Children's Eyewitness Memory Stephan J. Ceci, Michael P. Toglia, David F. Ross, 2012-12-06

Memory and Suggestibility in the Forensic Interview Mitchell L. Eisen, Jodi A. Quas, Gail S. Goodman, 2001-09-01 Memories are the ultimate foundation of testimony in legal settings ranging from criminal trials to divorce mediations and custody hearings. Yet the last decade has seen mounting evidence of various ways in which the accuracy of memories can be distorted on the one hand and enhanced on the other. This book offers a long-awaited comprehensive and balanced overview of what we now understand about children's and adults' eyewitness capabilities--and of the important practical and theoretical implications of this new understanding. The authors, leading clinicians and behavioral scientists with diverse training experiences and points of view, provide insight into the social, cognitive, developmental, and legal factors that affect the accuracy and quality of information obtained in forensic interviews. Armed with the knowledge these chapters convey, practitioners in psychology, psychiatry, social work, criminology, law, and other relevant fields will be better informed about the strengths and limitations of witnesses' accounts; researchers will be better poised to design powerful new studies. *Memory and Suggestibility in the Forensic Interview* will be a crucial resource for anyone involved in elucidating, interpreting, and reporting the memories of others.

Child Sexual Abuse Margaret-Ellen Pipe, Michael E. Lamb, Yael Orbach, Ann-Christin Cederborg, 2013-05-13 First Published in 2007. Routledge is an imprint of Taylor & Francis, an informa company.

Developmental Spans in Event Comprehension and Representation Paul van den Broek, Patricia J. Bauer, Tammy Bourg, 2013-12-16 This book is about building metaphorical bridges--all sorts of bridges. At the most basic level, it concerns the bridges that individuals build to understand the events that they experience--the bridges that connect the events in the mind's eye. At another level, it is about bridges that interconnect findings and theoretical frameworks concerning event comprehension and representation in different age groups, ranging from infancy to adulthood. Finally, it is about building bridges between researchers who share interests, yet may not ordinarily even be aware of each other's work. The success of the book will be measured in terms of the extent to which the contributors have been able to create a picture of the course of development across a wide span in chronological age, and across different types of events, from the fictional to the actual. The individuals whose work is represented in this book conduct their work in a shared environment--they all have an intellectual and scholarly interest in event comprehension and representation. These interests are manifest in the overlapping themes of their work. These include a focus on how people come to temporally integrate individual snapshots to form a coherent event that unfolds over time, to understand cause and effect, and to appreciate the role of the goal of events. Another overlapping theme involves the possibility of individual differences. These themes are apparent in work on the early development of representations of specific episodes and autobiographical memories, and comprehension of complex events such as stories involving multiple characters and emotions. The editors of this volume had two missions: * to create a development span by bringing together researchers working from infancy to adulthood, and * to create a bridge between individuals working from within the text comprehension perspective, within the naturalistic perspective, and with laboratory analogues to the naturalistic perspective. Their measure of success will be the extent to which they have been able to create a picture of the course of development across a wide span in chronological age, and across different types of

events--from fictional to actual.

Representation, Memory, and Development Nancy L. Stein, Patricia J. Bauer, Mitchell Rabinowitz, George Mandler, 2014-05-12 A festschrift to honor Jean Mandler, this volume contains contributions from leading scholars focusing on the child's development of memory, visual representation, and language. It is appropriate for students and researchers in cognitive psychology, language acquisition, and memory.

The Self and Memory Denise R. Beike, James M. Lampinen, Douglas A. Behrend, 2004-11 How we think of ourselves depends largely on what we remember from our lives, and what we remember is biased in many ways by how we think of ourselves. The complex interplay of the self and memory is the topic of this volume.

Online Terrorist Propaganda, Recruitment, and Radicalization John R. Vacca, 2019-07-30 Online Terrorist Propaganda, Recruitment, and Radicalization is most complete treatment of the rapidly growing phenomenon of how terrorists' online presence is utilized for terrorism funding, communication, and recruitment purposes. The book offers an in-depth coverage of the history and development of online footprints to target new converts, broaden their messaging, and increase their influence. Chapters present the emergence of various groups; the advancement of terrorist groups' online presences; their utilization of video, chat room, and social media; and the current capability for propaganda, training, and recruitment. With contributions from leading experts in the field—including practitioners and terrorism researchers—the coverage moves from general factors to specific groups practices as relate to Islamic State of Iraq and the Levant (ISIL), and numerous other groups. Chapters also examine the lone wolf phenomenon as a part of the disturbing trend of self-radicalization. A functional, real-world approach is used regarding the classification of the means and methods by which an online presence is often utilized to promote and support acts of terrorism. Online Terrorist Propaganda, Recruitment, and Radicalization examines practical solutions in identifying the threat posed by terrorist propaganda and U.S. government efforts to counter it, with a particular focus on ISIS, the Dark Web, national and international measures to identify, thwart, and prosecute terrorist activities online. As such, it will be an invaluable resources for intelligence professionals, terrorism and counterterrorism professionals, those researching terrorism funding, and policy makers looking to restrict the spread of terrorism propaganda online.

Knowing and Remembering in Young Children Robyn Fivush, Judith A. Hudson, 1990-11-30 A 1990 assessment of the cognitive abilities of children and the variables affecting memory.

