Laser Treatment of Vascular Lesions S. Bard, D.J. Goldberg, 2014-02-18 Today, nearly 60 years after the invention of the first medical laser, multiple laser and light systems exist and are applied in various medical specialties such as dermatology, ophthalmology, and urology. This volume - the first in the series *Aesthetic Dermatology* - focuses on the laser treatment of cutaneous lesions with a vascular target. Each chapter describes a particular laser or light modality and its specific application to a variety of both vascular and nonvascular lesions. Renowned specialists in laser medicine have contributed their expertise, incorporating current evidence-based literature and their own personal treatment recommendations, as well as pearls and perils. The purpose of this book is to explore the options and parameters available to treat cutaneous lesions traditionally responsive to vascular laser therapy and to expand the application to further lesion treatments. Readers who wish to broaden their knowledge and further hone their skills in treating cutaneous vascular lesions with lasers will find this publication a valuable and

comprehensive review.

Stability and Ductility of Steel Structures (SDSS'99) D. Dubin & M.

Iványi, 1999-08-03 With the gradual development of rules for designing against instability the idea emerged, in London, in 1974 to hold an International Colloquium treating every aspect of structural instability of steel structures. There have been 17 International Colloquia Stability Sessions around the world, starting with the first one in Paris in 1972, until with the last one in Nagoya in 1997. In Nagoya it was decided to continue the series of travelling colloquia by launching the Sixth Colloquium in September 1999 with the First Session to be held at the Politehnica University of Timișoara, România, which will be followed by another in the year 2000 at the Gediminas Technical University in Vilnius, Lithuania, a third one during SSRC's Year 2000 Annual Meeting in the US, and a fourth one in Australia or New Zealand. At present important research projects are in progress around the world, like SAC Joint Venture Project in USA, INCO-COPERNICUS RECONS in Europe and others, which are devoted to improve and develop new methods for the safety design of steel structures in seismic zones. Special attention is paid in Europe, USA and Japan to improve the design codes and detailing of seismic resistant steel structures. This was the reason to organise the Session of Nagoya as Stability and Ductility of Steel Structures Colloquium. Romania is also a strong seismic territory and therefore, the topic of the Timișoara Session covered both stability and ductility problems. The technical programme of the SDSS'99 Colloquium in Timișoara has been split into nine working sessions.

A Systemic-Structural Theory of Activity Gregory Bedny, Waldemar

Karwowski, 2006-07-27 The last several decades have demonstrated dramatic technological changes that influence work conditions in all applied domains, including manufacturing, transportation, and human-computer interactions. These changes require new approaches to the study of human performance. Activity theory, in particular has become increasingly popular with those who study human work dynamics. A Systemic-Structural Theory of Activity: Applications to Human Performance and Work Design discusses general activity theory (AT) and introduces systematic structural activity theory (SSAT) and its applications to the study of human work. The book contains multiple practical examples of systemic-structural theory of activity analyses, including a study of production operations in the manufacturing environment, system safety evaluation, work improvement, equipment design, and robot system performance. It also provides examples of the design of human/computer interaction tasks, training, efficiency, work motivation, fatigue, personality, and individual style of performance. This book addresses the wide audience of psychologists working in fields such as Industrial/Organizational Psychology, Experimental, and Cognitive Psychology. It can also be of use to computer science specialists and other professionals who study human work activity and education.
