The September 11 Photo Project Michael Feldschuh, 2002-04-16 "I witnessed the fall of the burning towers and death of thousands of people just blocks from where I live. I had taken my camera with me that morning and in a crowd of people took photos while in deep shock, fearing for the lives of those trapped and the rescue workers rushing to save them. I have never felt so helpless in my life."--Michael Feldschuh During the three months that the

September 11 Photo Project was on display at a donated gallery in New York City's SoHo neighborhood, more than forty thousand people visited the space to view the photos and read the words of the project's contributors. The photos in this book, selected from the submissions of more than five hundred photographers, young and old, amateur and professional, give a permanent voice to those who made the September 11 Photo Project what it is: an attempt to build new understanding from the ashes of what has been. These photographs are presented in the following pages with the words of the photographers, as they appeared in the gallery. The perspectives represented on the gallery walls were as diverse as the photos were haunting. Many visitors went away from the exhibit with a greater understanding of what had occurred and were able to begin the healing of the deep wounds of losing friends and neighbors, of witnessing unfathomable atrocity, of feeling that there was no way to help. Together in this book, these words and images lend insight into this calamitous event and our world as it changed in those terrifying moments on a sunny September morning. The SoHo gallery is closed, but the project continues; the collection has embarked on a nation-wide tour. The September 11 Photo Project will use its proceeds from the sale of this book to continue its mission, and to support the New York City Firefighters Burn Center Foundation.

*A Mosaic of Computational Topics: from Classical to Novel* M.H. ter Beek, M. Koutny, G. Rozenberg, 2020-11-20 This book, *A Mosaic of Computational Topics: from Classical to Novel*, is a collection of papers published to honor Professor Jetty Kleijn on the occasion of her 65th birthday. The scope and reach of her research is truly broad. She has made significant and lasting contributions in several research areas, both through the solving of challenging problems and in her pioneering of new research directions. She has published influential papers contributing to the foundations of computer science, in particular, in the area of formal languages and automata theory; to concurrency theory, in particular, Petri nets; and to natural computing, in particular bio-inspired computing and the computational modeling of bio-processes. A significant part of Professor Kleijn's research portfolio is interdisciplinary, including her work on the Petri net modeling of biological processes and the development of novel models of information processing in bio-systems such as reaction systems. She is also passionately engaged in promoting the involvement of women in computer science. Jetty and her work are well-recognized by the scientific community, a fact demonstrated by the enthusiastic response to the invitation to contribute to this book, and the 14 carefully refereed papers collected together here explore a number of research topics that are either directly or indirectly related to research directions pursued by Jetty Kleijn in the course of her career.