Memory and Testimony in the Child Witness Maria S. Zaragoza, 1995 This volume of carefully edited papers from psychological researchers in the United States and in Great Britain recounts the present state of this work. This is a useful over-view of the subject at today's date. --AR Brownlie in Science & Justice Comprehensive and carefully edited, this insightful volume is a must read for anyone involved with children's testimony. Leading scholars in the field examine and integrate research and practice on assessing and enhancing the quality of eyewitness testimony in children. The first section examines factors that contribute to the accuracy and reliability of such testimony, including the effects of extended delays, repeated questioning, and exposure to leading questions. The second section describes techniques that have been developed to improve the quality of children's testimony, such as anatomical dolls and interviewing techniques, and discusses their empirical and theoretical underpinnings. The final chapter focuses on policy issues, including psychological research to guide legal reform in accommodating child witnesses. Interdisciplinary in nature, Memory and Testimony in the Child Witness should be in the professional

toolkit of all psychologists, psychiatrists, social workers, and attorneys working with children's testimony. It also serves as a text in any graduate level course focusing on eyewitness memory, children's competence as witnesses, or psychology and the law.

Understanding Recruitment to Organized Crime and Terrorism David Weisburd, Ernesto U. Savona, Badi Hasisi, Francesco Calderoni, 2020-06-11 This volume provides insights on how recruitment patterns develop for two related types of criminal networks: organized crime and terrorism. It specifically explores the social, situational, psychological, and economic drivers of recruitment. Although organized crime networks and terrorism networks can differ in underlying goals and motivations, this volume demonstrates common drivers in their recruitment, which will provide insights for crime prevention and intervention. The goal of the book is to explore the current knowledge about these common drivers, as well as highlight emerging research, to identify and prioritize a research agenda for scholars, as well as policymakers. The research presented in this work aims to fill existing gaps in the knowledge of recruitment to both organized crime and terrorism. For each area, it provides a systematic review of the existing research on social, psychological, and economic drivers of recruitment. It then presents findings from independent original research aimed to explore new ground not covered in these previous studies. The contributions to this volume were the result of a research project funded by a European Union Horizon 2020 grant, and present a diverse, international mix of expertise and cases. It will be of interest to researchers in criminology and criminal justice, as well as related fields such as sociology, psychology, and international relations. Chapter 13 of this book is available open access under a CC BY 4.0 license.

Memory for Everyday and Emotional Events Nancy L. Stein, Charles J. Brainerd, Barbara Tversky, Peter A. Ornstein, 2018-10-24 The nature of memory for everyday events, and the contexts that can affect it, are controversial topics being investigated by researchers in cognitive, social, clinical, and developmental/lifespan psychology today. This book brings many of these researchers together in an attempt to unpack the contextual and processing variables that play a part in everyday memory, particularly for emotion-laden events. They discuss the mental structures and processes that operate in the formation of memory representations and their later retrieval and interpretation.

Investigative Interviews of Children Debra A. Poole, Michael E. Lamb, 1998-01-01 Interviewing children as part of an investigation is an act that requires great care. Professional interviewers are coming under increasing scrutiny, and their techniques must pass rigorous review by outside agencies, at the same time serving the needs of children. This engagingly written, eye-opening book provides a practical answer to this dilemma. It summarizes the most important recent research and steers the reader away from controversial techniques. The authors, two of the most prominent researchers in this area, cover important topics such as: the strengths and weaknesses of children as witnesses; the current child protection and abuse-investigation crisis; child development and comprehension; and ancillary techniques such as using dolls. They offer a generic protocol for conducting interviews of children and show how it can be customized to specific cases.

Reconstructing the Past: The Role of Psychologists in Criminal Trials Arne Trankell, 1983-02-28 This book contains the papers and panels from the first international conference on Witness Psychology, which was held in Stockholm in September 1981--Preface.

Celebrity Cultures in Canada Katja Lee, Lorraine York, 2016-05-20 *Celebrity Cultures in Canada* is an interdisciplinary collection that explores celebrity phenomena and the ways they have operated and developed in Canada over the last two centuries. The chapters address a variety of cultural venues—politics, sports, film, and literature—and examine the political,

cultural, material, and affective conditions that shaped celebrity in Canada and its uses both at home and abroad. The scope of the book enables the authors to highlight the trends that characterize Canadian celebrity—such as transnationality and bureaucracy—and explore the regional, linguistic, administrative, and indigenous cultures and institutions that distinguish fame in Canada from fame elsewhere. In historicizing and theorizing Canada's complicated cultures of celebrity, *Celebrity Cultures in Canada* rejects the argument that nations are irrelevant in today's global celebritiescapes or that Canada lacks a credible or adequate system for producing, distributing, and consuming celebrity. Nation and national identities continue to matter—to celebrities, to fans, and to institutions and industries that manage and profit from celebrity systems—and Canada, this collection argues, has a vibrant, powerful, and often complicated and controversial relationship to fame.

Recovered Memories and False Memories Martin A. Conway, 1997 The question of whether memories can be lost, particularly as a result of trauma, and then recovered through psychotherapy has polarised the field of memory research. This is the first volume to bring together leading memory researchers and clinicians with the aim of facilitating a resolution to this question. The volume offers a unique and timely summary of the theories of memory recovery, and how false memories may be created. Some of the first research relating to the phenomenal characteristics of memory recovered is reported in detail, suggesting important avenues for new research. Theories of autobiographical memory, implicit memory, reminiscence, and the effects of repeated recall on memory are included. *Recovered memories and false memories* provides the most current and authoritative thinking in this area, and will be an essential sourcebook for memory researchers and psychotherapists.

Psychological Issues in Eyewitness Identification Siegfried Ludwig Sporer, Roy S. Malpass, Günter Köhnken, 1996 First Published in 1995. Routledge is an imprint of Taylor & Francis, an informa company.

Children of Trauma Thomas W. Miller, 1998 This volume provides clinical theory and practice models for readers along with current concepts in diagnosis and treatment. Consideration of critical issues for the decade provides direction for current and future planning in the diagnosis, treatment, and prevention interventions for children who experience stressful life events.--BOOK JACKET.
