael Shermer,2010-04-01 Bestselling author Michael Shermer delves into the unknown, from heretical ideas about the boundaries of the universe to Star Trek's lessons about chance and time A scientist pretends to be a psychic for a day-and fools everyone. An athlete discovers that good-luck rituals and getting into the zone may, or may not, improve his performance. A historian decides to analyze the data to see who was truly responsible for the Bounty mutiny. A son explores the possiblities of alternative and experimental

medicine for his cancer-ravaged mother. And a skeptic realizes that it is time to turn the skeptical lens onto science itself. In each of the fourteen essays in Science Friction, psychologist and science historian Michael Shermer explores the very personal barriers and biases that plague and propel science, especially when scientists push against the unknown. What do we know and what do we not know? How does science respond to controversy, attack, and uncertainty? When does theory become accepted fact? As always, Shermer delivers a thought-provoking, fascinating, and entertaining view of life in the scientific age.

*Achtung-Panzer!* Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Art for the Future** Erina Duganne,2022-01-11 A collective history of the 1980s anti-imperialist campaign In the early 1980s, a group of artists, writers and activists came together in New York City to form

Artists Call Against US Intervention in Central America, a creative campaign that mobilized nationwide in an effort to bring attention to the US government's violent involvement in Latin American nations such as Nicaragua and El Salvador. Together the group staged over 200 exhibitions, concerts and other public events in a single year, raising awareness and funds for those disenfranchised by such political crises. Art for the Future illuminates the history of Artists Call with archival pieces and newly commissioned work in the spirit of the group's message. In Spanish and English, a wide selection of artists and organizers examine the group's history as well as the issues that were as urgent to Artists Call in 1984 as they are now: decolonization, Indigeneity, collectivity, human rights and self-determination. Artists include: Antena Aire, Benvenuto Chavajay, Leon Golub, Hans Haacke, Fredman Barahona & Christian Dietkus Lord, Sandra Monterroso, Carlos Motta, Claes Oldenburg, Gregory Sholette and Coosje van Bruggen, Maria Thereza Alves, Sabra Moore, Jerri Allyn, Dona Ann McAdams, Rudolf Baranik, Susan Meiselas, Alfredo Jaar, Martha Rosler, Jesús Romeo Galdámez and Jimmie Durham.

**Publishing as Practice** ,2021-04-06 On the work of three contemporary artist's-book publishers who have developed fresh ways of broaching politics in publishing This book documents Publishing as Practice, a residency at Ulises--a curatorial platform based in Philadelphia--that explores publishing as an incubator for new forms of editorial, curatorial and artistic practice. Over the course of two years, three publishers activated Ulises as an exhibition space and public programming hub, engaging the public through workshops, discussions and projects. Residents included Hardworking Goodlooking, the publishing arm of Philippines-based, social-practice platform The Office of Culture and Design; Dominica, an imprint run

by Martine Syms dedicated to exploring Blackness as a topic, reference, marker and audience in visual culture; and Bidoun, a non-profit organization focused on art and culture from the Middle East and its diasporas. The book features a preface by David Senior, an essay by Gee Wesley and Ulises Carrión's 1975 publishing manifesto The New Art of Making Books, alongside documentation of the works produced.
