Registries for Evaluating Patient Outcomes Agency for Healthcare Research and Quality/AHRQ,2014-04-01 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

**Written Registry Exam Review for Respiratory Care**

William V. Wojciechowski,2002 This examination review book provides a personalized study plan for students preparing for the National Board for Respiratory Care (NBRC) Written Registry Examination. It presents an exhaustive review of the test matrix with over 850 questions and analyses based on the 1999 Examination Matrix. A chapter on test-taking strategies is designed to build self-confidence and explains how to think the NBRC way. Each question contains a detailed analysis about the question, and a list of references for further study. Detailed scoring forms are available throughout the book to assist candidates in evaluating strengths and weaknesses, and for assessing progress while working through the book. Each question is also linked to a specific examination matrix item allowing candidates to become familiar with the test matrix. Computer software allows the students to practice and review material in a similar environment that mimics the actual examination. (RT, RTT, Respiratory Care, Respiratory Therapy, Resp. Care, Resp.
