Beyond Dogma Jawid Mojaddedi,2012-06-08 Despite Rumi's (d. 1273) recent emergence as a best-selling poet in the English-speaking world, fundamental questions about his teachings, such as the relationship of his Sufi mysticism to the wider Islamic religion, remain contested. In this groundbreaking study, Jawid Mojaddedi reaches to the heart of the matter by examining Rumi's teachings on walaya (Friendship with God) in light of earlier discourse in the wider Sufi tradition and juridico-theological Islam. Walaya is not only central to Rumi's teachings, but forms the basis for the celebration of intimacy, communication with the Divine, and transcendence of conventional religiosity in his poetry. And yet walaya is the aspect of Sufism which has proven the most difficult to reconcile with juridico-theological Islam. In addition to its focus on Rumi, *Beyond Dogma* presents a perceptive analysis of the historical development of the discourse on walaya in the formative centuries of Sufism. This period coincides with the time when juridico-theological Islam rose to dominance, as reflected in the harmonizing efforts of theoretical Sufi writings, especially the manuals of the tenth and eleventh centuries. Mojaddedi's analysis facilitates a nuanced and contextualized evaluation of Rumi's teachings on walaya, which had already attracted a range of views before his time: from arguments in favor of its superiority to Prophethood, to guarantees of subordinate deference towards the Prophetic heritage interpreted by juridico-theological scholars. In the process, *Beyond Dogma* enables a fresh evaluation of the influential early Sufi manuals in their historical context, while also highlighting the significance for juridico-theological scholars of fundamental dogma in the process of consolidating their own dominance.

Monuments, Empires, and Resistance Tom D. Dillehay,2007-04-30 From AD 1550 to 1850, the Araucanian polity in

southern Chile was a center of political resistance to the intruding Spanish empire. In this book, Tom D. Dillehay examines the resistance strategies of the Araucanians and how they used mound building and other sacred monuments to reorganize their political and culture life in order to unite against the Spanish. Drawing on anthropological research conducted over three decades, Dillehay focuses on the development of leadership, shamanism, ritual, and power relations. His study combines developments in social theory with the archaeological, ethnographic, and historical records. Both theoretically and empirically informed, this book is a fascinating account of the only indigenous ethnic group to successfully resist outsiders for more than three centuries and to flourish under these conditions.

The Unexpected Exodus Louise Cassels, 2007 In late 1950, amid escalating cold-war tensions, the U.S. Atomic Energy Commission announced plans to construct facilities to produce plutonium and tritium for use in hydrogen bombs. One such facility, the Savannah River Plant, was built at a cost of \$1.3 billion at a site that encompassed more than 315 square miles in South Carolina's Barnwell, Allendale, and Aiken counties. Some fifteen hundred families residing in small communities within the new plant's borders were forced to leave their homes. The largest of the affected towns was Ellenton, in Aiken County, with a population of 760 residents. Detailing the period of evacuation and resettlement from 1950 to 1952, *The Unexpected Exodus* recalls in words and pictures the dramatic personal consequences of the cold war on the American South through the narrative of one uprooted family. Louise Cassels touches on such enduring historical themes as southerners' sense of place and antipathy toward the federal government as she struggles to maintain equilibrium through life-changing circumstances. Throughout the text her extreme pride and patriotism are set against profound feelings of bitterness and loss.

Black Landscapes Matter Walter Hood, Grace Mitchell Tada, 2020-12-09 The question Do black landscapes matter? cuts deep to the core of American history. From the plantations of slavery to contemporary segregated cities, from freedman villages to northern migrations for freedom, the nation's landscape bears the detritus of diverse origins. Black landscapes matter because they tell the truth. In this vital new collection, acclaimed landscape designer and public artist Walter Hood assembles a group of notable landscape architecture and planning professionals and scholars to probe how race, memory, and meaning intersect in the American landscape. Essayists examine a variety of U.S. places—ranging from New Orleans and Charlotte to Milwaukee and Detroit—exposing racism endemic in the built environment and acknowledging the widespread erasure of black geographies and cultural landscapes. Through a combination of case studies, critiques, and calls to action, contributors reveal the deficient, normative portrayals of landscape that affect communities of color and question how public design and preservation efforts can support people in these places. In a culture in which historical omissions and specious narratives routinely provoke disinvestment in minority communities, creative solutions by designers, planners, artists, and residents are necessary to activate them in novel ways. Black people have built and shaped the American landscape in ways that can never be fully known. *Black Landscapes Matter* is a timely and necessary reminder that without recognizing and reconciling these histories and spaces, America's past and future cannot be understood.

