Permanent Crisis Paul Reitter,Chad Wellmon,2023-04-05 Leads scholars and anyone who cares about the humanities into more effectively analyzing the fate of the humanities and digging into the very idea of the humanities as a way to find meaning and coherence in the world. The humanities, considered by many as irrelevant for modern careers and hopelessly devoid of funding, seem to be in a perpetual state of crisis, at the mercy of modernizing and technological forces that are driving universities towards academic pursuits that pull in grant money and direct students to lucrative careers. But as Paul Reitter and Chad Wellmon show, this crisis isn't new—in fact, it's as old as the humanities themselves. Today's humanities scholars experience and react to basic pressures in ways that are strikingly similar to their nineteenth-century German counterparts. The humanities came into their own as scholars framed their work as a unique resource for resolving crises of meaning and value that threatened other cultural or social goods. The self-understanding of the modern humanities didn't merely take shape in response to a perceived crisis; it also made crisis a core part of its project. Through this critical, historical perspective, *Permanent Crisis* can take scholars and anyone who cares about the humanities beyond the usual scolding, exhorting, and hand-wringing into clearer, more effective thinking about the fate of the humanities. Building on ideas from Max Weber and Friedrich Nietzsche to Helen Small and Danielle Allen, Reitter and Wellmon dig into the very idea of the humanities as a way to find meaning and coherence in the world. ,

PG Textbook of Pediatrics Piyush Gupta,PSN Menon,Siddarth Ramji,Rakesh Lodha,2015-08-31 The book attempts to provide the essential information that postgraduates throughout India need to capture to effectively address the health problems that our children and youth may face in the times to come. Our objective is to be comprehensive yet concise and reader friendly, embracing both the new advances in science as well as the time-honored art of pediatric practice. Both Indian and international experts in respective fields have provided the details which have been further scrutinized for exposition and usefulness to pediatric postgraduates by a chosen team of eminent academicians. We have liberally included tables, line diagrams, images, clinical photographs, illustrative figures, flowcharts and algorithms in the main text. The book is divided in 10 major Parts and further arranged into 51 Sections to cover all aspects of postgraduate pediatric curriculum. Themes which have major public health relevance for India are extensively covered. It is almost impossible to cover all pediatric problems with the same degree of detail and hence a careful balance has been made in the details of description of diseases and their management to the needs of the students, and to keep the book to a manageable size. Take-home messages are provided at the end of each chapter. Selected recent references, mostly leading articles, reviews and position statements, are provided for more detailed information if desired by the student or the teacher.
