Roulette, Breaking the Bank and Winning Monster

Peter Zhang, 2016-04-21 Roulette game has been around for centuries and yet gamblers have gone broke just over 2.7% house edge. Now you may laugh at me and comment that I am losing 2.7% at every spin cumulatively. Of course you are right in saying that and you may tell me that it is highly negative expected value in the long run. But can you ignore these facts Roulette will produce winning and losing streaks Roulette will allow gamblers to win big by giving them 36 times of whatever they put straight up If a person goes hot and gets 2 times a number correct he stands to win 36×36 times the amount bet consecutively. Giving you returns of 1296 times or if you just bet 25 dollars which anyone can afford to lose in a casino he will have won 32 thousand 400 dollars or \$32,400. Now with such low house edges anyone can go on a hot streak, but everyone loses. And now if I tell you I have a system that will allow you to take shots at the game of Roulette and if you win you compound your profits and cut losses and take profits then certainly the casinos will a lot fun, a lot entertainment and a hell lot more fun, then would you deny it? In this manual and in the coming pages I am going to convey to you the secrets of my winning system of Roulette, every Roulette player must read this book at least one and what have you got to lose? You are just going to get saved a lot of money and this is an indispensable guide to winning in casinos a cart

full of money, all crisp 100 dollar bundles. And who knows you may even break the bank at roulette table. A lot of players go to the casinos and assume they are lucky and going to win and this is the wrong mentality to win at poker, because if you believe you are going to win you are going to compound your losses following bad strategies like Martingale. The Martingale strategy works best for the casino and they prevent losses by limiting the maximum amount of bets that could be placed and of course players like you and me don't have access to infinite resources that will allow us to keep doubling our bets forever. We need to win big and we need to win with a small amount of money. In this manual I am going to give you solid advice that will allow players to reduce the house edge of casinos and who knows if everyone read my book probably the casinos will stop the game of Roulette altogether. Because I have a system that really does beat the casinos. And the rules which I will tell you precisely in later part of the book are as follows 1.Take Profits 2.Try to go on a hot streak 3.Cut losses 4.Go for big wins like betting straight up 5.An intuitive pattern recognition system that makes phrases out of meaningless numbers for identification of wheel bias. (This works on every Roulette Wheel in Vegas, Atlantic City, every casino in the world and all machines open and closed and even automatic Roulette machines which have a ball inside a chamber) This is a short book that will give you the right tools to approach the game of Roulette and every chapter will convey the topics that I have told you above and you must use all of

these tools at once so that you will make big money or be break-even or have very little losses in the game of Roulette. Good Luck and wish you a lot of fun and entertainment in the casinos.

Roulettechess Randall S. Marshall, 2009-12-06

Roulettechess is a unique roulette textbook with over a hundred American and French flexible game strategies, including basic roulette playing instructions. The strategies are designed to show players how to reduce risk by selecting offensive and defensive numbers for the same spin of the

wheel. A player can select a return on various offensive and defensive combinations. A preferred strategy, as selected by a player, might be based on wheel coverage, risk, simplicity of layout, return on wager, manageability of strategy, flexibility, mixture of offensive and defensive numbers, location of offensive and defensive number on the layout, a player's time constraints, and approximately one hundred dollars to play American Roulette. An equivalent amount is required to play French Roulette. Some strategies have suggestions on how to change the coverage by substituting one or two numbers. The front of the book has wheel coverage diagrams, used as an index for 130 drawings that follow. The book frontage also has interesting Wager and Time Table Guides which simply show how a player, with only eighty one dollars (\$81.00) can play 21 American Roulette Games at \$21.00 each game, have only defensive wins of \$17.00, and have \$21.00 left at the end of playing the 21 games.

Roulette-Slots John Patrick, 1983-11

The System Is the Key at Roulette V. I.

Brown, 2009-09-30 The System Is The Key At Roulette Herein all aspects of roulette are explained, from the basic rules to the decorum which one should expect and adhere when gaming at roulette. The primary aim is to encourage the player to examine the game from a more structured perspective. Since roulette came into being, practitioners have sought a means to beat the house. This book shows that in devising systems to overcome the house advantage, one is only limited by ones imagination. Further, any apprehensions about

playing roulette and any pre-conceived notions about the game should likewise be dispelled. This book further demonstrates that roulette is not just a game of chance. It is a game which is, the author argues, should be accorded a place in the study of numerology and of the occult. The author demonstrates that the numbers in this game are influenced by supernatural forces. One can always observe definite patterns in roulette numbers. The key is to detect these patterns and capitalize on them. In addition, the author demonstrates that the number theories which he advocates and the patterns which he has observed can also be seen in other games of chance. ForeWord Clarion Book Review
