Sizing Riprap for the Protection of Approach Embankments & Spur Dikes and Limiting the Depth of Scour at Bridge Piers & Abutments Ruh-Ming Li,1989 This report presents a review of published literature on riprap design technology and examines Arizona case histories of riprap performance. The literature review grouped the factors affecting riprap design into hierarchical categories relative to scale. The four factors identified include: riprap properties, site characteristics, hydraulic and sediment transport conditions, and river response. Eleven case histories from documentation supplied by the Arizona Department of Transportation (ADOT) and the U.S. Department of Agriculture, Soil Conservation Service (SCS) are examined. The review of Arizona case histories is intended to provide the basis for understanding the dominant river processes associated with riprap protection measures. The literature review and case histories indicate a set of design requirements to be considered when designing riprap revetment. Volume II presents the design procedure.

Estimating Building Costs Calin M. Popescu,Kan Phaobunjong,Nuntapong Ovararin,2003-04-22 Companies live or die on the basis of estimating their costs. Preparing estimates and bidding for new jobs is a complex and often costly process. There is no substitute for on the job training -- until now. Drawing on the authors' combined experience of more than 70 years, *Estimating Building Costs* presents state-of-the-art principles, practices, and techniques for assessing these expenditures that can be applied regardless of changes in the costs of materials, equipment, and labor. The book is an efficient and practical tool for developing contracts or controlling project costs. The authors cover the major components of the direct cost: estimating procedures and cost trends related to materials, construction equipment, and skilled and unskilled labor. They describe various types of building estimates encountered during the lifecycle of a project, as well as the role and accuracy of each. The book provides an overview of the industry, cost indexes in use, approaches to preparing a detailed estimate, and an in-depth description of the organization and function of the estimating group. Including CSI Master Format and UniFormat codes, estimating forms, a list of available estimating software packages, a detailed construction site and investigation report, the book provides a cost estimating methodology that readers can tailor to their own organizational needs.
