Excellence, therefore, is not an act but a habit. – Aristotle This quote is indeed very true: Our habits define us and shape our lives. If we excel at what we do, live harmoniously, and are at peace, we can thank the healthy and positive habits we have built over the course of our life. If, however, we are unproductive, addicted to unhealthy practices, and surrounded by chaos, then for that too, we can thank our habits. What if... What if you could transform yourself from head to toe? What if you could achieve success within every single aspect of your life: relationships, family, business, health? Soft Matter at Aqueous Interfaces Peter Lang,Yi Liu,2015-12-24 This book covers the science of interfaces between an aqueous phase and a solid, another liquid or a gaseous phase, starting from the basic physical chemistry all the way to state-of-the-art research developments. Both experimental and theoretical methods are treated thanks to the contributions of a distinguished list of authors who are all active researchers in their respective fields. The properties of these interfaces are crucial for a wide variety of processes, products and biological systems and functions, such as the formulation of personal care and food products, paints and coatings, microfluidic and lab-on-a-chip applications, cell membranes, and lung surfactants. Accordingly, research and expertise on the subject are spread over a broad range of academic disciplines and industrial laboratories. This book brings together knowledge from these different places with the aim of fostering education, collaborations and research progress.

Japanese Encephalitis and West Nile Viruses John Mackenzie,A.D.T. Barrett,V. Deubel,2012-12-06 Japanese encephalitis and West Nile viruses are members of the Japanese encephalitis serological group of the genus Flavivirus and therefore closely related genetically and antigenically. They share a number of properties, including the use of birds as their major wildlife maintenance host and Culicine mosquitoes for transmission, and they are both associated with severe human disease, as well as fatal infections in horses. The emergence of these two viruses, and their well-established propensity to colonise new areas, make it timely to re-examine their ecology, biology, molecular structure, replication and epidemiology, and these therefore provide the focus of this volume.
