Pro SharePoint 2010 Solution Development Ed Hild,Chad Wach,2010-08-04 This book takes a practical problem-solution approach to common business challenges. You'll not only encounter interesting code samples, but also see how to combine these examples with the Microsoft collaboration platform's services. The book's solutions focus on using Visual Studio 2008 and its built-in Office development tools to construct the user interface layer. And solutions can interact with SharePoint as a service provider, taking advantage of SharePoint's many collaboration features like document repositories, collaboration sites, and search functions. This book is unique because it starts with challenges that end users deal with every day when using the Microsoft collaboration platform to support business processes. The solutions are presented as hypothetical business challenges of a fictional company. By presenting the examples in this context, author Ed Hild makes it easier to relate to the challenges and solution value. The goal of these examples is to build applications that apply the benefits of the Office desktop interface to the richness of SharePoint collaboration features. This book will help you develop real-world solutions to complex business problems and challenges.

Active and Healthy Aging and Quality of Life: Interventions and Outlook for the Future Yulan Lin,Waqas Sami,Mila Nu Nu Htay,Sudip Bhattacharya,2024-04-15 The continuous growth of older adult populations, as a consequence of demographic changes, is a huge challenge. To prevent

costly and negative impacts effects on the population as a whole, it is crucial that societies increase their knowledge of promoting good health among older adults, to promote good health and a better quality of life in their later years. Active aging is the process of optimizing opportunities for health, participation, and security in order to enhance quality of life as people age. An active and healthy life has remained one of the most important aspirations for all people, both young and older adults alike. This ambition has become a genuine possibility for many due to a rising life expectancy among people of diverse attributes across the world. While celebrating longer life and with more financial security in later life than ever before, we need to challenge how these aspirations can be sustained, through our own behavioural responses and through public policy, institutional reforms, and innovations. The challenge is to identify, recommend, and promote strategies and interventions that stimulate and sustain the activity, independence, and health of people of all ages, especially older adults and, in the process, promote the well-being and quality of life of people and make public welfare systems more sustainable.