After the Final Curtain Matt Lambros, 2016 Most of the time, there is nothing remarkable about a movie theater today; but that wasn't always the case. When the great American movie palaces began opening in the early 20th century, they were some of the most lavish, stunning buildings ever seen. However, they wouldn't last -- with the advent of in-home television, theater companies found it harder and harder to keep them open. Some were demolished, some were converted, and some remain empty to this day. *After the Final Curtain: The Fall of the*

American Movie Theatre will take you through 24 of these magnificent buildings, revealing the beauty that remains years after the last ticket was sold.

Bienville's Dilemma Richard Campanella, 2008 All New Orleans' glories, tragedies, contributions, and complexities can be traced back to the geographical dilemma Bienville confronted in 1718 when selecting the primary location of New Orleans. Bienville's Dilemma presents sixty-eight articles on the historical geography of New Orleans, covering the formation and foundation of the city, its urbanization and population, its humanization into a place of distinction, the manipulation of its environment, its devastation by Hurricane Katrina, and its ongoing recovery.

Bourbon Street Richard Campanella, 2024-01-31 New Orleans is a city of many storied streets, but only one conjures up as much unbridled passion as it does fervent hatred, simultaneously polarizing the public while drawing millions of visitors a year. A fascinating investigation into the mile-long urban space that is Bourbon Street, Richard Campanella's comprehensive cultural history spans from the street's inception during the colonial period through three tumultuous centuries, arriving at the world-famous entertainment strip of today. Clearly written and carefully researched, Campanella's book interweaves world events—from the Louisiana Purchase to World War II to Hurricane Katrina—with local and national characters, ranging from presidents to showgirls, to explain how Bourbon Street became an intriguing and singular artifact, uniquely informative of both New Orleans's history and American society. While offering a captivating historical-geographical panorama of Bourbon Street, Campanella also presents a contemporary microview of the area, describing the population, architecture, and local economy, and shows how Bourbon Street operates on a typical night. The fate of these few blocks in the French Quarter is played out on a larger stage, however, as the internationally recognized brands that Bourbon Street merchants and the city of New Orleans strive to promote both clash with and complement each other. An epic narrative detailing the influence of politics, money, race, sex, organized crime, and tourism, Bourbon Street: A History ultimately demonstrates that one of the most well-known addresses in North America is more than the epicenter of Mardi Gras; it serves as a battleground for a fundamental dispute over cultural authenticity and commodification.

LaserWriter II Tamara Shopsin, 2021-10-19 A WIRED Pick for the 7 Books You Need to Read This Winter and one of Vox's 11 Titles Not to Miss From the incomparable New York Times and New Yorker illustrator Tamara Shopsin, a debut novel about a NYC printer repair technician who comes of age alongside the Apple computer—featuring original artistic designs by the author. LaserWriter II is a coming-of-age tale set in the legendary 90s indie NYC Mac repair shop TekServe—a voyage back in time to when the internet was new, when New York City was gritty, and when Apple made off-beat computers for weirdos. Our guide is Claire, a 19-year-old who barely speaks to her bohemian co-workers, but knows when it's time to snap on an antistatic bracelet. Tamara Shopsin brings us a classically New York novel that couldn't feel more timely. Interweaving the history of digital technology with a tale both touchingly human and delightfully technical, Shopsin brings an idiosyncratic cast of characters to life with a light touch, a sharp eye, and an unmistakable voice. Filled with pixelated philosophy and lots of printers, LaserWriter II is, at its heart, a parable about an apple.
