Canterbury 2100 Dirk Flinthart,2009-05-01 Six hundred years ago, a group of pilgrims made their way to Canterbury, and Geoffrey Chaucer created one of the great works of English literature. A hundred years from now, a nuclear-powered steam train is stopped by a massive storm on its journey to Canterbury, the new capital of an England struggling to rise from the ashes of the twenty-first century. As the waters rise with the storm's fury, the weird and wonderful passengers tell the stories of a new age ...

Trail Mix Paulita Kincer,2014-09-28 In the tradition of *Wild* by Cheryl Strayed, comes a novel of two suburban women who decide to hike the Appalachian Trail, escaping their lives as moms and wives in search of nature, adventure, and the ultimate diet plan. How does a woman know what she wants after spending 20 years thinking about her husband and children? Sometimes it takes a distraction from everyday life, time to examine the forest before the trees become clear. With no previous camping experience, Andi and Jess begin the 2100-mile odyssey from Georgia to Maine. The friends figure life on the trail can't possibly be worse than dealing with disgruntled husbands, sullen teens home from college, and a general malaise that has crept up in their daily lives. At the very least, the women are bound to return home thin.

Earth 2100 J. Scott Coatsworth,2024-05-08 Earth on the Cusp of the Twenty-Second Century How the world has changed in the last seventy-six years. In 1948, scientists ran the first computer program, and the Ultimate Car of the Future, the futuristic, three wheeled Davis Divan, debuted. Since then, a succession of inventions—the personal computer, the internet, the World Wide Web, smart phones and social media—have transformed every aspect of our lives. The next seventy-six years will change things too, in ways we can barely even begin to imagine. Culture, climate change, politics and technology will continue to reshape the world. Earth in 2100 will be as unrecognizable to us as today would be to someone from 1948. Eighteen writers tackled this challenge, serving up an amazing array of sci-fi possibilities. From emotional AI's to photosynthetic children, from virtual worlds to a post-urban society, our writers serve up compelling slices of life from an Earth that's just around the corner. So dive in and take a wild ride into these amazing visions of our collective future.

The Library as Place John E. Buschman,Gloria J. Leckie,2007 Libraries, as a component of cultural space, are ubiquitous to almost every society during almost every time period. However, as places of cultural and symbolic and intellectual meaning, they have varied greatly. To capture both aspects, this collection of 14 original papers covers library spaces old and new, real and imagined, large and small, public and private. Contributions range from a consideration of the Garrison library in the British Empire, to the Carnegie library as a social institution, to the imagined library in Buffy the Vampire Slayer. The result is a fascinating look at the library as a physical, social, and intellectual place within the hearts and minds of its clientele and the public at large.
