The Right of the Child to a Clean Environment
Agata Fijalkowski,Malgosia Fitzmaurice,2017-11-30
This title was first published in 2000: A
discussion on the right of a child to a clean
environment. It links two important contemporary
issues: human rights and the environment. The
volume consists of the extended versions of some
of the papers which were presented at a workshop
on The Right of a Child to a Clean Environment,
held at Queen Mary and Westfield College,
University of London, in 1997, and there are also
some additional contributions. The workshop
participants included Michael Anderson and Sylvia
Bluck, Harry Post, Holly Cullen and Olufemi Elias.
The additional contributors include Veronic
Wright, Maria G. Doglioli and Soledad Aguilar.
There are essays on general issues, selected case
studies and annexes.

Clean Up Your Finances (Collection) Liz Weston,2013-08-08 Struggling with debt? Get realistic help that's actually useful, from Liz Weston, one of the most popular and respected personal finance experts! Today, people struggling with debt have far fewer options: lenders are stingier, which makes it harder to avert disaster, or to recover from setbacks like foreclosure, short sales, or bankruptcy. (Meanwhile, people with good credit have more options than ever, including some of the lowest interest rates in decades.) You need an up-to-date guide that can help you assess options, find help, discover opportunities, and take action that works. Liz Weston's Deal with Your Debt, Updated and Revised Edition is that guide. You'll learn which debts can actually help build wealth over time, and which are simply toxic. Weston offers practical guidelines for assessing how much debt is safe -- and compassionate, realistic guidance if you've gone beyond the safety zone. Today, a good credit score is essential for getting decent terms on credit--or for getting credit at all. But that's just the beginning: Your credit score rating can be reviewed by everyone from employers to cell phone carriers. Your Credit Score, Fourth Edition thoroughly covers brand-new laws changing everything from how your credit score can be used to how you can communicate with collectors. This edition also adds simple graphics revealing exactly how much skipped payments, bankruptcies, and other actions will lower your credit ratings, and how long it takes to rebound. Weston updates

her expert guidance on using FICO 08 to raise your score, fighting lower limits and higher rates, maintaining the right mix of cards and balances, bouncing back from bad credit, choosing credit solutions that help, not hurt… and much more!

A Data Scientist's Guide to Acquiring, Cleaning, and Managing Data in R Samuel E. Buttrey,Lyn R. Whitaker,2017-12-18 The only how-to guide offering a unified, systemic approach to acquiring, cleaning, and managing data in R Every experienced practitioner knows that preparing data for modeling is a painstaking, time-consuming process. Adding to the difficulty is that most modelers learn the steps involved in cleaning and managing data piecemeal, often on the fly, or they develop their own ad hoc methods. This book helps simplify their task by providing a unified, systematic approach to acquiring, modeling, manipulating, cleaning, and maintaining data in R. Starting with the very basics, data scientists Samuel E. Buttrey and Lyn R. Whitaker walk readers through the entire process. From what data looks like and what it should look like, they progress through all the steps involved in getting data ready for modeling. They describe best practices for acquiring data from numerous sources; explore key issues in data handling, including text/regular expressions, big data, parallel processing, merging, matching, and checking for duplicates; and outline highly efficient and reliable techniques for documenting data and recordkeeping, including audit trails, getting data back out of R, and more. The only single-source guide to R data and its preparation, it describes best practices for acquiring, manipulating, cleaning, and maintaining data Begins with the basics and walks readers through all the steps necessary to get data ready for the modeling process Provides expert guidance on how to document the processes described so that they

are reproducible Written by seasoned professionals, it provides both introductory and advanced techniques Features case studies with supporting data and R code, hosted on a companion website A Data Scientist's Guide to Acquiring, Cleaning and Managing Data in R is a valuable working resource/bench manual for practitioners who collect and analyze data, lab scientists and research associates of all levels of experience, and graduate-level data mining students.

Just Responsibility Brooke A. Ackerly,2018-02-01 It has been well-established that many of the injustices that people around the world experience every day, from food insecurity to unsafe labor conditions and natural disasters, are the result of wide-scale structural problems of politics and economics. These are not merely random personal problems or consequences of bad luck or bad planning. Confronted by this fact, it is natural to ask what should or can we do to mitigate everyday injustices? In one sense, we answer this question when we buy the local homeless street newspaper, decide where to buy our clothes, remember our reusable bags when we shop, donate to disaster relief, or send letters to corporations about labor rights. But given the global scale of injustices related to poverty, environmental change, gender, and labor, can these individual acts really impact the seemingly intractable global social, political, and economic structures that perpetuate and exacerbate them? Moreover, can we respond to injustices in the world in ways that do more than just address their consequences? In

this book, Brooke A. Ackerly both answers the
question of what should we do, and shows that it's
the wrong question to ask. To ask the right
question, we need to ground our normative theory
of global justice in the lived experience of
injustice. Using a feminist critical methodology,
she argues that what to do about injustice is not
just an ethical or moral question, but a political
question about assuming responsibility for
injustice, regardless of our causal responsibility
and extent of our knowledge of the injustice.
Furthermore, it is a matter that needs to be
guided by principles of human rights. As she
argues, while many understand human rights as
political goals or entitlements, they can also
guide political strategy. Her aims are twofold: to
present a theory of what it means to take
responsibility for injustice and for ensuring
human rights, as well as to develop a guide for
how to take responsibility in ways that support
local and global movements for transformative
politics. In order to illustrate her theory and
guide for action, Ackerly draws on fieldwork on
the Rana Plaza collapse in 2013, the food crisis
of 2008, and strategies from 125 activist
organizations working on women's and labor rights
across 26 countries. Just Responsibility
integrates these ways of taking political
responsibility into a rich theory of political
community, accountability, and leadership in which
taking responsibility for injustice itself
transforms the fabric of political life.
