*Visual Notetaking* James David Rockefeller, Notetaking means to record information obtained from other sources (lectures, books, Internet) in a systematic manner. The practice of notetaking allows students to review material without relying solely on their memories. Not all students have good notetaking skills, and some would argue that the traditional method of notetaking is not the most suitable method for all students. The Visual Notetaking Strategy is defined as the process of representing information non-linguistically. This means through drawings or pictures. It can be simple, using sketches or doodles, or more complex, using mind mapping or concept maps as representations. Notetaking is a skill that takes some practice, but it makes a tremendous difference in grades and - more importantly - improves the ability to learn and feel successful.
