How Collages Reveal Your Deepest Thoughts: A Guide to Consumers' Minds Philipp Pachler, 2013-05-17 A deeper understanding of how consumers think, feel and act is vital to the success of management and provides valuable information for managerial decision making in many areas of business. One key to this understanding is brand knowledge, which is the representation of a brand in consumers' minds. Unfortunately, a substantial amount of relevant knowledge within people's minds is unconscious and cannot be retrieved, accessed and recalled by consumers. As a consequence, certain methods of retrieval are required, such as projective techniques. The method this book works with is the collage technique, an expressive projective method. The aim of this book is to create a multi-layered approach that facilitates the interpretation of collages without the need of any additional information given by the participants, based on metaphor analysis, color theory, a communication model and structural analysis.

The Novice of Saint Dominick Lady Morgan (Sydney), 1807

Slam After Slam with Force Point Pawell Boiew, 2016-10-24 Force Point (Fp) Counting will help you to count your hand directly in contract tricks (the tricks that are above the initial 6 tricks, which are not counted in the game of bridge). The Fp Counting itself is a new low of the Total Tricks, much better than the old one. The sum of both hands contract tricks, yours and your partner, will give to you the game's Play Level (PL). No need evaluations by the time of the initial count, but one of you, who will ask his partner to reveal the exact distribution (between around 500 possible distributions), must apply some tricks' adjustments when a new distribution changes are discovered by the time of the Bidding. When you discover partner's exact shape, you will ask for the exact number of the contract tricks, thus finding your exact PL. Then if the PL = 5.5 you must ask your partner for all of the TOP Honors. With Fp you will be able to discover all of the partner's Aces + Kings + Queens with one only question - one answer! No other bridge system is capable of doing that! Then you have to calculate the final PL, and may ask your partner where are the TOP Honors or directly to choose the final contract. The calculations are for a 7 grader, so the difficult decisions in the game of bridge proved to be a simple arithmetic, not even a math. Using one only SCOR-SCOR Convention for all of your Distribution and Control needs (along with the classical Stayman, of course) will allow to you to see transparently the exact cards and lengths of the suits of your partner before the attack. The Playing is your own responsibility, I can only assist you about the Bidding. On Bidding Contests with 12 TOP Matchpoint scoring, Fp will provide to you no less than 70% (usually close to 80%), but pay attention that on such Contests you will have to bid most difficult distributional games collected around the world. For the love of the Game Force Point Bidding Developer: Mr. Pawell Boiew

Knowledge Transfer between Computer Vision and Text Mining Radu Tudor Ionescu,Marius Popescu,2016-04-25 This ground-breaking text/reference diverges from the traditional view that computer vision (for image analysis) and string processing (for text mining) are separate and unrelated fields of study, propounding that images and text can be treated in a similar manner for the purposes of information retrieval, extraction and classification. Highlighting the benefits of knowledge transfer between the two disciplines, the text presents a range of novel similarity-based learning (SBL) techniques founded on this approach. Topics and features: describes a variety of SBL approaches, including nearest neighbor models, local learning, kernel methods, and clustering algorithms; presents a nearest neighbor model based on a novel dissimilarity for images; discusses a novel kernel for (visual) word histograms, as well as several kernels based on a pyramid representation; introduces an approach based on string kernels for native language identification; contains links for downloading relevant open source code.
