WinZip for Beginners Brian Howard, 1998 The Internet has a problem--large files quickly clog its pipes. Compression utilities, which zip large files into much smaller files, help remedy this. WinZip for Beginners walks through zipping and unzipping files with simple explanations and clear, illustrated, step-by-step instructions. The CD-ROM contains a fully featured evaluation version of WinZip 6.3.

Introducing Geographic Information Systems with ArcGIS Michael D. Kennedy, 2013-03-20 An integrated approach that combines essential GIS background with a practical workbook on applying the principles in ArcGIS 10.0 and 10.1

Introducing Geographic Information Systems with ArcGIS integrates a broad introduction to GIS with a software-specific workbook for Esri's ArcGIS. Where most courses make do using two separate texts, one covering GIS and another the software, this book enables students and instructors to use a single text with an integrated approach covering both in one volume with a common vocabulary and instructional style. This revised edition focuses on the latest software updates—ArcGIS 10.0 and 10.1. In addition to its already successful coverage, the book allows students to experience publishing maps on the Internet through new exercises, and introduces the idea of programming in the language Esri has chosen for applications (i.e., Python). A DVD is packaged with the book, as in prior editions, containing data for working out all of the exercises. This complete, user-friendly coursebook:

- Is updated for the latest ArcGIS releases—ArcGIS 10.0 and 10.1
- Introduces the central concepts of GIS and topics needed to understand spatial information analysis
- Provides a considerable ability to operate important tools in ArcGIS
- Demonstrates new capabilities of ArcGIS 10.0 and 10.1
- Provides a basis for the advanced study of GIS and the study of the newly emerging field of GIScience

Introducing Geographic Information Systems with ArcGIS, Third Edition is the ideal guide for undergraduate students taking courses such as Introduction to GIS, Fundamentals of GIS, and Introduction to ArcGIS Desktop. It is also an important guide for professionals looking to update their skills for ArcGIS 10.0 and 10.1.

An Engineer's Introduction to Programming with MATLAB 2019 Shawna Lockhart, Eric Tilleson, 2019-06 This book accomplishes two things simultaneously: it teaches you to use the latest version of the powerful MATLAB programming environment, and it teaches you core, transferable programming skills that will make you feel at home with most procedural programming languages. MATLAB has been in existence for more than 30 years and is used by millions of engineers, scientists, and students worldwide, both for its depth and its easy usability. With dozens of specialized toolboxes available beyond the core program, as well as its companion program Simulink for simulation and model-based design, MATLAB can serve as an invaluable aid throughout your career. Unlike many

MATLAB books, ours assumes no prior experience in computer programming. Using an approachable tone, we take you from the simplest variables through complex examples of data visualization and curve fitting. Each chapter builds on the last, presenting an in-depth tutorial on a focused concept central to programming, using the MATLAB language, but applicable to countless other popular and in-demand languages such as C++, Java, JavaScript, R, and Python. We'll ask you to perform short exercises as we work through each chapter, followed by more end-to-end exercises and mental challenges at the chapter's end. As the complexity of the concepts increases, the exercises present increasingly real-world engineering challenges to match. Once you've completed *An Engineer's Introduction to Programming with MATLAB 2019*, you will have a solid foundation in computer programming forms and concepts and a comfort with the MATLAB environment and programming language. We believe that you'll enjoy both gaining and having that knowledge, and that you'll be able to use it almost immediately with your other coursework.

Videos The authors of this book have recorded instructional videos to accompany this book. These videos allow you to see many of the instructions given in the tutorials being executed in MATLAB itself. These videos should be of particular help to visual learners. This book includes

- Step-by-step tutorials written to help the novice user become proficient using MATLAB
- A Getting Started chapter for configuring MATLAB for use with the tutorials
- Organization and a level suitable for a first year introductory engineering course
- Updates for the MATLAB 2019a release.
- Tips offering suggestions and warnings as you progress through the book
- Key Terms and Key Commands listed to recap important topics and commands learned in each tutorial
- An index to help you

easily look up topics • Exercises at the end of each tutorial providing challenges to a range of abilities.

Dynamical Systems, Bifurcation Analysis and Applications Mohd Hafiz Mohd,Norazrizal Aswad Abdul

Rahman, Nur Nadiah Abd Hamid, Yazariah Mohd Yatim, 2019-10-11 This book is the result of Southeast Asian Mathematical Society (SEAMS) School 2018 on Dynamical Systems and Bifurcation Analysis (DySBA). It addresses the latest developments in the field of dynamical systems, and highlights the importance of numerical continuation studies in tracking both stable and unstable steady states and bifurcation points to gain better understanding of the dynamics of the systems. The SEAMS School 2018 on DySBA was held in Penang from 6th to 13th August at the School of Mathematical Sciences, Universiti Sains Malaysia. The SEAMS Schools are part of series of intensive study programs that aim to provide opportunities for an advanced learning experience in mathematics via planned lectures, contributed talks, and hands-on workshop. This book will appeal to those postgraduates, lecturers and researchers working in the field of dynamical systems and their applications. Senior undergraduates in Mathematics will also find it useful.
