Urban Heritage in Divided Cities Mirjana Ristic, Sybille Frank, 2019-09-18 Urban Heritage in Divided Cities explores the role of contested urban heritage in mediating, subverting and overcoming sociopolitical conflict in divided cities. Investigating various examples of transformations of urban heritage around the world, the book analyses the spatial, social and political causes behind them, as well as the consequences for the division and reunification of cities during both wartime and peacetime conflicts. Contributors to the volume define urban heritage in a broad sense, as tangible elements of the city, such as ruins, remains of border architecture, traces of violence in public space and memorials, as well as intangible elements like urban voids, everyday rituals, place names and other forms of spatial discourse. Addressing both historic and contemporary cases from a wide range of academic disciplines, contributors to the book investigate the role of urban heritage in divided cities in Africa, Asia, the Americas, Europe and the Middle East. Shifting focus from the notion of urban heritage as a fixed and static legacy of the past, the volume demonstrates that the concept is a dynamic and transformable entity that plays an active role in inquiring, critiquing, subverting and transforming the present. Urban Heritage in Divided Cities will be of great interest to academics, researchers and students in the fields of cultural studies, sociology, the political sciences, history, human geography, urban design and planning, architecture, archaeology, ethnology and anthropology. The book should also be essential reading for professionals who are involved in governing, planning, designing and transforming urban heritage around the world.

The Color of Precision Medicine Shirley Sun, Zoe Ong, 2024-04-23 Will genome-based precision medicine fix the problem of race/ethnicity-based medicine? To answer this question, Sun and Ong propose the concept of racialization of precision medicine, defined as the social processes by which racial/ethnic categories are incorporated (or not) into the development, interpretation, and implementation of precision medicine research and practice. Drawing on interview data with physicians and scientists in the field of cancer care, this book addresses the following questions: Who are the racializers in precision medicine, how and why do they do it? Under what conditions do clinicians personalize medical treatments in the context of cancer therapies? The chapters elucidate different ways in which racialization occurs and reveal that there exists an inherent contradiction in the usage of race/ethnicity as precision medicine moves from bench to bedside. The relative resources theory is proposed to explain that whether race/ethnicity-based medicine will be replaced by genomic medicine depends on the resources available at the individual and systemic levels. Furthermore, this book expands on how racialization happens not only in pharmacogenomic drug efficacy studies, but also in drug toxicity studies and cost-effectiveness studies. An important resource for clinicians, researchers, public health policymakers, health economists, and journalists on how to deracialize precision medicine.

蒙古帝国 历史, 2021-11-06 “蒙古”帝国历史研究

The Mongol World Timothy May, Michael Hope, 2022-05-25 Drawing upon research carried out in several different languages and across a variety of disciplines, The Mongol World documents how Mongol rule shaped the trajectory of Eurasian history from Central Europe to the Korean Peninsula, from the thirteenth century to the fifteenth century. Contributing authors consider how intercontinental environmental, economic, and intellectual trends affected the Empire as a whole and, where appropriate, situate regional political, social, and religious shifts within the context of the broader Mongol Empire. Issues pertaining to the Mongols and their role within the societies that they conquered therefore take precedence over the historical narrative of the societies that they conquered. Alongside the formation, conquests, administration, and political structure of the Mongol Empire, the second section examines archaeology and art history, family and royal households, science and exploration, and religion, which provides greater insight into the social history of the Empire -- an aspect often neglected by traditional dynastic and political histories. With 58 chapters written by both senior and early-career scholars, the volume is an essential resource for all students and scholars who study the Mongol Empire from its origins to its disintegration and legacy.

