Falling Felines and Fundamental Physics Gregory J. Gbur,2019-10-22 How do cats land on their feet? Discover how this question stumped brilliant minds and how its answer helped solve other seemingly impossible puzzles The question of how falling cats land on their feet has long intrigued humans. In this playful and eye-opening history, physicist and cat parent Gregory Gbur explores how attempts to understand the cat-righting reflex have provided crucial insights into puzzles in mathematics, geophysics, neuroscience, and human space exploration. The result is an engaging tumble through physics, physiology, photography, and robotics to uncover, through scientific debate, the secret of the acrobatic performance known as cat-turning, the cat flip, and the cat twist. Death by Meeting Patrick M. Lencioni,2010-06-03 A straightforward framework for creating engaging and exciting business meetings Casey McDaniel had never been so nervous in his life. In just ten minutes, The Meeting, as it would forever be known, would begin. Casey had every reason to believe that his performance over the next two hours would determine the fate of his career, his financial future, and the company he had built from scratch. "How could my life have unraveled so quickly?" he wondered. In his latest page-turning work of business fiction, best-selling author Patrick Lencioni provides readers with another powerful and thought-provoking book, this one centered around a cure for the most painful yet underestimated problem of modern business: bad meetings. And what he suggests is both simple and revolutionary. Casey McDaniel, the founder and CEO of Yip Software, is in the midst of a problem he created, but one he doesn't know how to solve. And he doesn't know where or who to turn to for advice. His staff can't help him; they're as dumbfounded as he is by their tortuous meetings. Then an unlikely advisor, Will Peterson, enters Casey's world. When he proposes an unconventional, even radical, approach to solving the meeting problem, Casey is just desperate enough to listen. As in his other books, Lencioni provides a framework for his groundbreaking model, and makes it applicable to the real world. Death by Meeting is nothing short of a blueprint for leaders who want to eliminate waste and frustration among their teams and create environments of engagement and passion.

Woke Titania McGrath,2019-03-07 'The book everyone's talking about' The Times (Book of the Year) 'Titania McGrath is a genius' Spectator (Book of the Year) 'Beautiful classic satire' Ricky Gervais 'Hilarious . . . the most artful form of subtle parody' Joe Rogan 'Just as Bridget Jones was the embodiment of the anxiety-ridden Nineties feminist, a creation whose diary entries encapsulated all our hopes, fears and failures, so Titania McGrath is her millennial successor, a girl every bit as lost and confused, every bit as accurately observed - and equally, catastrophically, hilarious.' Sarah Vine, Daily Mail In Woke, Titania McGrath demonstrates how everybody can play their part in the pursuit of social justice. As a millennial icon on the forefront of online activism, Titania is uniquely placed to guide her readers through the often bewildering array of terminology and concepts that constitute twenty-first-century 'wokeness'. These new ideas often leave the general public bemused, particularly if they don't read the Guardian. Being woke is actually much easier than people think. As Titania demonstrates, anyone can be an activist. By simply adding a rainbow flag to your Facebook profile, or calling out an elderly person who doesn't understand what 'non-binary' means, you can change the world for the better. Indeed, social media has now made it possible to show how virtuous you are without having to do anything at all. Timely and indispensable, Titania's step-by-step guide will help you to become the woke person you need to be in an increasingly progressive world. In a non-patronising manner, Titania will explain why you are wrong about everything and how to become more like her.

Dear Church Lenny Duncan,2019-07-02 Lenny Duncan is the unlikeliest of pastors. Formerly incarcerated, he is now a black preacher in the whitest denomination in the United States: the Evangelical Lutheran Church in America (ELCA). Shifting demographics and shrinking congregations make all the headlines, but Duncan sees something else at work--drawing a direct line between the church's lack of diversity and the church's lack of vitality. The problems the ELCA faces are theological, not sociological. But so are the answers. Part manifesto, part confession, and all love letter, Dear Church offers a bold new vision for the future of Duncan's denomination and the broader mainline Christian community of faith. Dear Church rejects the narrative of church decline and calls everyone--leaders and laity alike--to the front lines of the church's renewal through racial equality and justice. It is time for the church to rise up, dust itself off, and take on forces of this world that act against God: whiteness, misogyny, nationalism, homophobia, and economic injustice. Duncan gives a blueprint for the way forward and urges us to follow in the revolutionary path of Jesus.

Models, Methods and Tools for Product Service Design Laura Cattaneo,Sergio Terzi,2018-08-30 This open access book summarizes research being pursued within the Manutelligence project, the goal of which is to help enterprises develop smart, social and flexible products with high value added services. Manutelligence has improved Product and Service Design by developing suitable models and methods, and connecting them through a modular, collaborative and secure ICT Platform. The use of real data collected in real time by Internet of Things (IoT) technologies underpins the design of product-service systems and makes it possible to monitor them throughout their life cycle. Available data allows costs and sustainability issues to be more accurately measured and simulated in the form of Life Cycle Cost (LCC) and Life Cycle Assessment (LCA). Analysing data from IoT systems and sharing LCC and LCA information via the ICT Platform can help to accelerate the design of product-service systems, reduce costs and better understand customer needs. Industrial partners involved in Manutelligence provide a clear overview of the project's outcomes, and demonstrate how its technological solutions can be used to improve the design of product-service systems and the management of product-service life cycles.
