Purchase and Refinance Mortgage Process Revathi Raj Kumar, Saravana Gupta Ravindran, I started my real estate journey when I bought my dream home several years ago. I didn't know a lot, but was very curious to learn more. This curiosity drove me to keep learning more. I refinanced the mortgage multiple times to take advantage of the lower interest rates. I refinanced to 15 year mortgage to lower interest rate even further. Had a mindset change to focus on expanding income instead of reducing expense. Explored further on this to understand the single family rental market. Spent several hours on BiggerPockets website to learn and then became a landlord. To expand my understanding further completed hundreds of hours of Pre-Licensure education, took the license tests on Mortgage Broker, Real Estate Agent, Insurance Agent, Notary Public and aced all. Teaching and helping others has been a passion for me since my childhood. I am passionate and dedicated in whatever I do. I became a volunteer to teach Tamil to kids. How to Refinance Your Mortgage and Loans Theo Katz, 2013-08-12 What You Need to Know About a Mortgage LoanIn wanting to have your own home, you have to take one of the biggest financial decisions in your life. Unless you are going to purchase a real property in cold cash, you need to have the financial means to be able to pay for your mortgage. Before you finally get a house, it is crucial that you get to understand the mortgage process and procedures as well as the details pertaining to the interest rates and other terms and conditions. This allows you to choose the right mortgage loan that suits your financial capacity and your other needs. What is Mortgage? In a nutshell, mortgage is a long-term loan for borrowers who want to purchase a real estate property. With the help of a mortgage loan, you have the affordable means to own a house where you pay the principal amount of the loan plus the interest payments depending on the interest rate and the terms. To further understand your mortgage, you need to know how it functions and how you actually pay for it. Components of a Mortgage PaymentMortgage payments depend on factors like the amount of money to be borrowed and the term, which refers to the length of time you intend to fully pay back your mortgage loan. Longer terms allow you to pay lower monthly payments. But you can expect that you will have higher costs when you sum up the principal amount and the interest rates. Since long terms like the 30-year mortgage are affordable, many clients prefer to have this mortgage package. Now, how do you go about the calculation of a mortgage payment? Once you have determined the amount of money you intend to borrow and the terms, there are now four factors that come into play: the principal amount, interest, taxes and insurance. Principal Every mortgage payment is allotted for the repayment of the principal. If you take a \$500,000 mortgage, the principal amount that you have to pay is \$500,000. The loan is just structured in such a way that the starting years are dedicated for primarily interest payments while the final years consist mainly of principal repayment. Interest The bulk comprising your mortgage payment would consist of interest payments. The higher the interest rates mean that you have to pay for higher mortgage payments. As such, many people want to take advantage of a low interest rate on a mortgage. Other factors that can affect your mortgage payments include the insurance and the real estate taxes, which are then calculated by the government.