Empire of Sacrifice Jon Pahl, 2012-06 It is widely recognized that American culture is both exceptionally religious and exceptionally violent. Americans participate in religious communities in high numbers, yet American citizens also own guns at rates far beyond those of citizens in other industrialized nations. Since September 11, 2001, U.S. scholars have understandably discussed religious violence in terms of terrorist acts, a focus that follows U.S. policy. Yet, according to Jon Pahl, to identify religious violence only with terrorism fails to address the long history of American violence rooted in religion throughout the country's history. In Empire of Sacrifice, Pahl explains how both of these distinctive features of American culture work together by exploring how constructions along the lines of age, race, and gender have operated to centralize cultural power across American civil or cultural religions in ways that don't always appear to be “religious” at all. Pahl traces the development of these forms of systemic violence throughout American history and focuses an intense light on the complex and durable interactions between religion and violence in American history, from Puritan Boston to George W. Bush's Baghdad.

A World Without Email Cal Newport, 2021-03-02 New York Times bestseller! From New York Times bestselling author Cal Newport comes a bold vision for liberating workers from the tyranny of the inbox--and unleashing a new era of productivity. Modern knowledge workers communicate constantly. Their days are defined by a relentless barrage of incoming messages and back-and-forth digital conversations--a state of constant, anxious chatter in which nobody can disconnect, and so nobody has the cognitive bandwidth to perform substantive work. There was a time when tools like email felt cutting edge, but a thorough review of current evidence reveals that the hyperactive hive mind workflow they helped create has become a productivity disaster, reducing profitability and perhaps even slowing overall economic growth. Equally worrisome, it makes us miserable. Humans are simply not wired for constant digital communication. We have become so used to an inbox-driven workday that it's hard to imagine alternatives. But they do exist. Drawing on years of investigative reporting, author and computer science professor Cal Newport makes the case that our current approach to work is broken, then lays out a series of principles and concrete instructions for fixing it. In A World without Email, he argues for a workplace in which clear processes--not haphazard messaging--define how tasks are identified, assigned and reviewed. Each person works on fewer things (but does them better), and aggressive investment in support reduces the ever-increasing burden of administrative tasks. Above all else, important communication is streamlined, and inboxes and chat channels are no longer central to how work

unfolds. The knowledge sector's evolution beyond the hyperactive hive mind is inevitable. The question is not whether a world without email is coming (it is), but whether you'll be ahead of this trend. If you're a CEO seeking a competitive edge, an entrepreneur convinced your productivity could be higher, or an employee exhausted by your inbox, A World Without Email will convince you that the time has come for bold changes, and will walk you through exactly how to make them happen.

Decolonising the University Gurminder K. Bhambra,Dalia Gebrial,Kerem Nişancioğlu,2018 A must-read for anyone interested in enhancing a historical understanding of our present through a consideration of what it means to decolonize.--Priyamvada Gopal, University of Cambridge In 2015, students at the University of Cape Town demanded the removal of a statue of Cecil Rhodes, the imperialist, racist business magnate, from their campus. Their battle cry, #RhodesMustFall, sparked an international movement calling for the decolonization of universities all over the world. Today, as the movement develops beyond the picket line, how might it go on to radically transform the terms upon which universities exist? In this book, students, activists, and scholars discuss the possibilities and the pitfalls of doing decolonial work in the heart of the establishment. Subverting curricula, demanding diversity, and destroying old boundaries, this is a radical call for a new era of education. Chapters include: *Rhodes Must Fall: Oxford and Movements for Change (Dalia Febrial) *Race and the Neoliberal University ((John Holmwood) *Black/Academia (Robbie Shilliam) *The Challenge for Black Studies in the Neoliberal University (Kehinde Andrews) *Open Initiatives for Decolonising the Curriculum (Pat Lockley) *Decolonising Education: A Pedagogic Intervention (Carol Azumah Dennis) *Understanding Eurocentrism as a Structural Problem of Undone Science (William Jamal Richardson) As the book's insightful Introduction states, Taking colonialism as a global project as a starting point, it becomes difficult to turn away from the Western university as a key site through which colonialism--and colonial knowledge in particular--is produced, consecrated, institutionalized and naturalized. Offering resources for students and academics to challenge and resist colonialism inside and outside the classroom, Decolonizing the University provides the tools for radical change in educational disciplines, pedagogies, and institutions.
