Visions and Concepts for Education 4.0 Michael E. Auer,Dan Centea,2021-02-05 This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference’s main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between ‘pure’ scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

Basics Interactive Design: User Experience Design Gavin Allanwood,Peter Beare,2014-04-24 By putting people at the centre of interactive design, user experience (UX) techniques are now right at the heart of digital media design and development. As a designer, you need to create work that will impact positively on everyone who is exposed to it. Whether it's passive and immutable or interactive and dynamic, the success of your design will depend largely on how well the user experience is constructed. User Experience Design shows how researching and understanding users' expectations and motivations can help you develop effective, targeted designs. The authors explore the use of scenarios, personas and prototyping in idea development, and will help you get the most out of the latest tools and techniques to produce interactive designs that users will love. With practical projects to get you started, and stunning examples from some of today's most innovative studios, this is an essential introduction to modern UXD.

Globalization and Sense-Making Practices Simi Malhotra,Zahra Rizvi,Shraddha A. Singh,2023-09-11 This book presents a critical analysis of sense-making practices through an exploration of acoustic, creative, and artistic spaces. It studies how local cultures of sight, hearing, smell, taste, and touch are impacted by global discourses and media, such as television, popular music, digital media, and literature. The authors look at sense-making practices and spatial discourses through an interconnected discussion on thought and experience that seeks to present a multidimensional cartography

of the global, the local, and the glocal, to closely analyze the phenomenon of globalization. The volume is an investigation of the possibilities of alternate, sustainable modes of being and existing in a world which requires a unified, ethical, biopolitical worldview that challenges the disparity of its fragments while speculating on their synesthetic conditionality. A unique contribution, the book will be of interest to scholars and researchers of English literature, media studies, cultural studies, literary cultures, post-colonial studies, globalization studies, philosophy, critical theory, sociology, and social anthropology.

The Use of Video Technologies in Refereeing Football and Other Sports Manuel Armenteros, Anto J. Benitez, Miguel Ángel Betancor, 2019-11-25 For a long time, various different lobbying sectors have claimed that the use of video technology is an effective aid in decision-making. Now the IFAB has taken a historic step in the approval of experiments on the use of video to provide support to football refereeing. *The Use of Video Technologies in Refereeing Football and Other Sports* analyses the capacity of audio-visual technology from different perspectives to help understand the best implementation of the Video Assistant Referee (VAR) system in football and, more generally, in other sports. This book addresses in-depth interdisciplinary viewpoints on the need and the opportunity of the implementation procedures regarding how to use it, considering that it could lead to very important changes. The book goes on to examine various approaches to the most interesting topics for players, amateurs, coaches, referees and referees coaches. Offering viewpoints from both academics and professionals, this new volume addresses the VAR issue in a multidisciplinary way, analysing the implications of video replay application in football from the perspective of players, coaches, television professionals, referees, amateurs, sports lawyers, media and educators.

Sports Highlights Ray Gamache, 2023-08-28 This expanded second edition traces the development and popularity of the sportscast highlight--the dominant news frame in the crowded medium of electronic sports journalism--as the primary means of communicating about sports and athletes. The book explores the intricate relationships among media producers, sports leagues and organizations, and audiences, and explains that sportscast highlights are not a recent development. They were often used within a news context in every medium--from early news film actualities and newsreels to network and cable television to today's new media platforms. New to this edition are three chapters that explore developments in sports media from cultural, economic and technological perspectives. An obsession with highlights has seen video replay increasingly used to adjudicate sporting events, marking a new level of reliance on technology. The media's quest for greater certitude and integrity corresponds with the rise of sponsorship of pro teams by gambling operators--with sports betting ads and on-screen odds now routinely appearing in sportscasts. Long-form sports documentaries have become popular, often highlighting a fascination with firsts--rooted in notions of human conquest over nature--that has remained an important source of sports mythmaking.

Independent Chinese Documentary L. Robinson, 2013-01-27 The rise of independent documentary film production is the most radical development in the contemporary Chinese mediascape. This book is a sustained examination of Chinese independent documentary in relation to one of its central principles: xianchang, or being 'on the scene'.
